2. *Law.* Designed, or of such a nature as, to be executed, or carried into effect, in time to come, or to take effect on a future contingency; as, an *executory* devise, remainder, or estate. *Executed* implies completion; *executory*, something to be done; and an agreement is *executory* as long as anything remains to be done by either party. Thus, an agreement to sell is an *executory* contract. Contracts may be *executed* on one side and *executory* on the other, as where a conveyance is made which passes title, but the grantee has not executed his part by payment of the purchase money. An *executory* contract creates a chose in action, an *executed* contract conveys a chose in possession.

ex'o-ter'i-cism (ĕk'sŏ-tĕr'ĭ-sĭz'm), *n.* [NL.] *Bot.* The epidermis of an anther.

ex'o-ther'mous (-thûr'mŭs), *a.* Exothermic.

ex'o-thy'ro-pex'y (-thī'rŏ-pĕk'-sĭ), *n.* [*exo-* + *thyro-* + *-pexy.*]

spore.] *Biol.* A spore stage in the life history of certain protozoans in which the organism consists of a minute elongated cell capable of asexual reproduction; a sporozoite. The malaria parasite is injected into the human body in this stage by the mosquito. See ANOPHELES.

ex-ot'ro-pism (ĕk-ŏt'rō-pĭz'm), *n.* [*exo-* + *-tropism.*] *Plant Physiol.* The curvature of a lateral geotropic organ away from the main axis.

ex-pand' (ĕks-pănd'), *v. t.;* EX-PAND'ED; EX-PAND'ING [L. *expandere, expansum; ex* out + *pandere* to spread out, to throw open; perh. akin to E. *patent.* Cf. SPAWN.]

1. To lay open by extending; to open wide; to spread out; to diffuse; as, a flower *expands* its leaves.

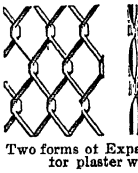
Then with *expanded* wings he steers his flight. *Milton.*

2. To cause the particles or parts of to spread themselves or stand apart, thus increasing bulk without addition of substance; to make to occupy more space; to cause expansion of (see EXPANSION, 1); to dilate; to distend; to extend every way; to enlarge; — opposed to *contract;* as, to *expand* the chest; heat *expands* all bodies; to *expand* the sphere of benevolence.

3. To work out or express in full or in greater detail; to develop; as, to *expand* an argument or a paragraph; specif., *Math.*, to state in enlarged form; to develop in a series; as, to *expand* an equation. See EXPANSION, 5.

Syn. — See DILATE.

ex-pand', *v. i.* To become widely opened; to spread apart; to dilate; distend; enlarge; swell; as, flowers *expand* in the spring; metals *expand* by heat; the heart *expands* with joy; an *expanding* traffic.



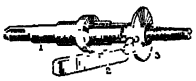
Two forms of Expanded Metal for plaster work.

ex-pand'ed (ĕks-păn'dĕd), *p. p.* of EXPAND. Specif.: *p. a. Her.* Open; displayed. **expanded metal**, sheet metal cut and stretched into a lattice, used in construction as a lathing, etc. — **e. type**, *Print.*, type somewhat wider than the standard for the same height.

☞ This is nonpareil antique expanded.

ex-pand'er (ĕks-păn'dẽr), *n.* One that expands; specif., *Mach.*, a device for expanding the end of a tube in a tube plate for a boiler or condenser so as to make a steam-tight or water-tight joint.

ex-pand'ing, *p. a.* That expands, or may be expanded; extending; spreading; enlarging. Specif., *Mach.*, in the name of various tools and devices, as. (1) **expanding arbor** *or* **mandrel**, one whose diameter can be varied by means of coned pieces and screws to fit any size of hole between certain limits. (2) **expanding auger, bit, drill, reamer**, etc., one whose cutter or cutters may be adjusted for holes of various sizes. See BIT, *Illust.* (3) **expanding pulley**, one whose diameter can be varied at will within a certain range. (4) **expanding pliers**, a pair the jaws of which diverge when the handles are squeezed together. See PLIERS, *Illust.* **expanding brake**, *or* **band brake**, *Mach.*, a brake for a vehicle, in which a flexible band can be sprung outward against the inside rim of a hub or annular gear wheel.



1 Expanding Mandrel; 2 Tool, 3 Piece of Work.

ex-panse' (ĕks-păns'), *n.* [From L. *expansus*, p. p. of *expandere.* See EXPAND.] **1.** That which is expanded or spread out; a wide extent of space or body; esp., with *the*, the arch of the sky.

Lights . . . high in the *expanse* of heaven. *Milton.*

2. An expanding; state of being expanded; expansion. *R.*

3. Extent to which a thing expands; spread; stretch; as, the alar *expanse* of a bird.

ex-pan'si-ble (ĕks-păn'sĭ-b'l), *a.* Capable of being expanded; esp., *Phon.*, capable of being pronounced, without loss of identity, with an opening of the jaws considerably wider than usual, as the open vowels, *a*, *ĕ*, etc. — **ex-pan'si-bil'i-ty** (-bĭl'ĭ-tĭ), **ex-pan'si-ble-ness**, *n.* — **ex-pan'si-bly**, *adv.*

ex-pan'sile (-sĭl), *a.* **1.** Expansible.

Ether and alcohol are more *expansile* than water. *Brande & C.*

2. Pertaining to, or characteristic of, expansion; as, *expansile* movements.

ex-pan'sion (-shŭn), *n.* [L. *expansio.*] **1.** Act or process of expanding, or state of being expanded; dilatation; distention; extension; enlargement; as, *expansion* of business or of currency; territorial *expansion.* The application of heat to substances generally causes expansion. For gases the rate of expansion is nearly uniform (see CHARLES'S LAW). Liquids and solids expand at various rates, expressed by *coefficients* (see under COEFFICIENT, 3). Gases, moreover, expand merely by release from pressure, and in so doing absorb heat.

2. That which is expanded; expanse; extended surface.

The starred *expansion* of the skies. *Beattie.*

3. Extent of expansion; also, pure space.

Lost in *expansion*, void and infinite. *Blackmore.*

4. An expanded or expanding part, appendage, or termination; as, the Lake of Geneva is an *expansion* of the river Rhone; an *expansion* for a bolt.

5. *Math.* The developed result of an indicated operation; the expression of a function in the form of a convergent series; as, the *expansion* of $(a + b)^2$ is $a^2 + 2ab + b^2$.

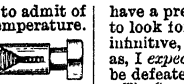
6. *Nav. Arch.* The enlargement of the ship mathematically from a model or drawing to the full or building size, in the process of construction.

7. *Engin.* The spreading out (increasing in volume) of the working fluid, as steam, in an engine cylinder after cut-off, or, in an internal-combustion engine, after explosion, by which it continues to propel the piston, expending part of its internal energy and losing in pressure and temperature; also, the period (from cut-off to release) over which this occurs. The number of expansions is the ratio between the volumes of the working fluid after and before expansion.

8. *Symbolic Logic.* = DEVELOPMENT.

expansion bend. A bend, as in a steam pipe, to admit of expansion or contraction due to variation of temperature.

expansion bolt. A bolt or fastening operating in or by an expanding attachment. A common form (see illust.) is used for attaching another part by means of a blind hole drilled in wood, iron, or masonry already in position.



Expansion Bolt.

expansion curve. *Physics.* A curve indicating change of volume, or of any linear dimension, of a body when subjected to variation of temperature; specif., *Engin.*, that line in an indicator diagram which shows the variations of pressure of the working fluid as it expands in an engine cylinder, or the corresponding line in the entropy-temperature diagram for the same cycle of operations.

expansion engine. *Mach.* An engine using its working fluid expansively. See COMPOUND ENGINE.

expansion fit. *Mech.* A fit obtained by expanding one part into another, as a tube in a tube plate.

expansion gear. *Mach.* A gear operating a valve in an engine for regulating the cut-off, esp. to correspond with the variations of load and speed of the engine.

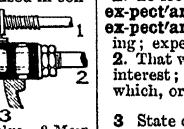
ex-pan'sion-ism (-ĭz'm), *n.* Advocacy of expansion, as of a nation's territory or currency. — **ex-pan'sion-ist**, *n.*

expansion joint *or* **coupling.** *Engin.* A joint or coupling designed so as to permit an endwise movement of its parts to compensate for expansion or contraction due to variations of temperature, as a telescopic steam-pipe joint or a clamp for holding a locomotive boiler to its frame.

expansion plate. **1.** *Mach.* See EXPANSION VALVE.

2. A plate or bracket permitting endwise movement (due to expansion or contraction) of the steam or hot-water pipes, etc., it is designed to support.

expansion valve. *Mach.* An auxiliary valve used in conjunction with an ordinary (usually modified) valve to give a sharper cut-off in an engine and thus permit of a greater ratio of expansion. A double-beat or disk valve may be used for this purpose, but the usual form consists of a plate or slide (the **expansion plate**, or **slide**), or of two such plates adjustable on a rod having right-handed and left-handed threads (forming the **Meyer valve**), working on the back of an ordinary slide valve having through ports.



1 Meyer Expansion Valve, 2 Main Valve; 3, 3 Ports leading to Cylinder.

ex-pan'sive (ĕks-păn'sĭv), *a.* **1.** Having a capacity or tendency to expand or dilate; diffusive; also, of much expanse; wide-extending; as, the *expansive* force of heat; hence, of persons, feelings, etc., free; unrestrained; liberal in manifestation or application; comprehensive, esp. in sympathies; as, an *expansive* mood.

His forehead was broad and *expansive.* *Prescott*

2. Applying, working by, or capable of, expansion; as, an *expansive* engine; *expansive* working (of an expansion engine); *expansive* gear; an *expansive* bit.

— **ex-pan'sive-ly**, *adv.* — **ex-pan'sive-ness**, *n.*

‖ **ex par'te** (ĕks pär'tē). [L. See EX-; PART.] **1.** Upon or from one side only; — said of various legal matters or proceedings, as applications, commissions, hearings, testimony, etc. Of legal proceedings *ex parte* ordinarily implies a hearing or examination in the presence of, or on papers filed by, one party and in the absence of, and often without notice to, the other, as in proceedings before a grand jury, where the testimony and affidavits are submitted in the absence of the accused, in various motions, or petitions, etc., in court, as for an order to show cause, a temporary injunction, etc.

2. Made or done in the interest of, or with respect to, one side only; as, *ex-parte* statements are usually partial.

ex-pa'ti-ate (ĕks-pā'shĭ-āt), *v. i.;* EX-PA'TI-AT'ED (-āt'ĕd); EX-PA'TI-AT'ING (-āt'ĭng). [L. *expatiatus, exspatiatus*, p. p. of *expatiari, exspatiari*, to expatiate; *ex* out + *spatiari* to walk about, spread out, fr. *spatium* space. See SPACE.]

1. To range at large, or without restraint.

Bids his free soul *expatiate* in the skies. *Pope.*

2. To enlarge in discourse or writing, to be copious in argument or discussion; to descant.

He *expatiated* on the inconveniences of trade. *Addison*

Syn. EXPATIATE, DILATE, DESCANT. To EXPATIATE is to wander at will over a subject, or to discourse copiously upon it; to DILATE is to enlarge, to DESCANT, to comment freely upon it; as, "We will *expatiate* freely over the wide and varied field before us" (*Landor*); "He *expatiated* in reply on my lord's honor and greatness" (*Sterenson*); "She proceeded to *dilate* upon the perfections of Miss Nickleby" (*Dickens*); "To praise his stable, and *descant* upon his claret and cookery" (*Goldsmith*). See TALK, DILATE.

ex-pa'ti-ate, *v. t.* To expand; spread; broaden.

Afford art an ample field in which to *expatiate* itself. *Dryden.*

ex-pa'ti-a'tion (-ā'shŭn), *n.* **1.** Act of expatiating.

2. A projecting part; an extension. *Obs.*

ex-pa'ti-a-to-ry (ĕks-pā'shĭ-*a*-tō-rĭ), *a.* Marked by expatiation; expansive; diffusive.

ex-pa'tri-ate (-trĭ-āt), *a.* Exiled; expatriated. — *n.* An exile.

ex-pa'tri-ate (ĕks-pā'trĭ-āt), *v. t.;* EX-PA'TRI-AT'ED (-āt'ĕd); EX-PA'TRI-AT'ING (-āt'ĭng). [LL. *expatriatus*, p. p. of *expatriare;* L. *ex* out + *patria* fatherland, native land, fr. *pater* father. See PATRIOT.] **1.** To banish; to drive or force (a person) from his own country; to make an exile of.

The *expatriated* landed interest of France. *Burke.*

2. Reflexively, as *to expatriate one's self:* To withdraw from one's native country; specif., to renounce the rights and liabilities of citizenship where one is born, and become a citizen of another country. Cf. ALLEGIANCE.

ex-pa'tri-a'tion (-ā'shŭn), *n.* [Cf. F. *expatriation.*] Act of expatriating, or state of being expatriated.

Expatriation was a heavy ransom to pay for the rights of their minds and souls. *Palfrey.*

ex-pect' (ĕks-pĕkt'), *v. t.;* EX-PECT'ED; EX-PECT'ING. [L. *expectare, exspectare, exspectatum*, to look out for, await, expect; *ex* out + *spectare* to look at. See SPECTACLE.]

1. To wait for; to await. *Obs.*

Let 's in, and there *expect* their coming. *Shak.*

2. To look for (mentally); to look forward to, as to something that is believed to be about to happen or come; to have a previous apprehension of, whether of good or evil; to look for with some confidence; — often followed by an infinitive, sometimes by a clause (with or without *that*); as, I *expect* to receive wages; I *expect* that the troops will be defeated. "Good · I will *expect* you." *Shak.*

The Somersetshire or yellow regiment . . . was *expected* to arrive on the following day. *Macaulay.*

3. To demand; require. *Obs.*

4. To suppose, — a misuse, chiefly *Colloq.*

Syn. — EXPECT, ANTICIPATE, HOPE agree in regarding some future event as about to take place. EXPECT is the strongest, and implies some ground or reason in the mind for considering the event as likely to happen; as, "And Peter said . . . Look on us. And he gave heed unto them, *expecting* to receive something of them" (*Acts* iii. 4, 5); "Our eyes beheld Messiah certainly now come, so long *expected* of our fathers" (*Milton*). To ANTICIPATE is to look forward to, esp. in such fashion as to realize to one's self what is to come; as, "I *anticipate* the pleasure of those days not very far distant, and feel a part of it at this moment" (*Cowper*); "We regret the pleasures we have lost, and eagerly *anticipate* those which are to come" (*Hazlitt*). In a weaker sense, to *anticipate* is merely to look for something, and implies less definite grounds than *expect;* as, I *anticipate* a pleasant time; but this use is less approved. HOPE adds to expectation the implication of desire; as, "When Herod saw Jesus, he was exceeding glad: for he was desirous to see him of a long season . . . and he *hoped* to have seen some miracle done by him" (*Luke* xxiii 8); "Upon my reputation and credit and as I *hope* to live" (*Shak.*). See HOPEFUL, APPREHENSION, CONFIDENCE.

ex-pect' (ĕks-pĕkt'), *v. i.* **1.** To wait; stay. *Obs. or Archaic.*

2. To look forward; to look with expectation.

ex-pect'ance (ĕks-pĕk'tăns) } *n.* [Cf. LL. *expectantia.*]
ex-pect'an-cy (-tăn-sĭ) } **1.** Act or state of expecting; expectation.

2. That which is expected, or looked or waited for with interest; the object of expectation or hope; also, that from which, or by reason of which, something is expected.

The *expectancy* and rose of the fair state. *Shak.*

3 State of being expected or a subject of expectation; as, a fortune in *expectancy.*

4. *Eccl.* An expectative grace.

ex-pect'ant (-tănt), *a.* [L. *expectans, expectans*, p. pr. of *expectare, exspectare:* cf. F. *expectant.*] Expecting, waiting; as, an *expectant* attitude; having expectations; prospective; as, an *expectant* heir; existing in expectation; to be expected; in prospect; as, *expectant* fees; marked by expectation or waiting; as, an *expectant* policy. — *n.* One who expects, as formerly, in Scotland, a candidate for the ministry. — **ex-pect'ant-ly**, *adv.*

expectant state. *Law.* = ESTATE IN EXPECTANCY. — **e. treatment**, *Med.*, a treatment of disease in which the cure is left to nature and little active treatment attempted.

ex'pec-ta'tion (ĕks'pĕk-tā'shŭn), *n.* [L. *expectatio, exspectatio:* cf. F. *expectation.*] **1.** Act or state of expecting; a looking forward to an event as about to happen. "In *expectation* of a guest." *Tennyson.*

2. That which is expected or looked for.

3. The prospect of the future; grounds upon which something excellent is expected to happen; prospect of anything good to come, esp. of property or rank.

His magnificent *expectations* made him, in the opinion of the world, the best match in Europe. *Prescott.*

By all men's eyes a youth of *expectation.* *Otway.*

4. State of being expected; as, benefits in *expectation.*

5. The value of a chance (as the prospect of a prize) which depends upon some contingent event. *Expectations* are computed for or against the occurrence of the event.

6. *Med.* = EXPECTANT TREATMENT.

Syn. — Anticipation, confidence, trust.

expectation of life, the average duration of the life of individuals after any specified age as shown by mortality tables.

Expectation Sunday. The Sunday before Whitsunday.

Expectation Week. *Eccl.* The ten days between Ascension Day and Whitsunday; — so called because this period commemorates the apostles' expectation of and prayer for the promised coming of the Holy Spirit.

ex-pect'a-tive (ĕks-pĕk'*tā*-tĭv), *a.* [Cf. F. *expectatif.*] Pertaining to, or constituting, an object of expectation, contingent. — *n.* [F.] Something in expectation; esp., *Eccl.*, an expectative grace. — **expectative grace**, *Eccl.*, a mandate given by the Pope or a prince appointing a successor to any benefice before it becomes vacant.

ex-pec'to-rant (ĕks-pĕk'tō-rănt), *a.* [L. *expectorans*, p. pr. of *expectorare* to drive from the breast: cf. F. *expectorant.*] *Med.* Tending to facilitate expectoration or to promote discharges of mucus, etc., from the lungs or throat. — *n.* An expectorant medicine.

ex-pec'to-rate (-rāt), *v. t.;* EX-PEC'TO-RAT'ED (-rāt'ĕd); EX-PEC'TO-RAT'ING (-rāt'ĭng). [L. *expectorare* to drive from the breast; *ex* out + *pectus, pectoris*, breast. See PECTORAL.] **1.** To cause ejection of (phlegm). *Obs.*

2. To eject from the trachea or lungs; to discharge, as phlegm or other matter, by coughing, hawking, and spitting; to spit forth.

3. To cast out from consideration; to reject as worthless; also, to relieve the mind of. *Obs. or Archaic.*

ex-pec'to-rate, *v. i.* **1.** To discharge matter from the lungs or throat by hawking and spitting; to spit.

2. To relieve one's mind. *Obs.*

Syn. — EXPECTORATE, SPIT. To EXPECTORATE (properly a medical term) is to eject from the lungs or windpipe, esp. by coughing; to SPIT is to eject from the mouth; as, to *expectorate* blood; "When he had thus spoken, he *spat* on the ground, and made clay with the spittle" (*John* ix. 6). The employment of *expectorate* for *spit* is common among those who regard the latter word as indelicate, but is contrary to good usage.

ex-pec'to-ra'tion (-rā'shŭn), *n.* Act of expectorating, or that which is expectorated.

ex'pi-a-to-ry (ĕks'pĭ-*a*-tō-rĭ), *a.* [L. *expiatorius*.] Having power, or intended, to make expiation; atoning; as, an *expiatory* sacrifice. — **ex'pi-a-to-ri-ness** (-rĭ-nĕs), *n.*

ex'pi-la'tion (ĕks'pĭ-lā'shŭn), *n.* [L. *expilatio*.] A pillaging; spoliation; also, that which is got by pillage. *Rare.*

ex'pi-ra'tion (ĕk'spĭ-rā'shŭn), *n.* [L. *expiratio, exspiratio*: cf. F. *expiration*. See EXPIRE.] **1.** Act of expiring; as: **a** *Physiol.* Act or process of emitting air from the lungs through the nose or mouth; as, respiration consists of inspiration and *expiration*. **b** Emission of volatile matter; exhalation. *Obs.* **c** The last emission of breath; death.
"The groan of *expiration*." *Rambler.*
2. A coming to a close; cessation; extinction; termination; end. "Before the *expiration* of thy time." *Shak.*
3 That which is expired; matter breathed forth; that which is produced by breathing out, as a sound.
The aspirate "he," which is . . . a gentle *expiration*. *G. Sharp.*

ex'pi-ra'tor (ĕk'spĭ-rā'tĕr), *n.* [L. *expirare* to breathe out.] One that expires, or breathes out (something); specif., an instrument for sending out a stream of air, gas, or vapor.

ex-pir'a-to-ry (ĕk-spīr'*a*-tō-rĭ), *a. Physiol.* Pertaining to, or employed in, the expiration or emission of air from the lungs; as, the *expiratory* muscles.
expiratory accent, *Phon.*, stress accent. See ACCENT, 1.

ex-pire' (ĕk-spīr'), *v. t.*; EX-PIRED' (-spīrd'); EX-PIR'ING (-spīr'ĭng). [L. *exspirare, expirare, expiratum, exspiratum*; *ex* out + *spirare* to breathe: cf. F. *expirer*. See SPIRIT.] **1.** To breathe out; to emit from the lungs; to throw out from the mouth or nostrils in the process of respiration; — opposed to *inspire*.
Anatomy exhibits the lungs in a continual motion of inspiring and *expiring* air. *Harvey.*
2. Hence, to give forth insensibly or gently, as a fluid or vapor; to emit or exhale, as an odor; also, to expel. *Obs.*
The *expiring* of cold out of the inward parts of the earth in winter. *Bacon.*
3. **a** To breathe (one's last); to breathe out (one's life or soul). *Obs.* **b** To bring to a close; to terminate. *Obs.*

ex-pire', *v. i.* **1.** To emit the breath.
2. To emit the last breath; to breathe out the life; to die; as, to *expire* calmly; to *expire* in agony.
3. To come to an end; to cease; terminate; perish; to become extinct; as, the flame *expired*; his lease *expires* to-day; the month *expired* on Saturday.
4. To burst forth; to fly out with a blast. *Obs.*

ex-pi'ry (ĕk-spī'rĭ; ĕks'pĭ-rĭ), *n.* **1.** Act of breathing one's last; death; expiration; hence, extinction. *Archaic.*
2. A coming to an end; termination; — used esp. with reference to a thing, as an insurance policy or other contract the duration of which is limited to a given time by contract, law, etc.
He had to leave at the *expiry* of the term. *Lamb.*
The Parliament . . . now approaching the *expiry* of its legal term. *J. Morley.*
The policy may be . . . written for a stated time, at the end of which it expires by its own terms. This is a termination by *expiry*, not by lapse. *J. A. Jackson.*

ex-pis'cate (ĕks-pĭs'kāt), *v. t.*; -CAT-ED (-kāt-ĕd); -CAT-ING (-kāt-ĭng). [L. *expiscatus*, p. p. of *expiscari* to fish out; *ex* out + *piscari* to fish, *piscis* fish.] To fish out; to find out by skill or laborious investigation; to search out. *Scot. or Humorous.* "To *expiscate* principles." *Nichol.*

ex'pis-ca'tion (ĕks'pĭs-kā'shŭn), *n.* Act of expiscating, a searching out. *Scot. or Humorous.*

ex-pis'ca-to-ry (ĕks-pĭs'kā-tō-rĭ), *a.* Tending to fish out; searching out. *Scot. or Humorous.*

ex-plain' (ĕks-plān'), *v. t.*; EX-PLAINED' (-plānd'); EX-PLAIN'ING. [L. *explanare* to flatten, spread out, explain; *ex* out + *planare* to make level or plain, *planus* plain: cf. OF. *esplaner, explaner*. See PLAIN, *a.*; cf. ESPLANADE.]
1. To flatten; to spread out; to unfold; expand. *Obs.*
The horse-chestnut is . . . ready to *explain* its leaf. *Evelyn.*
2. To make plain, manifest, or intelligible; to clear of obscurity; to expound; to unfold and illustrate the meaning of; as, to *explain* a chapter of the Bible.
Commentators to *explain* the difficult passages to you. *Gay.*
A thing is said to be *explained* when it is classified with other things with which we are already acquainted. That is the only kind of explanation of which the highest science is capable. We *explain* the origin, progress, and ending of a thunderstorm, when we classify the phenomena presented by it along with other more familiar phenomena of vaporization and condensation. *J. Fiske.*
Syn. — Unfold, develop, clear up. — EXPLAIN, EXPOUND, INTERPRET, ELUCIDATE. To EXPLAIN, the most general term, is to make plain or intelligible; to EXPOUND is to set forth, esp. learnedly, elaborately, or dogmatically; to INTERPRET, as here compared, is to bring out the meaning of something, esp. by sympathetically entering into it; to ELUCIDATE is to throw light upon, esp. by clear or luminous exposition or illustration; as, to *explain* the mechanism of an engine, to *expound* an abstruse theory, to *interpret* the character of Hamlet, to *elucidate* an obscure passage by annotation or by comparison of parallel passages.
to explain away, to get rid of by explanation. "Those *explain* the meaning quite *away*." *Pope.* — **to e. one's self**, to make clear the meaning of one's statements or the reasons for one's conduct.

ex-plain' (ĕks-plān'), *v. i.* To give an explanation.

ex-plain'a-ble (-*a*-b'l), *a.* [L. *explanabilis*.] Capable of being explained; interpretable, accountable.

ex'pla-nate (ĕks'pla-nāt), *a.* [L. *explanatus*, p. p.] *Bot. & Zoöl.* Spreading or extending outwardly in a flat form.

ex'pla-na'tion (-nā'shŭn), *n.* [L. *explanatio*.] **1.** Act or process of explaining, expounding, or interpreting; a clearing from obscurity and making intelligible; as, the *explanation* of a passage in Scripture, or of a contract or treaty.
Scientific *explanation* and inductive generalization being the same thing, the limits of *explanation* are the limits of induction. *A. Bain.*
Explanation is merely resolving the complex into the simple, and assimilating the less . . . to the better known. *James Ward.*
2 That which explains, as, a satisfactory *explanation*.
3. The meaning attributed to anything by one who explains it, definition; interpretation; sense.
Different *explanations* [of the Trinity] *Bp. Burnet.*
4. A mutual exposition of terms, meaning, or motives, with a view to adjust a misunderstanding or reconcile differences; reconciliation; as, to come to an *explanation*.
Syn. — Definition, description, explication, exposition.

ex-plan'a-tive (ĕks-plăn'*a*-tĭv), *a.* Explanatory.

ex-plan'a-to-ry (-tō-rĭ), *a.* [L. *explanatorius*.] Serving to explain; offering explanation; as, *explanatory* notes. — **ex-plan'a-to-ri-ly** (-rĭ-lĭ), *a.* — **ex-plan'a-to-ri-ness**, *n.*

ex'ple-ment (ĕks'plē-mĕnt), *n.* [L. *explementum* that which fills up, fr. *explere* to fill up.] *Math.* The angle that must be added to a given angle to produce a round angle.

ex'ple-tive (ĕks'plē-tĭv; 277), *a.* [L. *expletivus*, fr. *expletus*, p. p. of *explere* to fill up; *ex* out + *plere* to fill, akin to *plenus* full: cf. F. *explétif*. See FULL.] Filling up; hence, added merely for the purpose of filling up; superfluous.
Expletive phrases to plump his speech. *Barrow.*
— **ex'ple-tive-ly**, *adv.* — **ex'ple-tive-ness**, *n.*

ex'ple-tive, *n.* Something added merely as a filling; esp., a word, letter, or syllable not necessary to the sense, but inserted to fill a vacancy; also, an oath or exclamation.
While *expletives* their feeble aid do join,
And ten low words oft creep in one dull line. *Pope.*

ex'ple-to-ry (-tō-rĭ), *a.* Expletive.

ex'pli-ca-ble (ĕks'plĭ-kă-b'l), *a.* [L. *explicabilis*: cf. F. *explicable*.] Capable of being explicated, admitting explanation. — **ex'pli-ca-ble-ness**, *n.*

ex'pli-cate (-kāt), *v. t.*; -CAT'ED (-kāt'ĕd); -CAT'ING (-kāt'-ĭng). [L. *explicatus*, p. p. of *explicare* to unfold, explain. Cf. EXPLICIT, *a.*] **1.** To unfold; to expand; to lay open. *Obs.*
2 To unfold the meaning or sense of; to explain; to clear of difficulties or obscurity; to interpret.
The last verse . . . is not yet sufficiently *explicated*. *Dryden*
3. To develop what is involved or implied in (a statement, notion, etc.). See EXPLICATION, 2.

ex'pli-ca'tion (-kā'shŭn), *n.* [L. *explicatio*: cf. F. *explication*.] **1.** Act of opening, unfolding, or explaining; explanation; exposition; interpretation.
The *explication* of our Savior's parables. *Atterbury*
2. A detailed description; full account; esp, an analytical account of all that is involved in a conception.
The discussion of definitions, in so far as it does not turn on the use of words, but on the properties of things, Dr Whewell calls the *explication* of conceptions. *J. S. Mill.*
3. Specif., an unfolding of causes; causal explanation.
4. The process of unfolding; natural evolution.
The flowers of sycamore . . . before *explication*. *Sir T. Browne*
5. An explanation for the adjustment of difficulties. *Obs.*

ex'pli-ca-tive (ĕks'plĭ-kā-tĭv), *a.* [Cf. F. *explicatif*.] Serving to explicate; tending to lay open to the understanding; analytical; as, an *explicative* judgment. — *n.* An explicative term or judgment. — **ex'pli-ca-tive-ly**, *adv.* — **explicative proposition**, *Logic*, an analytic or essential proposition.

ex'pli-ca'tor (-kā'tĕr), *n.* [L.] One who unfolds or explains; an expounder; an explainer

ex'pli-ca-to-ry (ĕks'plĭ-kā-tō-rĭ), *a.* Explicative. *Barrow.*

ex'pli-cit (ĕks'plĭ-sĭt), *a.* [LL., an abbreviation of *explicitus* (*est liber*) the book (which anciently was a roll of parchment) is unfolded (and, of course, "finished"). See EXPLICIT, *a.*] A word formerly used (as *finis* is now) at the conclusion of a book to indicate the end.

ex-plic'it (ĕks-plĭs'ĭt), *a.* [L. *explicitus*, p. p. of *explicare* to unfold: cf. F. *explicite*. See EXPLOIT; cf. EXPLICATE.]
1. Having no folds; plain; smooth. *Obs.*
2. Not implied merely, or conveyed by implication; distinctly stated; plain in language; open to the understanding; clear; not obscure or ambiguous; express; unequivocal; as, an *explicit* declaration.
The language of the charter was too *explicit* to admit of a doubt. *Bancroft.*
3. Having no disguised meaning or reservation; unreserved; outspoken; — applied to persons; as, he was earnest and *explicit* in his statement.
4. Clearly developed; with all its elements shown or apparent.
The transition from consciousness to self-consciousness, the conversion of implicit into *explicit* experience, always requires the crossing lines of action and reaction between the inner and the outer world. *J. Martineau.*
Syn. — Clear, plain, open, unambiguous, unequivocal; precise, exact, discriminating; fixed, absolute, unconditional, positive. — EXPLICIT, EXPRESS, SPECIFIC, DEFINITE, CATEGORICAL are here compared with reference to statements or utterances. That is EXPLICIT (cf. *implicit*, under CONSTRUCTIVE) which is stated plainly and distinctly, rather than by implication, and which leaves nothing equivocal or ambiguous; as, *explicit* directions, an *explicit* promise; "It will be proper . . . at the outset to give an *explicit* and determinate account of what is meant by [the principle of utility]" (*Bentham*). EXPRESS adds to *explicit* the implication of directness, pointedness, or force; as, an *express* prohibition, an *express* understanding, *express* testimony; "an *express* command, under penalty, to deliver his head" (*Shak.*). That is SPECIFIC which refers explicitly to a given thing, or which specifies in detail; that is DEFINITE (see DEFINITE) which is precise and determinate in its limitations; as, a *specific* offer (of a particular thing), a *definite* offer (one which may be clearly or exactly defined). "The intended punishment is explained *specifically*, that is, with its circumstances" (*Warburton*); "That [middle age] . . . cannot have its peculiar character so *definitely* marked and ascertained" (*Blair*). CATEGORICAL adds to the preceding words the implication of absolute and unconditioned reference; as, to demand a *categorical* answer; "She called upon him *categorically* to state whether he did not think that traveling on the Sabbath was an abomination and a desecration" (*Trollope*). See SPECIAL.
explicit function, *Math.*, a quantity directly expressed in terms of another quantity or quantities; thus, in $y = 6z^2$, $y = 10 - z^3$, y is an explicit function of z; in $z = \sqrt{x^2 - x^3 - y^2}$, z is an explicit function of x and y.

ex-plode' (ĕks-plōd'), *v. t.*; EX-PLOD'ED (-plōd'ĕd); EX-PLOD'ING (-plōd'ĭng). [L. *explodere, explosum*, to drive out, as a player by clapping; *ex* out + *plaudere, plodere* to clap, strike, applaud; cf. OF. *exploder*. Cf. PLAUDIT.] **1.** To drive from the stage by noisy disapprobation; to hoot off; to drive away or reject noisily; as, to *explode* a play. *Obs.*
2. To bring into disrepute and reject; to drive from notice and acceptance; as, to *explode* a fashion.
Old *exploded* contrivances of mercantile fraud. *Burke.*
3. To cause to explode, or burst noisily; to detonate; as, to *explode* powder; to *explode* a shell.
4. *Phon.* To utter (a sound) with a slight puff of breath (either voiceless or voiced); — as in pronouncing the stopped, or mute, consonants *p, b, t*, etc.
5. To expel by explosion. *Obs.*

ex-plode', *v. i.* **1.** To burst or expand violently and noisily as an effect of a sudden production or release of pressure; as, gunpowder *explodes*; the boiler *exploded*.
2. To burst forth with sudden violence and noise; as, at this, his wrath *exploded*.

ex-plod'ent (ĕks-plōd'ĕnt), *n.* [L. *explodens*, p. pr.] *Phon.* An explosive consonant.

ex-plod'er (-ĕr), *n.* One that explodes; specif., a device for firing or detonating an explosive charge, as in blasting.

ex-ploit' (ĕks-ploit'), *n.* [ME. *esploit* success, OF. *exploit, espleit*, revenue, product, vigor, force, exploit, F. *exploit* exploit, fr. *exploitier* to accomplish (see EXPLOIT, *v.*), or fr. L. *explicitum*, prop. p. p. neut. of *explicare* to unfold, display, exhibit; *ex* + *plicare* to fold. See PLY, cf. EXPLICIT, *a.*] **1.** Achievement; advantage; success, also, effort to gain advantage; esp., combat. *Obs.*
2. A deed or act; esp., a heroic act; a deed of renown; an adventurous or noble achievement; as, the *exploits* of Alexander the Great.
Ripe for *exploits* and mighty enterprises. *Shak.*
Syn. — See FEAT.

ex-ploit', *v. t.*; EX-PLOIT'ED; EX-PLOIT'ING. [F. *exploiter*, OF. *esploitier, espleitier*, LL. (assumed) *explicitare*, L. *explicitus*, p. p. See EXPLOIT, *n.*] **1.** To achieve; perform. *Obs.*
He made haste to *exploit* some warlike service. *Holland*
2. To utilize, to make available; to get the value or usefulness out of; as, to *exploit* a mine or agricultural lands; to *exploit* public opinion.
3. Hence: To draw an illegitimate profit from; to speculate on; to put upon.
In no sense whatever does a man who accumulates a fortune by legitimate industry *exploit* his employees or make his capital "out of" anybody else. *W. G. Sumner.*

ex-ploit', *v. i.* **1.** To get on; to act effectively. *Obs.*
2. *Mining.* To extract ore, as distinguished from the preliminary operations of exploring and opening the mine by means of shafts, levels, etc.

ex-ploit'age (-ăj), *n.* Exploitation.

ex'ploi-ta'tion (ĕks'ploi-tā'shŭn), *n.* [F.] **1.** Act of exploiting; utilization.
2. Selfish or unfair utilization.
3. Advance examination; reconnoitering.

ex-ploi'ta-tive (ĕks-ploi'*ta*-tĭv), *a* Pertaining to exploitation; exploiting.

ex-ploi'ter (ĕks-ploi'tĕr), *v. t.*; -PLOI'TERED (-tĕrd); -PLOI'TER-ING. To exploit, esp. so as to profit illegitimately.

ex'plo-ra'tion (ĕks'plō-rā'shŭn), *n.* [L. *exploratio*: cf. F. *exploration*.] **1.** Act of exploring, as for purposes of geographical discovery; examination; as, *explorations* in unknown countries. "An *exploration* of doctrine." *Bp. Hall.*
2. *Med.* Physical examination, as by means of a probe.

ex-plor'a-tive (ĕks-plōr'*a*-tĭv; 201), *a.* Exploratory. — **ex-plor'a-tive-ly**, *adv.* — **ex-plor'a-tive-ness**, *n.*

ex-plor'a-to-ry (ĕks-plōr'*a*-tō-rĭ; ĕks-plōr'-; 277), *a.* [L. *exploratorius*.] Of, pert. to, or connected with, exploration; serving in, or intended for, exploration; searching.

ex-plore' (ĕks-plōr'; 201), *v. t.*; EX-PLORED' (-plōrd'); EX-PLOR'ING (-plōr'ĭng). [L. *explorare* to explore; *ex* out + *plorare* to cry out, to cry aloud, prob. orig., to cause to flow; prob. akin to E. *flow*: cf. F. *explorer*.] **1.** To seek for or after; to strive to attain by search. *Obs.*
Explores the lost, the wandering sheep directs. *Pope.*

‖ **ex'per'tise'** (ĕk'pĕr'tēz'), *n.* [F.] *Fr. Law.* Expert opinion, or reference of a subject to, or its consideration by, experts.
ex'pert-ize, *v. i.* See -IZE.
ex-pert'ly, *adv.* of EXPERT.
‖ **ex-per'to cre'di-te** (krĕd'ĭ-tē). [L.] Believe one who knows by experience.
Vergil (Æneid, XI. 283).
ex'pert-ship, *n.* See -SHIP.
‖ **ex-per'tus me'tu-it** (mē'tū-ĭt). [L.] The experienced man dreads (it).
Horace (Epistles, I. xviii. 83).

ex-pet'i-ble, *a.* [L. *expetibilis*, fr. *expetere* to wish for.] Desirable. *Obs.*
ex'pi-a-bl. Expiable. *Ref. Sp.*
ex'pi-ate, *a* [L. *expiatus*, p. p.] Terminated. *Obs.*
ex'pi-a-tist (ĕks'pĭ-*a*-tĭst), *n.* An expiator. *Rare.*
ex'pi-a-tive, *a.* Expiatory. *Rare.*
ex'pi-a'tor, *n.* [L.] One who expiates. [*Obs.*]
ex'pi-a-to'ri-ous, *a.* Expiatory.
ex'pi-late, *v. t.* [L. *expilatus*, p. p. of *expilare* to pillage.] To pillage. *Obs.* — **ex'pi-la'tor**, *n. Obs.*

ex-pir'a-ble (ĕk-spīr'*a*-b'l), *a.* See -ABLE.
ex-pir'ant (-ănt), *n.* [L. *exspirans*, p. pr.] One that expires.
ex-pire', *n.* Expiration. *Obs.*
ex-pir'ee' (ĕk-spīr'ē'), *n.* A convict whose term has expired. *Australasia.*
ex-pir'er (ĕk-spīr'ĕr), *n.* One that expires.
ex-pir'ing, *p. pr.* & *vb. n.* of EXPIRE. — **ex-pir'ing-ly**, *adv.*
ex-pis'ca-tor (ĕks-pĭs'kā-tĕr; ĕks'pĭs-kā'tĕr), *n.* One who expiscates. *Scot. or Humorous.*

ex-plain'a-bl. Explainable. *Ref. Sp.*
ex-plaind'. Explained. *Ref. Sp.*
ex-plain'er, *n.* One who explains
ex-plain'ing-ly, *adv.* of *explaining*, p. pr.
explait. † EXPLOIT. *n.*
ex'pla-na'tor (ĕks'pla-nā'tĕr), *n.* [L.] An explainer *Rare.*
ex-plane'. † EXPLAIN.
ex-plat', **ex-plate'**, *v. t.* [*ex-* + *plat* or *plait*.] To explain; unfold. *Obs.*
expleas. † ESPLEES.

ex-plete', *v. t.* [L. *expletus*, p. p. of *explere* to fill full.] To satisfy; complete; accomplish. *Obs.*
ex-ple'tion (ĕks-plē'shŭn), *n.* [L. *expletio* a satisfying.] Accomplishment; fulfillment. *Obs.*
ex'ple-tiv. Expletive. *Ref. Sp.*
expleyt, expleyte. † EXPLOIT.
ex'pli-cate. *a.* [L. *explicatus*, p. p.] Explicated. *Obs.*

2. To search through or into; to penetrate or range over for discovery; to examine thoroughly; as, to *explore* new countries or seas; to *explore* the depths of science.
3. *Med.* To examine minutely, as by means of a probe; as, to *explore* a wound.

ex-plore' (ĕks-plōr'; 201), *v. i.* To make or conduct a systematic search.

ex-plor'er (-plōr'ĕr), *n.* **1.** One that explores; esp., a traveler in new regions in search of geographical or scientific discovery.
2. *Med.* An instrument for exploring cavities, esp. in teeth.

ex-plor'ing, *p. a.* Employed in, or designed for, exploration. "*Exploring* parties." *Bancroft.*

exploring coil, a small coil of wire connected with a galvanometer, used for exploring a magnetic field; — called also *magnetic proof plane.*

ex-plo'sion (ĕks-plō'zhŭn), *n.* [L. *explosio* a driving off by clapping: cf. F. *explosion* explosion. See EXPLODE.] **1.** Act of driving away as with scorn; rejection. *Obs.*
2. Act of exploding; detonation; a violent bursting or expansion, with noise, following the sudden production of great pressure, as in the case of explosives, or a sudden release of pressure, as in the disruption of a steam boiler.
3. A violent outburst of feeling, manifested by excited language, action, etc.; as, an *explosion* of wrath.
A formidable *explosion* of high-church fanaticism. *Macaulay.*

explosion engine *or* **motor.** *Mach.* An internal-combustion engine operated by the explosion of the charge. See INTERNAL-COMBUSTION ENGINE.

ex-plo'sion-ist, *n.* One who uses explosives as weapons of violence, as some Nihilists, etc.

ex-plo'sive (-sĭv), *a.* **1.** Pertaining to, characterized or operated by, or suited to cause, explosion; as, *explosive* force; an *explosive* engine.
2. Tending to explosion; as, an *explosive* temper.
3. *Phon.* Characterized in pronunciation by a slight explosion, or puff of breath, accompanying the release of a closure of some part of the oral passage; as, an *explosive* consonant. The stops *p, b, t, d, k, g* are often called *explosives* or *explodents,* although not necessarily accompanied by explosive action. See STOP, *n.*, 9.

explosive engine *or* **motor,** an explosion engine. — **e. gelatin,** a viscous explosive consisting essentially of nitroglycerin and soluble guncotton. Blasting gelatin is a variety. Military explosive gelatin contains a small proportion of camphor, which diminishes its sensitiveness.

ex-plo'sive, *n.* **1.** An explosive agent; a compound or mixture susceptible of explosive chemical reaction, as gunpowder or nitroglycerin. The chief classes of explosives are: (1) Mixtures of combustible but nonexplosive material with an oxidizing agent, esp. a nitrate or a chlorate (ordinary gunpowder, blasting powder, etc.). (2) Organic nitrates, as nitroglycerin (glycerin nitrate) or guncotton (cellulose nitrate); also, mixtures containing these, as dynamite. Dynamites are divided into two classes, according as the material used to absorb the nitroglycerin is inert or itself explosive. The smokeless powders contain cellulose nitrate as the sole or chief ingredient. (3) Nitro substitution products or mixtures containing these, as lyddite and rackarock. (4) Fulminating powders, as fulminate of mercury or hydrazoic acid, used as detonators. See also SPRENGEL EXPLOSIVE.
2. *Phon.* An explosive consonant; a stop.

ex-po'nent (ĕks-pō'nĕnt), *n.* [L. *exponens, -entis,* p. pr. of *exponere* to put out, set forth, expose. See EXPOUND.] **1.** *Alg.* A symbol written above another symbol and on the right, denoting how many times the latter is repeated as a factor; thus, a^2 means $a \times a$, b^3 means $b \times b \times b$, etc., 2 and 3 being the *exponents* of the 2d and 3d *powers.* A fractional *exponent,* or index, is used to denote the root of a quantity. Thus, $a^{\frac{1}{3}}$ denotes the third or cube root of a. Negative exponents denote division (of unity) by the corresponding symbols with positive exponents; thus $b^{-2} = \frac{1}{b^2}$, $ab^{-2} = \frac{a}{b^2}$. Irrational powers, as $a^{\sqrt{2}}$, are defined by converging series.
2. An expounder; explainer; interpreter, as of music.
3. One that stands as an index or representative; an exemplifier; as, he is the *exponent* of his party's principles.

ex-po'nent, *a.* Giving exemplification; explaining.
Nothing walks . . . or exists, which must not in turn arise and walk before him as *exponent* of his meaning. *Emerson.*

exponent proposition, *Logic,* a proposition giving explicit statement and correct logical form to one requiring restatement, called the *exponible proposition.*

ex'po-nen'tial (ĕks'pō-nĕn'shăl), *a.* Relating to exponents; involving variable exponents; as, an *exponential* expression, function, or calculus.

exponential calculus **a** That part of algebra which treats of exponents. **b** That part of infinitesimal calculus which deals with exponential functions. — **e. curve,** a curve defined by an exponential equation, as $y = ae^x$. — **e. series,** a series derived from the development of exponential expressions; specif., the fundamental expansion $e^x = 1 + \frac{x}{1} + \frac{x^2}{1.2} + \frac{x^3}{1.2.3} + \frac{x^4}{1.2.3.4} +$ *in infinitum,* absolutely convergent for all finite values of x. — **e. theorem,** *Math.,* the theorem expressed by the exponential series.

ex'po-nen'tial, *n. Math.* Any (constant) base, esp. the natural logarithmic base, e, affected with an exponent, generally variable, as e^x, bv.

ex-po'ni-ble (ĕks-pō'nĭ-b'l), *a.* [L. *exponere* to explain.] Requiring explanation, — in logic said esp. of propositions needing restatement. — *n.* An exponible proposition.

ex-port' (ĕks-pōrt'; *often* ĕks'pōrt, *esp. when contrasted with import;* 201), *v. t.;* EX-PORT'ED; EX-PORT'ING. [L. *exportare, exportatum; ex* out + *portare* to carry. See PORT demeanor.] **1.** To carry away; to remove. *Obs.*
[They] *export* honor from a man. *Bacon.*

2 An exposure, or revelation, of something discreditable.

Syn. — See EXPOSITION.

ex-posed' (ĕks-pōzd'), *p. a.* **1.** Open to view.
2. Unprotected, as from the weather, danger, etc.

—ex-pos'ed-ness (ĕks-pōz'ĕd-nĕs), *n.*

ex-pos'it (ĕks-pōz'ĭt), *v. t.;* EX-POS'IT-ED; EX-POS'IT-ING. [L. *expositus,* p. p. of *exponere* to set forth, expose.] To make a full revelation of; to exhibit; to show in detail.

ex'po-si'tion (ĕks'pō-zĭsh'ŭn), *n.* [F. *exposition,* fr. L. *expositio,* fr. *exponere, expositum.* See EXPOUND.] **1.** A setting forth of the meaning or purpose of a writing, discourse, or the like; an expounding of the sense or intent, as of a law; an interpretation, as of a parable.
You know the law; your *exposition*
Hath been most sound. *Shak.*
2. Hence: **a** The art or procedure of expository discourse; the art of presenting a subject matter in detail, apart from criticism, argument, or development; elucidation. **b** A treatise or part of a treatise which aims merely at elucidation, interpretation, or commentary. **c** Hence, a part of any composition, as of music or drama, in which the theme or subject is opened out.
3. Act or practice of exposing; exposure; abandonment, as of infants; display or exhibition, as of the Host.
4. Condition of being exposed, or conditions under which exposure is made; esp., situation with reference to the action of the sun or the winds, exposure.
5. A public exhibition or show, as of industrial and artistic productions; as, the Paris *Exposition* of 1878.

Syn. — EXPOSITION, EXPOSURE, EXPOSÉ. An EXPOSITION is a setting forth for purposes of explanation or display; an EXPOSURE is a laying bare, esp. to detrimental or injurious influences, or to reprobation or contempt; an EXPOSÉ is a formal *exposure.* See EXHIBITION, EXHIBIT.

ex-pos'i-tive (ĕks-pŏz'ĭ-tĭv), *a.* Descriptive; expository. **—ex-pos'i-tive-ly,** *adv.*

ex-pos'i-tor (-tĕr), *n.* [L.: cf. OF. *expositeur.* See EXPOUND.] One that expounds or explains; an expounder; a commentator. — **ex-pos'i-to'ri-al** (-tō'rĭ-ăl; 201), *a.*

ex-pos'i-to-ry (-tō-rĭ), *a.* **1.** Of, pert. to, or containing, exposition; serving to elucidate or interpret; exegetical.
A glossary or *expository* index to the poetical writers. *Johnson.*
2. *Logic.* Relating to an individual; having an individual or particular term as its middle term; as, an *expository* syllogism.

expository jurisprudence. See *Citation,* following.
Bentham, for instance, divided jurisprudence into "*expository,*" which ascertains what the law is, and "censorial," which ascertains what it ought to be. *T. E. Holland.*

‖ **ex post fac'to,** *or* ‖ **ex post'fac'to** (ĕks pōst'făk'tō). [L. *ex postfacto* from what is done afterwards. See POST-; FACT.] **1.** From, or by virtue of, an after act, or thing done afterwards.
2 *(Adjectively)* Done or made after a thing but retroacting upon it; retrospective; — used esp. in *ex post facto law.*

ex post facto law, in a general sense, any law, civil or criminal, enacted with a retrospective effect; in the constitutional law of the United States, only such a law relating to crime, that is, one which retroacts so as to materially alter the position of a person to his disadvantage with respect to the punishment of an act alleged to have been committed by him before the passing of the law, either by making it punishable in a manner different from what it was when the act was committed or by taking away from the substantial protection with which the then existing law had surrounded him. Such laws are prohibited by Art. I., sec. 9, par. 3 of the Constitution, and it has been decided that this prohibition cannot be evaded by giving a civil form to provisions that are in substance criminal. The British Parliament is not restricted from passing ex post facto laws.
One of the early justices [Samuel Chase] of the Supreme Court has classified *ex post facto laws* as follows: — "1. Every law that makes an action done before the passing of the law, and which was innocent when done, criminal, and punishes such action. 2. Every law that aggravates a crime, or makes it greater than it was when committed. 3. Every law that changes the punishment, and inflicts a greater punishment than the law annexed to the crime when committed. 4. Every law that alters the legal rules of evidence, and receives less or different testimony than the law required at the time of the commission of the offense, in order to convict the offender." [3 *Dall.* 386, 390.] And to these classes may be added: — 5. Every law which, assuming to regulate civil rights and remedies only, in effect imposes a penalty or the deprivation of a right for something which when done was lawful; and: 6. Every law which deprives persons accused of crime of some lawful protection to which they have become entitled; such as the protection of a former conviction or acquittal, or of a proclamation of amnesty. *T. M. Cooley.*

ex-pos'tu-late (ĕks-pŏs'tŭ-lāt), *v. i.;* -LAT'ED (-lāt'ĕd); -LAT'ING (-lāt'ĭng). [L. *expostulatus,* p. p. of *expostulare* to demand vehemently, *ex* out + *postulare* to ask, require. See POSTULATE.] **1.** To complain; to talk earnestly. *Obs.*
2. To reason earnestly with a person on some impropriety of his conduct, representing the wrong he has done or intends, and urging him to make redress or to desist; to remonstrate; — usually followed by *with.*
Men *expostulate* with erring friends; they bring accusations against enemies who have done them a wrong. *Jowett (Thuc.).*

Syn. — See REMONSTRATE.

ex-pos'tu-late, *v. t. Obs.* **1.** To demand; to call for.
2. To discuss; examine; also, to complain of.

Find cause in Cæsar *Shak.*

7. To hold out or reach forth, as the arm or hand.

8. To hold out as a gift or offering; to proffer or to bestow; as, to *extend* sympathy or help.

9. To increase in quantity by weakening or adulterating additions; as, to *extend* liquors.

10. *Law.* **a** In Great Britain, to assess or value; specif., to value the lord's rights in (a manor) by an extent. **b** To take, assign, or levy upon by, or in execution of, a writ of extent; to levy upon.

11. To take by force or authority; to seize. *Obs.*

Syn. — Increase, enlarge, expand, widen, diffuse.

ex-tend', *v. i.* **1.** To stretch or stretch out; to spread or spread out; to reach; to be broad or comprehensive.

2. Of a horse, to move at full stride, as in speeding.

ex-tend'ed (ĕks-tĕn'dĕd), *p. a.* **1.** Stretched, spread, or drawn out.

2. Hence: Having spatial character; having extension.

Everything depends on what we conceive the soul to be, an *extended* or an unextended entity. *Wm. James.*

3. *Law.* Valued; assured; levied upon.

extended cadence. See under CADENCE, 3. — **e. insurance**, insurance for the full face of a policy on which payments are stopped, granted for an additional period in consideration of retaining part or all of the cash surrender value of the policy. If the insured dies within the period the policy is paid in full; if he survives it the insurance ceases by expiry. — **e. order**, *Mil. & Nav.*, arrangement of troops or ships in line with greater intervals between units than in regular formation, as for skirmishing, or, in modern warfare, for charging by infantry. — **e. point transformation**, *Math.*, a general infinitesimal operation affecting all five of the variables x, y, z, p, q (where x, y, z, are coördinates of a point of a surface element, and p, q, —1 the direction cosines of its normal). A point transformation may be still further extended by inclusion of higher derivatives. — **e. type**, *Print.*, type considerably wider than the standard for the same height. See TYPE.

☞ **This is extended type.**

ex-ten'si-ble (ĕks-tĕn'sĭ-b'l), *a.* [Cf. F. *extensible*. See EXTEND.] **1.** Capable of being extended, whether in length or breadth; susceptible of enlargement. "An *extensible* membrane." *Holder.*

Against thy peace *Shak.*

7. Space or amount to which a thing is extended; hence, superficies; compass; bulk; size; length; as, an *extent* of country or line; *extent* of information or charity; specif., *Zoöl.*, the distance from tip to tip of the extended wings.

Life in its large *extent* is scarce a span. *Cotton.*

8. Degree; measure; proportion. "The *extent* to which we can make ourselves what we wish to be." *Lubbock.*

9. *Logic.* Extension; extension considered as a characteristic or function.

In a general way, of course, all writers are agreed that intent looks to the number and nature of the attributes involved in a term, just as *extent* does to those of the individual objects referred to by the term. *John Venn.*

10. Act of bestowing, granting, etc. *Obs:*

11. Increase; extension. *Obs.*

12. *Math.* Continuous magnitude, esp. geometrical, of any number of dimensions, as a line, surface, space; a spread. An extent of n dimensions is called an *n extent*. Closed extents in any higher extent separate the dual extents of that extent into two classes, *exterior* and *interior*. Any extent complementary to the closed extent, and not cutting it, may be moved into any *exterior* dual extent, never cutting the closed extent; or may be there reversed by turning through 180°, and brought back to its first place. But this could not be possible in case of an *interior* extent.

ex-ten'u-ate (ĕks-tĕn'ū-āt), *v. t.*; -AT'ED (-āt'ĕd); -AT'ING (-āt'ĭng). [L. *extenuatus*, p. p. of *extenuare* to make thin, loosen, weaken; *ex* out + *tenuare* to make thin, *tenuis* thin. See TENUITY.] **1.** To make thin; to attenuate. *R.*

2. To diminish; lessen; weaken.

In friendship the individual element is intensified, in fraternity it is *extenuated*. *W. C. Brownell.*

3. To underestimate or underrate; to treat as of small importance; hence, *Obs.*, to disparage or depreciate.

Who can *extenuate* thee? *Milton.*

4. Hence, to treat or represent (a crime, fault, ill, or the like) as less than it appears to be; to palliate or excuse; also, to serve as excuse or palliation.

Nothing *extenuate*
Nor set down aught in malice. *Shak.*

external affairs, *Australian Const. Law,* affairs outside of the Commonwealth placed under the control of the Parliament by sec. 51, subsec. xxix. of the Constitution.

The expression "*external affairs*" is apparently a very comprehensive one, but it has obvious limitations. As already pointed out, it can hardly be intended to confer extraterritorial jurisdiction; where that is meant, as in other subsections, it is distinctly expressed. . . . This power may therefore be fairly interpreted as applicable to (1) the external representation of the Commonwealth by accredited agents where required; (2) the conduct of the business and the promotion of the interests of the Commonwealth in outside countries; and (3) the extradition of fugitive offenders from outside countries. *Quick & Garran.*

—e. angle. = EXTERIOR ANGLE. — **e.-combustion engine,** *Mach.,* a heat engine which derives its heat from fuel consumed outside the engine cylinder. The steam engine is the principal type. Cf. ex-ter'ri-to'ri-al'i-ty (-ăl'ĭ-tĭ), *n.* Quality or state of being exterritorial. See EXTRATERRITORIALITY; also *Cit.*, below.

Exterritoriality is a term of international law, used to denominate certain immunities from the application of the rule that every person is subject for all acts done within the boundaries of a state to its local laws. It is also employed to describe the quasi-extraterritorial position, to borrow the phrase of Grotius, of the dwelling place of an accredited diplomatic agent, and of the public ships of one state while in the waters of another. Latterly its sense has been extended to all cases in which states refrain from enforcing their laws within their territorial jurisdiction. *Encyc. Brit.*

ex-tinct' (-tĭŋkt'), *a.* [L. *extinctus, exstinctus,* p. p. of *extinguere, exstinguere.* See EXTINGUISH.] **1.** Extinguished; put out; quenched; as, the fire is *extinct;* an *extinct* volcano; life is *extinct;* also, *Obs.*, dead, as a person.

OSlav. *oko*, Lith. *akis*, L. *oculus*, Gr. ὄκκος eye, ὄσσε the two eyes, Skr. *akshi*. Cf. DAISY, OCULAR, OPTIC, EYELET, OGLE, WINDOW.]
1. The organ of sight or vision. The essential parts of the human eye form a nearly spherical mass, the *eyeball*, contained in a bony concavity of the skull, the *orbit*, in which it is movable by means of four *recti* and two *oblique* muscles. The eyeball has a tough fibrous capsule called the *sclerotic*, which in front, where the light enters, changes to a transparent membrane, the *cornea*. Within the eyeball, behind the cornea, there is an opaque muscular partition or diaphragm, the *iris*, with a central opening, the *pupil*. This can be contracted and expanded to regulate the amount of light admitted. The sclerotic and iris are lined internally by a very vascular pigmented coat, the *choroid*, and this in turn by the *retina* (which see), or sensitive membrane, whose stimulation results in the visual sensation. The retina is connected with the brain by the optic nerve. The light is focused on the retina (forming an image of the objects in the field of view) by the *crystalline lens*, which is hung just behind the pupil by the *suspensory ligament*. The lens is an elastic transparent biconvex body composed of rodlike cells. By changes in its convexity *accommodation* (which see) for vision at different distances is chiefly effected. (See also CILIARY BODY, CILIARY MUSCLES.) The lens and its suspensory ligament completely divide the eyeball into two *chambers*, the *anterior* containing a watery fluid, the *aqueous humor*, the *posterior*, which is much the larger, the jellylike transparent *vitreous humor*. The eyeball is protected by the upper and lower lids (see EYELID). These are lined internally with a mucous membrane, the *conjunctiva*, which is also reflected over, and covers the exposed part of, the eyeball, forming a transparent epithelium over the cornea. Other important accessory parts are the lachrymal and Meibomian glands for moistening and lubricating the conjunctiva. The eyes of the other vertebrates, except *Amphioxus*, which has a single median organ of the simplest type, conform to the human type, though differing more or less in the shape of the eyeball, the arrangement of the accessory parts, etc. In development most of the structures arise from the mesoblast, but the lens is formed from an ingrowth of the external epithelium of the head, and the retina from an outgrowth of the brain. Both these parts are therefore epiblastic, as is also the epithelium of the conjunctiva. In invertebrates the eyes, if present, are found in varying numbers, situations, and degrees of development. They vary from simple spots of sensitive pigmented cells connected with the nervous system, by which nothing more than the perception of light and darkness can be possible, to organs of considerable complexity, having a well-formed lens capable of forming a more or less distinct image. In arthropods *compound eyes* (see under COMPOUND) often occur in addition to small simple eyes. Of all invertebrates, the cephalopods have the most perfect eyes. In many respects they strikingly resemble those of vertebrates. See also PINEAL GLAND, OCELLUS, OPTIC VESICLES, VISION.

2. With reference to the function of the eye: **a** The faculty of seeing; vision; as, to be blessed with a keen *eye*; often, a developed or highly trained visual perception; visual aptitude or discernment, as, the *eye* of a sailor; an *eye* for the beautiful. **b** The action or an act of seeing, look; glance; gaze; regard; as, to see with a jealous *eye*; to make *eyes* at one. **c** Specif., a close or attentive regard; close observation; hence, oversight; watch; inspection. "Keep *eyes* upon her." *Shak.* **d** The field or range of vision; that which is within view; view; sight; as, the accident occurred in the *eye* of the whole audience.

fa'bler (fā'blẽr), *n.* A teller of fables; a fabulist.

‖**fa'bli'au'** (fä'blē'ō'), *n.*; *pl.* FABLIAUX (*E.* -ōz'). [F., fr. OF. *fablel*, nom. sing. and acc. pl. *fabliaus*, dim. of *fable* a fable.] *Fr. Lit.* One of a kind of short metrical tales composed, chiefly in the 12th and 13th centuries, by the trouvères and told for amusement merely. They are usually comic and satirical and frankly coarse, and are often cynical, esp. in their treatment of women; they throw light, however, on the state of society and the manner of everyday life. Such are the fabliaux proper, from which Boccaccio and other Italian taletellers, Chaucer, and Molière got directly or indirectly some of their material.

fa'bling (fā'blĭng), *n.* Act of fabling; romancing; lying.

fab'ric (făb'rĭk), *n.* [L. *fabrica* fabric, workshop: cf. F. *fabrique* fabric. See FORGE.] **1.** A building; framework; structure.

Anon out of the earth a *fabric* huge
Rose like an exhalation. *Milton.*

6. The material of which a fabric is made. *Rare.*

7. A place where anything is made; a factory. *Rare.*

8. *Petrog.* The appearance or pattern produced by the shapes and arrangement of the crystal grains or of these with glass, in an igneous rock. It is one of the features of rock texture.

fab'ric (făb'rĭk), *v. t.*; FAB'RICKED (-rĭkt); FAB'RICK-ING. To frame; build, construct. *Obs.*

fab'ri-cant (făb'rĭ-kănt), *n.* [F., or L *fabricans*, p. pr.] One who fabricates, or makes, anything; a manufacturer.

fab'ri-cate (-kāt), *v. t.*; FAB'RI-CAT'ED (-kāt'ĕd), FAB'RI-CAT'ING (-kāt'ĭng). [L. *fabricatus*, p. p. of *fabricari, fabricare*, to frame, build, forge, fr. *fabrica*. See FABRIC, FORGE.] **1.** To form into a whole by uniting parts; to frame; construct; build; as, to *fabricate* a bridge or ship, to *fabricate* a book. *Archaic.*

2. To form by art and labor; to manufacture; produce, as, to *fabricate* woolens.

3. To invent (a fiction, legend, etc.); to forge; to devise falsely; as, to *fabricate* a lie or story.

Syn. — See FASHION.

fab'ri-ca'tion (-kā'shŭn), *n.* [L. *fabricatio*: cf. F. *fabrication*.] **1.** Act of fabricating, framing, or constructing; construction; manufacture; invention; forging; as, the *fabrication* of a bridge, a church, a government, a fiction.

2. That which is fabricated; specif., a falsehood, as, the story is doubtless a *fabrication*.

Syn. — See FICTION.

fab'ri-ca'tor (făb'rĭ-kā'tẽr), *n.* [L.] **1** One who constructs, makes, or fashions something.

The *fabricator* of the works of Ossian. *Mason.*

2. One who invents a false statement or commits forgery.

fab'rile (făb'rĭl), *a.* [L. *fabrilis*, fr. *faber* workman: cf. OF. *fabrile*. See FORGE.] Pert. to a workman, or to work in stone, metal, wood, etc.; as, *fabrile* skill. *Obs. or R.*

fab'u-lar (făb'ū-lär), *a.* [L. *fabularis.*] Like, or pertaining to, a fable.

fab'u-list (-lĭst), *n.* [Cf. F. *fabuliste*, fr. L. *fabula*. See FABLE.] **1.** One who invents or writes fables.

2. A professional teller of tales. *Obs.*

3. An inventor of falsehoods.

fab'u-los'i-ty (-lŏs'ĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [L. *fabulositas*: cf. F. *fabulosité*.] **1.** Fabulousness; fictitiousness; fondness for telling fables. *Obs. or R.*

2. A fabulous or fictitious story; a fable.

fab'u-lous (făb'ū-lŭs), *a.* [L. *fabulosus*: cf. F. *fabuleux*. See FABLE.] **1.** Fond of telling or hearing fables. *Obs.*

2. Feigned, as a story or fable; related in fable; based on fable; devised; invented; not real, fictitious; mythical; legendary; as, a *fabulous* description, a *fabulous* hero.

The *fabulous* birth of Minerva. *Chesterfield*

3. Like a fable, esp. in exaggeration; passing belief; absurd; astonishing; as, a *fabulous* price. *Macaulay.*

Syn. — FABULOUS, MYTHICAL, APOCRYPHAL are here compared in their secondary senses (see TRADITIONAL). FABULOUS, in modern usage, connotes that which is incredible, or beyond sober reality; as, "*fabulous* dividends" (*Thackeray*); *fabulous* wealth. MYTHICAL is often used euphemistically for that which is feigned or nonexistent; as, the *mythical* Mrs. Harris, a somewhat *mythical* tale. APOCRYPHAL adds to *mythical* the implication of spuriousness or sham; as, "*apocryphal* gold mines" (*Froude*); "The account is false, and the pretended extract from the letter may be itself *apocryphal*, for its authenticity is guaranteed by no external testimony" (*W. Elwin*). See IMAGINARY, VISIONARY, ARTIFICIAL, FICTION.

fabulous age, that period in the history of a nation of which the only accounts are myths and legends.

— **fab'u-lous-ly,** *adv.* — **fab'u-lous-ness,** *n.*

9. *Math. & Cryst.* Any one of the plane surfaces that bound a polyhedron or other geometrical solid or a crystal; as, a cube has six *faces*.

10. The acting surface, esp. of a tool or implement. Specif.: **a** The edge of a cutting implement, as of a knife. **b** The striking surface of the head, of a hammer, a mallet, a golf club, etc. **c** The grinding surface of a molar tooth. **d** The upper surface of an anvil.

11. *Mech.* **a** The principal dressed surface, as of a plate, disk, or pulley; the principal flat surface of a part or object. **b** That part of the acting surface of a cog, in a cogwheel, which projects beyond the pitch line. **c** The width of a pulley, or the length of a cog from end to end; as, a pulley or cogwheel of ten inches *face*. **d** The sole of a carpenter's plane.

12. *Astrol.* One third of a zodiacal sign, or ten degrees of longitude. *Chaucer.*

13. *Print.* **a** The upper or printing surface of a type, plate, etc. **b** The style or cut of type. See TYPE.

14. *Mining.* **a** The end or wall of the tunnel, drift, or excavation at which work is progressing or was last done; breast. See MINE, *Illust.* **b** The principal cleavage plane at right angles to the stratification. Cf. SLINE. *Raymond.*

15. *Bookbinding.* The front edge of a book.

16. The exact amount expressed on a note or other paper creating a pecuniary liability without any addition for interest or reduction for discount; as, the *face* of a judgment is the sum for which it was rendered and entered.

17. *Steam Engine.* **a** = CYLINDER FACE. **b** The flat part of a slide valve that works on the cylinder face.

18. *Ordnance.* A terminal plane perpendicular to the axis of the bore of a gun, — called **face of the piece** at the muzzle and **face of the breech** at the breech.

19. *Fort.* **a** The portion of a work forming one side of a salient angle. **b** The front between two neighboring bastions or other salient works.

20. *Mil.* One of the sides of a formation, esp. of a square.

Syn. — FACE, COUNTENANCE, VISAGE, PHYSIOGNOMY. FACE is the simple and direct word; COUNTENANCE has more elevated connotations, and frequently retains the implication of looks or expression; as, "To feel the fog in my throat, the mist in my *face*" (*R. Browning*); "Was this the *face* that launched a thousand ships and burnt the topless towers of Ilium?" (*Marlowe*); "Beholding the bright *countenance* of truth in the quiet and still air of delightful studies" (*Milton*); "Poetry . . . is the impassioned expression which is in the *countenance* of all Science" (*Wordsworth*). VISAGE is now chiefly poetical; it often emphasizes the outward appearance of the face; as, "I saw Othello's *visage* in his mind" (*Shak.*); "his *visage* all agrin as at a wake" (*Tennyson*). PHYSIOGNOMY denotes the face esp. as the expression of the mind or disposition; fig. it is applied to the significant aspect of even inanimate things; as, "Nor is there in the *physiognomy* of the people the slightest indication of the Gaul" (*Landor*); "Poetry . . . interprets by expressing with magical felicity the *physiognomy* and movement of the outward world" (*M. Arnold*); "Little details gave each field a particular *physiognomy*, dear to the eyes that have looked on them from childhood" (*G. Eliot*).

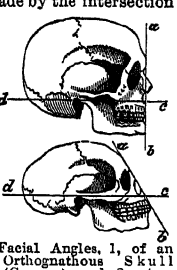
fa'cial (fā'shăl; 277), *a.* [LL. *facialis*, fr. L. *facies* face: cf. F. *facial*.] **1.** *Theol.* Face to face; open. *Obs.*
2. Of or pert. to the face; as, the *facial* artery or nerve.
3. Of or pertaining to the surface or face of anything.

facial angle, *Craniom.*, the angle made by the intersection of the axis of the face with the axis of the skull. In general, the wider the angle the higher intellectually is the type of man. The facial angle is variously formed: That of Camper by the intersection of a line through the most prominent points of the forehead and the alveolar arch with one through the auricular point and the acanthion. Those of Cloquet, Cuvier (also, St. Hilaire), and Jacquart, by the junction at the alveolar point, at the tip of the incisors, and at the acanthion, respectively, of lines drawn from the auricular point and the most prominent point of the forehead. The junction of the auriculo-infra-orbital plane with a line from the ophryon to the alveolar point forms the German facial angle. The junction of the alveolocondylean plane with a line from the intersuperciliary point to the most prominent point of the lower face forms that of Topinard. The angle showing alveolar or subnasal prognathism is by many anthropologists considered a more accurate criterion than any of the above. It is formed by the junction at the alveolar point of the alveolocondylean plane and a line passing through the acanthion. (For points named, see CRANIOMETRY, *Illust.*) Cf. GNATHIC INDEX. — **f. artery,** *Anat.*, a branch of the external carotid which runs up along the side of the face and nose, crossing outside the lower jawbone. Its course is very tortuous, to permit of the movements of the jaw and cheeks. See also TRANSVERSE FACIAL ARTERY. — **f. axis,** *Craniom.*, the axis corresponding to a line extending from the alveolar point to the juncture of the ethmoid and sphenoid bones. — **f. bones,** *Anat.*, the bones of the facial region of the skull which do not take part in forming the brain case. In man there are fourteen: two nasals, superior maxillaries, lachrymals, malars, palatines, and inferior turbinals, one vomer, and one inferior maxillary. — **f. diameter,** *Craniom.*, a diameter between homologous points on the face. — **f. disk** (of owls). See DISK, 5, and OWL. — **f. index,** *Craniom.*, the ratio of the breadth of the face to its length, usually expressed in hundredths of the latter. The diameter chosen for the breadth is usually the bizygomatic. The length taken is usually that from the ophryon to the gnathion, or from the nasion to the gnathion. When only the superior portion of the face is measured the alveolar point replaces the gnathion. — **f. line,** *Craniom.*, as used by Camper, the line touching the most prominent parts of the upper and lower face; among the Germans, the line from the ophryon to the alveolar point; by Topinard, the line from the intersuperciliary to the most prominent point on the lower face. — **f. nerve,** *Anat.*, one of the seventh pair of cranial nerves (in the old nomenclature known as the *portio dura* of the seventh nerve). The facial nerve of each side leaves the cranium by the internal auditory meatus, passes through the aqueduct of Fallopius, and comes out at the stylomastoid foramen. It is the motor nerve of the muscles of the face, governing its expression. — **f. vein,** *Anat.*, the vein which accompanies the facial artery, lying behind it and following a somewhat straighter course. It is a continuation of the angular, and after uniting with the anterior division of the temporo-maxillary vein, forming a trunk called the *common facial vein*, joins the internal jugular. See also TRANSVERSE FACIAL VEIN.



Facial Angles, 1, of an Orthognathous Skull (Camper) and, 2, of a Prognathous Skull. *a b* Axis of the Face; *c d* Axis of the Skull.

fa'ci-end (fā'shĭ-ĕnd), *n.* [From neut. of L. *faciendus*, gerundive of *facere*.] *Math.* Multiplicand. See FACIENT, 2.

fa'cient (fā'shĕnt), *n.* [L. *faciens, -entis*, p. pr. of *facere* to make, do. See FACT.] **1.** One who does anything; a doer; an agent. *Rare.*
2. *Math.* **a** One of the variables of a quantic as distinguished from a coefficient. **b** The multiplier. The terms *facient*, *factend*, and *factum* may imply that the multiplication involved is not ordinary multiplication, but is either some specified operation, or, in general, any mathematical operation. See MULTIPLICATION.

-fa'cient (-fā'shĕnt). [See FACIENT.] A suffix signifying *making, causing*; as, somni*facient*, sorbe*facient*, etc.

fa'ci-es (fā'shĭ-ēz), *n.* [L., form, face. See FACE.] The face; hence, general aspect; specif., *Biol.*, the general aspect or habit of a species, or group of species.

fac'ile (făs'ĭl), *a.* [L. *facilis*, prop., capable of being done or made; hence, facile, easy, fr. *facere* to make, do. cf. F. *facile*. See FACT; cf. FACULTY.] **1.** Easy to be done or performed; not difficult; performable or attainable with little labor.
Order . . . will render the work *facile* and delightful. *Evelyn.*
2. Easy to be surmounted, removed, or mastered.
The *facile* gates of hell too slightly barred. *Milton.*
3. Easy of access or converse; mild; courteous; not haughty, austere, or distant; affable; complaisant.
I meant she should be courteous, *facile*, sweet. *B. Jonson.*
4. Easy to understand. *Obs.*
5. Easily persuaded to good or bad; yielding; ductile to a fault; pliant; flexible.

fa-cil'i-ta'tor (-tā'tẽr), *n.* One that facilitates.

fa-cil'i-ty (-tĭ), *n.*; *pl.* -TIES (-tĭz). [L. *facilitas*, fr. *facilis* easy: cf. F. *facilité*. See FACILE.] **1.** Quality of being easily performed; freedom from difficulty; ease.
The *facility* with which government has been overturned in France. *Burke.*
2. Ease in performance; readiness proceeding from skill or use; dexterity; as, practice gives a wonderful *facility*.
3. Easiness to be persuaded; readiness or compliance; — usually in a bad sense; pliancy. Used specif. in Scots law of such compliancy as will justify legal intervention to protect against imposition or circumvention.
It is a great error to take *facility* for good nature. *L'Estrange.*
4. Easiness of access; complaisance; affability. *Obs. or R.*
5. That which promotes the ease of any action, operation, transaction, or course of conduct; advantage, aid; assistance; — usually in *pl.*; as, special *facilities* for study.
6. Flexibility. *Rare.*
7. Indifference; careless ease. *Obs.*
Syn. — Easiness, address, expertness, dexterity, skill. — FACILITY, EASE, READINESS agree in the idea of freedom from effort. FACILITY, though sometimes used in a derogatory sense (as, fatal *facility* in composition; "His *facility* in language has been fatal only too often to his logic and philosophy"), more frequently than EASE expresses the power, proceeding from practice and use, of performing an act or dispatching a task with lightness and address. But *facility* and *ease* are often interchanged. READINESS lays stress on the quickness or promptitude with which anything is done; as, his *readiness* in repartee, the *readiness* with which he could apply his knowledge. See SKILLFUL, DEXTEROUS.
It is scarce necessary to remind you that there are two very different kinds of *ease*: the *ease* that comes from the facing, the conquest of a difficulty, and the *ease* that comes from the vague dodging of it. In the one case you gain *facility*, in the other case you get mere looseness. *H. James.*

fac'ing (fās'ĭng), *n.* **1.** A covering in front, for ornament or other purposes; an exterior covering or sheathing; as, the *facing* of an earthen slope, sea wall, building, etc., to strengthen it or to protect or adorn the exposed surface.
2. A lining placed near the edge of a garment for ornament or protection.
3. *Founding.* A powdered substance, as charcoal, bituminous coal, etc., applied to the face of a mold, or mixed with the sand that forms it, to give a fine smooth surface to the casting.
4. *pl. Mil.* The collar, cuffs, and trimmings of a military coat. They are commonly of a color different from that of the coat and indicate the arm of the service to which the uniform belongs.
5. Any material used for facing.
6. *Chiefly pl. Mil.* The turning movement of a soldier so as to face in a given direction; as, to put recruits through their *facings*.

DO, FEAT, AFFAIR, BENEFIT, DEFECT, FASHION, -FY.] **1.** A thing done; a deed; including: **a** An action; action in general; conduct. *Obs. or R.* **b** A meritorious or valorous deed; an exploit. *Obs.* "He who most excels in *fact* of arms." *Milton.* **c** A wrong or unlawful deed; a crime. *Obs.*, except in "accessories after the *fact*," etc. **2.** A doing, making, preparing, or performing. In this sense *in the fact* is equivalent to *in the act*. *Obs.*

A project for the *fact* and vending
Of a new kind of tucus paint for ladies. *B. Jonson.*

3. An actual happening in time or space; any event, mental or physical; an occurrence, quality, or relation, the reality of which is manifest in experience or may be inferred with certainty; as, the *fact* of present pain; the *fact* of the discovery of America. *Fact* in its primary meaning, as an object of direct experience, is distinguished from *truth*.

Facts are stubborn things *Smollett (Gil Blas).*

A certain physical *fact*, which is called the sun's presence (and which, in the ultimate analysis, resolves itself into sensations, not ideas), causes another physical *fact*, which is called day. *J. S. Mill.*

4. The quality or character of being actual or of being made up of facts; actuality; often, specif., physical actuality or practical experience as distinguished from imagination, speculation, theory, etc.; as, the realm of *fact* is distinct from fancy; a question of *fact*, that is, of actual evidence rather than hypothesis.

The semblance of two regions, one pure *fact*, the other pure fancy, one all science, the other all nescience, is just the error I have been trying to expose. *James Ward.*

5. The assertion or statement of a thing done or existing; sometimes, loosely, by a transfer of meaning, the thing supposed (even though falsely) to be done or to exist; a thing supposed or asserted to be done; as, his *facts* are false.

I do not grant the *fact*. *De Foe.*

6. *Law.* Specif.: Usually in *pl.* Any of the circumstances or matters of a case as they are alleged to be; also, that which is of actual occurrence; reality as an event or events. In this latter sense *fact* is often distinguished, in legal usage, from *law;* the distinction being between the reality of events or things the actual occurrence or existence of which is to be determined by evidence, and the legal effect of the occurrence or existence of such events or things as determined by the judicious application of the rules and principles of law. In general, questions of fact are for the jury, questions of law for the court. **A fact, or matter, in issue,** in legal procedure, is one raised by the pleadings and directly and necessary to be determined by the decision, so that it will become res adjudicata; and it is distinguished from a **fact,** or **matter, in controversy,** which is any other fact collateral to the issue and controverted between the parties, such as evidential facts merely furnishing a basis for the verdict.

in fact, in reality.

fac'tion (făk'shŭn), *n.* [L. *factio* a doing, a company of persons acting together, a faction. cf. F. *faction.* See FACT, FASHION.] **1.** An action; behavior; conduct; act; deed. *Obs.*

fac'tion-al (făk'shŭn-ăl), *a.* Of or pertaining to a faction; characterized by faction.

fac'tion-a-ry (-ă-rĭ), *a.* [Cf. F. *factionnaire*, L. *factionarius* the head of a company of charioteers.] Of or pertaining to a faction; partisan; taking sides. *Rare.*

fac'tion-ist, *n.* One who promotes or engages in faction.

fac'tious (făk'shŭs), *a.* [L. *factiosus:* cf. F. *factieux.*] **1.** Given to faction; addicted to form parties or factions and raise dissensions; seditious.

The *factious* man is apt to mistake himself for a patriot. *Berkeley.*

2. Pertaining to faction; proceeding from, or characterized by, faction. "*Factious* fury." *Burke.*

Syn. — FACTIOUS, SEDITIOUS. FACTIOUS (see *faction*, under COMBINATION) suggests the contentious, perverse, or turbulent exercise of party spirit; SEDITIOUS (see SEDITION) implies a treasonable stirring up of discontent or opposition to the government; as, "Florence . . . sowing the wind and reaping the whirlwind, wearing her soul out by *factious* struggles" (*Mrs. Oliphant*); "A *seditious* preacher, who affected low popularity, went about the country, and inculcated on his audience . . . the tyranny of artificial distinctions, and the abuses which had arisen from . . . the aggrandizement of a few insolent rulers" (*Hume*).

— fac'tious-ly, *adv.* **— fac'tious-ness,** *n.*

fac-ti'tious (făk-tĭsh'ŭs), *a.* [L. *facticius*, fr. *facere* to make. See FACT; cf. FETISH.] **1.** Made by art, in distinction from what is produced by nature; artificial; sham. **2.** Produced by special or unusual causes, — said of alluvial soil, volcanic islands, etc. *Obs. or R.* **3.** Formed by, or adapted to, an artificial or conventional, in distinction from a natural, standard or rule; not natural; a *factitious* taste; a *factitious* value.

Syn. — FACTITIOUS, UNNATURAL. That is UNNATURAL which departs in any way from a normal state or condition; that is FACTITIOUS (see ARTIFICIAL) which is brought about or wrought up by labor and effort; as, an *unnatural* demand (one which exceeds the ordinary rate of consumption), a *factitious* demand (one created by active exertions for the purpose); *unnatural* excitement, *factitious* excitement.

1. Inward acceptance of a personality as real and trustworthy, of an idea as true and obligatory, or of a thing as beneficial, as, *faith* in God; *faith* in one's friend; *faith* in the moral law; *faith* in medicine. The word had originally a religious sense, and in its various uses generally retains a suggestion of emotional or practical quality.

2. The recognition of spiritual realities and moral principles as of paramount authority and supreme value.

> And now abideth *faith*, hope, charity, these three; but the greatest of these is charity. 1 *Co.* xiii 13.

3. *Theol.* **a** *Historical faith*, or belief in the truthfulness and authority of the Scriptural narrative and teachings. **b** *Saving*, or *practical, faith*, or the acceptance by the intellect, affection, and will of God's favor extended to man through Christ.

> *Faith* is a Divine virtue by which we firmly believe the truths which God has revealed. *Catechism of R. C. Ch.*
>
> We shall now have a full definition of *faith* if we say that it is a firm and sure knowledge of the divine favor to us, founded on the truth of a free promise in Christ, and revealed to our minds and sealed in our hearts by the Holy Spirit. . . . That assent itself is more a matter of the heart than the head, of the affection than the intellect. *Calvin's Institutes.*

4. That which is believed; esp., a system of religious beliefs; as, the Jewish *faith;* the Mohammedan *faith.*

> Now preacheth the *faith* which once he destroyed. *Gal.* i 23.

5. Assurance; authority; credit; credibility. *Rare.*

1. a In old usage, any of various hawks trained for, or adapted for use in, the sport of hawking, or falconry, esp. the peregrine falcon (*Falco peregrinus*); — restricted in the technical language of that sport to female birds. The long-winged hawks, or true falcons in the modern sense (see below), were distinguished as *noble* falcons; the short-winged, or ordinary hawks, as *ignoble.* **b** In present usage, any of various hawks distinguished by their long wings, by having a distinct notch and tooth (or sometimes two teeth) on the edge of the upper mandible, where it begins to bend down, and by their manner of hunting, usually plunging down on their prey from above. Though some of the species are very small, and none are of more than medium size, they are very courageous and represent the highest type of birds of prey. The falcons constitute a subfamily, **Fal'co-ni'næ** (făl'kŏ-nī'nē), which some writers divide into a large number of genera, though others include most of them in the typical genus *Falco.* Among the familiar kinds of falcons are the peregrine, gyrfalcons, hobby, merlin, kestrels, etc. Formerly the genus *Falco* included most of the hawk family; hence in old ornithological works the term *falcon* was also applied in a broader sense.

2. That which is false; a falsehood; a lie; an untruth.
Men often swallow *falsities* for truths. *Sir T. Browne.*

Syn. — FALSITY, FALSENESS, FALSEHOOD, LIE, UNTRUTH, MENDACITY. FALSITY and FALSENESS both express lack of conformity to truth; but *falsity* may or may not suggest blame, *falseness* (sometimes a synonym for *faithlessness*) commonly does; as, the truth or *falsity* of a report; "so ignorant of any *falsity* or cruelty or vulgarity as never to have been touched by them" (*H. James*); "folly and *falseness* both in one" (*Waterland*); Cressida's *falseness*. A FALSEHOOD is a false declaration designedly made; a LIE (a term of extreme opprobrium) is a gross falsehood; an UNTRUTH (sometimes euphemistic for *falsehood* or *lie*) may arise from ignorance or misconception, as well as from intent to deceive; the word is sometimes used (like *falseness*) in the sense of *unfaithfulness;* as, "Mr. Bulstrode shrank from the direct *falsehood* of denying true statements" (*G. Eliot*); "Who . . . tweaks me by the nose? gives me the *lie* i' the throat, as deep as to the lungs? " (*Shak.*); "I am a most veracious person, and totally unacquainted with *untruth*" (*Shelley*); "too wholly true to dream *untruth* in thee" (*Tennyson*). MENDACITY is habitual lying; as, "Nothing is more revolting in the queen, but nothing is more characteristic, than her shameless *mendacity*. It was an age of political lying, but in the profusion and recklessness of her *lies* Elizabeth stood without a peer in Christendom. A *falsehood* was to her simply an intellectual means of meeting a difficulty" (*J. R. Green*). See DECEIT, EQUIVOCATE.

Fal'staff, Sir John (fôl'stăf). A character in Shakespeare's "Merry Wives of Windsor," and in the First and Second Parts of "King Henry IV." In the former play he is represented as attempting to seduce Mrs. Ford and Mrs. Page, who make a butt and a dupe of him; in the latter he figures as a soldier and a wit; in both he is exhibited as fat, sensual, and cowardly, but with wonderful resources of wit and impudence.

Fal-staff'i-an (fôl-stăf'ĭ-ăn), *a.* Like, or characteristic of, Shakespeare's Sir John Falstaff; also, like the regiment of ragged rapscallions formed by him. See FALSTAFF.

fal'ter (fôl'tẽr), *v. i.;* FAL'TERED (-tẽrd); FAL'TER-ING. [ME. *falteren, faltren*, of uncertain origin; cf. Icel. *faltrask* to be cumbered, to be puzzled.] **1.** To move unsteadily or waveringly; as: **a** To stumble; tremble; totter; be unsteady. "He found his legs *falter*." *Wiseman.*
b To hesitate; to speak brokenly or weakly; to stammer; as, his tongue *falters*. "*Faltering* speech." *Milton.* **c** To hesitate in purpose or action; to waver; flinch; give way; as, his courage *faltered*.
Ere her native king
Shall *falter* under foul rebellion's arms. *Shak.*
d To move waveringly or unsteadily as if uncertain.
Falling leaves *falter* through motionless air. *Lowell.*
2. To fail in distinctness or regularity of exercise; — said of the mind or of thought.
Here indeed the power of distinct conception of space and distance *falters*. *J. Taylor.*
Syn. — See HESITATE.

fal'ter, *v. t.* To utter with hesitation, or in a broken, trembling, or weak manner; as, to *falter* an excuse.
And here he *faltered* forth his last farewell. *Byron.*

fal'ter, *n.* [See FALTER, *v. i.*] An uncertain or broken sound; a quaver; unsteadiness; as, a *falter* in her voice.
The *falter* of an idle shepherd's pipe. *Lowell.*

fa-mil'i-a (*fa*-mĭl'ĭ-*ä*), *n.* [L.] *Rom. Law.* The family, that is, the paterfamilias and his legitimate descendants and all persons adopted into the family (except such as were released from his power or manus) and their wives.
See MANUS, POTESTAS; cf. ADOPTION, PATERFAMILIAS, FILIUS-FAMILIAS, HEIR, PATRIMONY.
Husband, wife, and children did not necessarily constitute an independent family among the Romans, nor were they all necessarily of the same family. Those formed a family who were all subject to the right or power — originally manus, but latterly jus — of the same family head (paterfamilias). He might have a whole host dependent on him, — wife and sons and daughters, and daughters-in-law, and grandchildren by his sons, and possibly remoter descendants related through males; so long as they remained subject to him they constituted but one family, that was split up only on his death or loss of citizenship. It is very evident, therefore, that the Roman *familia* was an association of which the word "family" in its ordinary acceptation conveys but an imperfect and inaccurate representation. *J. Muirhead.*

fa-mil'iar (fă-mĭl'yẽr), *a.* [ME. *familer, familier*, F. *familier*, fr. L. *familiaris*, fr. *familia* family. See FAMILY.]
1. Of or pertaining to a family; domestic. *Archaic.*
"*Familiar* feuds." *Byron.*
2. Closely acquainted or intimate, as a friend or companion; having an intimate knowledge of, either through study, close association, or common knowledge, as, *familiar* with the Scriptures; we are *familiar* with his character.
3. Characterized by, or exhibiting, the manner of an intimate friend; not formal; unconstrained, easy; affable; accessible. *Archaic.* "In loose, *familiar* strains." *Addison.*
Be thou *familiar*, but by no means vulgar. *Shak.*
4. Well known; well understood; common; frequent; as, a *familiar* illustration; a *familiar* practice.
5. Unduly or wrongly intimate.
6. Of animals, tamed; domesticated.

Syn. — FAMILIAR, INTIMATE. FAMILIAR, as here compared, implies the informality and freedom of continued acquaintance or intercourse; it occasionally suggests the taking of undue liberties; INTIMATE denotes close and confidential relations; as, "[Goldsmith's style] so equable, so easy without being unduly *familiar*" (*Lowell*); "The *familiar*, if not rude, tone in which people addressed her" (*Hawthorne*); "They establish and maintain . . . more *intimate* and confiding relations with us" (*Lowell*); "*Familiar* with but very few persons, she could scarcely be *intimate* with her homely daughter-in-law" (*Thackeray*); "There began for those two young men (who were not even friends) a life of great *familiarity* and, as the days grew on, less and less *intimacy*" (*Stevenson*). See AMICABLE.

1. *Psychol.* Act or function of forming images or representations, whether in direct perception or in memory; also, an image or impression derived through sensation. *Obs.*

2. Imagination or fancy. From the conception of *fantasy* as the faculty of mentally reproducing sensible objects, the meaning appears to have developed into: first, false or delusive mental creation; and second, any sense-like representation in the mind, equivalent to the less strict use of *imagination* and *fancy*. Later *fantasy* acquired, also, a somewhat distinctive usage, taking over the sense of whimsical, grotesque, or bizarre image making. This latter sense, however, appears not to have attached itself to the variant spelling *phantasy*, which is largely used for visionary or phantasmic imagination.

This fool of *fantasie* *Chaucer.*

Is not this something more than *fantasy?* *Shak.*

Misshapen from my birth hour, how could I delude myself with the idea that intellectual gifts might veil physical deformity in a young girl's *fantasy?* *Hawthorne.*

From first to last, the processes of *phantasy* have been at work; but where the savage could see phantasms, the civilized man has come to amuse himself with fancies. *Tylor.*

3. A product of imagination or fantasy; specif.: **a** An image; esp, an illusory image; phantasm; also, a delusive appearance; hallucination.

A thousand *fantasies*
Begin to throng into my memory. *Milton.*

b A fictive creation, whether conceived, as in the mind, or expressed, as in a work of art; esp., an ingenious or fantastical design or invention.

Syn. — FASHION, MODE, STYLE, VOGUE, RAGE, CRAZE, FAD. FASHION, as here compared, is the general term for current or conventional usage, esp. in polite society, MODE emphasizes the idea of (sometimes affected) elegance; STYLE, as here compared (see DICTION), suggests an approved fashion, and frequently connotes a certain distinction in one's mode of conforming to it. VOGUE suggests temporary prevalence or currency; RAGE, CRAZE, and FAD (see *hobby*, under VOCATION) add the implication of extravagant and even more short-lived enthusiasm. See HABIT, MANNER, METHOD; cf. FASHION, *v. t.*

ried.—FAST, RAPID, SWIFT, FLEET, QUICK, SPEEDY, HASTY. *Fast* and *rapid* are often used without distinction; but FAST frequently applies to the moving object, whereas RAPID is apt to characterize or suggest the movement itself; as, a *fast* horse, a *fast* train, boat; a *rapid* current, a *rapid* gait, *rapid* progress. SWIFT suggests great rapidity, frequently coupled with ease or facility of movement; FLEET (commonly poetical) connotes lightness or nimbleness; as, "more *swift* than swallow shears the liquid sky" (*Spenser*); "whilst from off the waters *fleet* thus I set my printless feet" (*Milton*). QUICK, as here compared, applies esp. to that which happens promptly or which occupies but little time; it suggests celerity rather than velocity; as, "slow to resolve, but in performance *quick*" (*Dryden*); a *quick* movement of the head, a *quick* way to get rich. SPEEDY is opposed to dilatory; HASTY, as here compared, suggests hurry rather than speed; as, "No mode sufficiently *speedy* of obtaining money had ever occurred to me" (*De Quincey*); a *hasty* departure, to snatch a *hasty* meal. See HASTE, VELOCITY, PROMPT, ACTIVE.

fat, *n.* **1.** Any part of the tissues of an animal which consists chiefly of cells distended with greasy or oily matter, as the *fat* of meat; adipose tissue (which see).

2. The oily or greasy substance which makes up the bulk of the cell contents of adipose tissue, and occurs in smaller quantities in many other parts of animals, and in plants, esp. in certain seeds; also, *Chem.*, any of a class of compounds of which the different varieties of natural fat are mixtures. They are glyceryl esters of certain acids, as stearic, palmitic, etc., and on saponification yield glycerin. They are combustible, cannot be distilled unchanged, and are soluble in ether but not in water. Fats which are liquid at ordinary temperatures are called **fatty oils** *or* **fixed oils**. Animal fat is composed mainly of three distinct fats, *stearin*, *palmitin*, and *olein*, mixed in varying proportions. As olein is liquid at ordinary temperatures, while the other two fats are solid, it follows that the consistency or hardness of fats depends upon the relative proportion of the three individual fats. During the life of an animal the fat is mainly in a liquid state in the fat cells, owing to the solubility of the two solid fats in the more liquid olein at the body temperature. Butter contains, in addition to the above, butyrin, etc. (see BUTTER), and vegetable fats exhibit considerable variety of composition. Chemically, fats are neutral substances composed of carbon, hydrogen, and oxygen.

3. The best or richest productions; the best part; as, to live on the *fat* of the land.

4. Especially lucrative or advantageous work; specif.: **a** *Print.* Work containing much blank, or its equivalent, and, therefore, profitable to the compositor. **b** Telling lines or business in an actor's part.

5. *Anal. Chem.* See ETHER EXTRACT.

Fa'ta Mor-ga'na (fā'ta môr-ga'nā). [It., i. e., Morgan the fay. See FAIRY, MORGAIN.] **1.** A fairy celebrated in the tales of chivalry and in medieval romances. In Arthurian legend Morgan le Fay is the sister of Arthur and the wife of Uriens, king of Gore, and is a great necromancer. She treacherously tries to procure the death of her brother, stealing Excalibur and sending it to her paramour that he might be able to kill Arthur in combat. She also attempts to slay her sleeping husband. Failing in both, in revenge she tries to steal Excalibur again, but gets only the scabbard, which she throws into a lake. She is said to have revealed the intrigues of Lancelot and Guinevere to her brother. Finally, she is one of the three queens who conduct the wounded Arthur to Avalon. In the "Orlando Innamorato" of Boiardo Fata Morgana appears at first as a personification of fortune, living in splendor at the bottom of a lake.

2. *[l. c.]* A mirage, particularly one noticed at the Straits of Messina, between Calabria and Sicily;—so called because formerly regarded as the work of the fairy of this name. See MIRAGE.

fat'bird' (fȧt'bûrd'), *n.* The guacharo. The name is given locally to various other birds, as the pectoral sandpiper.

fate (fāt), *n.* [L. *fatum* a prophetic declaration, oracle, what is ordained by the gods, destiny, fate, fr. *fari* to speak. See FAME, FABLE, BAN; cf. 1st FAY, FAIRY.] **1.** That in the nature of the universe by which things come to be as they are or events to happen as they do; a law or principle in accordance with which the whole history of the universe is conceived to be foredoomed or predetermined; the necessity of nature; destiny. Fate is often personified, and in the era of prescientific and pre-Christian enlightenment was held to be a kind of deity, or group of deities (see def. 4), though naturally with little or no worship. In Christian thought and among some of the pagan philosophers the idea of fate is replaced by the notion of divine foreordination, while the modern scientific conception of the immutability of natural law is its near equivalent. See DETERMINISM; cf. CHANCE.

Necessity and chance
Approach not me; and what I will is *fate*. *Milton.*

Beyond and above the Olympian gods lay the silent, brooding, everlasting *fate* of which victim and tyrant were alike the instruments. *Froude.*

4. [*cap.*] *Class. Myth.* The goddess, or one of the goddesses, of fate or destiny; esp., *pl.* [L. *Fata*, pl. of *fatum*], the three goddesses who were supposed to determine the course of human life. In Greek mythology they are called the Mœræ (see MŒRA), their individual names being Clotho [Spinner], who spins the thread of life, Lachesis [Disposer of Lots], who determines its length, and Atropos [Inflexible], who cuts it off. In Hesiod they are daughters of Night or of Zeus and Themis. In art Clotho is usually represented with a spindle or distaff, Lachesis with a scroll or a globe, and Atropos with a pair of scales, or of shears, or drawing a lot. The Romans identified the Mœræ with their own goddesses of fate, the Parcæ (see PARCA), whose names are **Nona, Decuma,** and **Morta.** Cf. NORN.

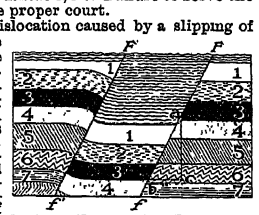
7. *Tennis, Lawn Tennis, Rackets, etc.* Failure to serve the ball legitimately into the proper court.
8. *Geol. & Mining.* A dislocation caused by a slipping of rock masses along a plane of fracture; also, the dislocated structure resulting from such slipping. The surface along which the dislocated masses have moved is called the **fault plane.** When this plane is vertical, the fault is a **vertical fault**; when its inclination is such that the present relative position of the two masses could have been produced by the sliding down, along the fault plane, of the mass on its upper side, the fault is a **normal**, or **gravity, fault.** When the fault plane is so inclined that the mass on its upper side has moved up relatively, the fault is a **reverse** (or **reversed**), **thrust**, or **overthrust, fault.** In the accompanying illustration, the fault *Ff* is a normal, and *F'f'* a reverse one, because the part to the left of, or above, *Ff* has been displaced downward relatively, while the part to the left of, or above, *F'f'* has been displaced upward, relatively. If there is no vertical displacement the fault is a **horizontal fault.** The linear extent of the dislocation measured on the fault plane and in the direction of movement is the **displacement**; the vertical displacement is the **throw**: the horizontal displacement is the **heave.** The direction of the line of intersection of the fault plane with a horizontal plane is the **trend** of the fault. A fault is a **strike fault** when its trend coincides approximately with the strike of associated strata (i. e., the line of intersection of the plane of the strata with a horizontal plane), it is a **dip fault** when its trend is at right angles to the strike; an **oblique fault** when its trend is oblique to the strike. Oblique faults and dip faults are sometimes called **cross faults.** A series of closely associated parallel faults are sometimes called **step faults** and sometimes **distributive faults.**



Faults. *F* Normal; *F'* Reverse *Ff, F'f'* Fault Planes; the inclination in the direction *af*, measured by the angle *fac*, is the Hade; *ac* Throw; *bc* Heave; *ab* Displacement Parts having the same number are of the same stratum

9. *Mining.* Coal rendered worthless by impurities in the seam. as, slate *fault*, dirt *fault*, etc.
10. *Elec.* A defective point in an electric circuit due to a crossing of wires, or earth, a break in the circuit, or the like.
☞ Although the *l* was often inserted in the spelling from the 16th century, it was commonly mute at least as late as the middle of the 18th century. Pope rhymed *fault* with *ought* and *thought*, and Dr Johnson (1755) says, "The *l* is sometimes sounded, and sometimes mute In conversation it is generally suppressed." The *l* is still often silent in dialect
Syn. — Error, blemish, defect, flaw, imperfection, weakness, frailty, infirmity, blunder, delinquency, indiscretion, slip, lapse — FAULT, FAILING, FOIBLE, PECCADILLO. A FAULT is a defect or imperfection in character, disposition, or habits; FAILING is more negative, and implies shortcoming, often weakness, a FOIBLE is a harmless, and usually amiable, weakness or failing; a PECCADILLO is a petty or venial fault; as, "He is all *fault* who hath no *fault* at all" (*Tennyson*); "And e'en his *failings* leaned to virtue's side" (*Goldsmith*); "To *failings* mild, but zealous for desert" (*Pope*), "I can bear very well to hear my *foibles* exposed, though not my *faults*" (*Shenstone*); "Here was a healthy and hearty man . . . so humane that he loved even the *foibles* of his kind" (*Lowell*); "A truly well-bred Christian, who . . . winks discreetly at his little *peccadilloes*" (*Irving*). See ERROR, BLEMISH.

Under Greek influence he was identified with *Pan*, and there was conceived to be a plurality (*l. c.*] *faunı* or *fauns*) analogous to the Greek panes, satyrs, and sileni In later myth Faunus was included in the list of Laurentian kings, before Latinus. Cf. SILVANUS.

Faust (foust), *n.* The hero and title of a celebrated drama by Goethe, the materials of which are drawn in part from the popular legends of Dr. Faustus, a German charlatan, astrologer, and reputed necromancer (15th and 16th centuries). Faust is an elderly student who, grown weary of seeking knowledge, deserts his studies and sells his soul to the Devil (Mephistopheles), who agrees to become his servant and fulfill all his wishes. He gives himself up to indulgence in sensual pleasures, and the first part ends with the carrying off of Faust by Mephistopheles after the death of Margaret, whom Faust has seduced. In the second part Faust is represented as marrying the Grecian Helen, a union which symbolizes the reconciliation of classicism with romanticism. The fifth act is devoted to the regeneration of the soul of Faust, which in the end is saved. A celebrated opera by Gounod is based upon the first part. See MARGARET, cf. FAUSTUS.

Faus'tus (fôs'tŭs), *n.* The hero of Christopher Marlowe's play "The Tragical History of Doctor Faustus," based on the legends of the German charlatan Dr. Faustus. 2. To court favor by a cringing and servile demeanor.
Thou with trembling fear,
Or like a *fawning* parasite, obeyest. *Milton.*
Syn. — Creep, crawl, crouch, bow, stoop, truckle, sneak, curry favor. — FAWN, CRINGE, COWER are here compared in their fig. senses. FAWN implies servile truckling or flattery, esp. in order to court favor; CRINGE adds to the idea of base humility or deference the implication of cowardly fear; COWER suggests a timorous shrinking from danger or crouching for shelter; as, "Let the candied tongue lick absurd pomp, and crook the pregnant hinges of the knee where thrift may follow *fawning*" (*Shak.*); "They *fawn* on the proud feet that spurn them lying low" (*Shelley*); "We are sneaking and bowing and *cringing* on the one hand, or bullying and scorning on the other" (*Thackeray*); "She [Jenny Lind] is very humble and careless of self. 'My poor, humble self' . . . is often on her lips; but she never *cringes* or loses dignity" (*J. A. Symonds*); "Wretchedness *cowers* into truckle-beds, or shivers hunger-stricken into its lair of straw" (*Carlyle*); "The whole family *cowered* under Lady Kew's eyes and nose, and she ruled by force of them" (*Thackeray*). See SHRINK, GROVEL, COAX, INGRATIATE.
to **fawn on** *or* **upon**, to make submissively affectionate demonstrations toward; to practice blandishments upon; to adopt a cringing and servile demeanor towards.

Fidelity to one's lord; the obligation of a feudal tenant or vassal to be faithful to his lord, the observance of this obligation, or the special oath by which it was assumed. It is no longer the practice to exact the oath of fealty, though it is still technically due from a freehold tenant to his lord. Cf. HOMAGE.
Homage is done, *fealty* is sworn, and it is worthy of observation that the oath is conceived as less solemn than the symbolic act. . . . The tenant . . . stands up with his hands on the gospels and says: "Hear this, my lord: I will bear faith to you of life and member, goods, chattels, and earthly worship, so help me God and these holy gospels of God." *Pollock & Mait*
2. Fidelity; constancy, faithfulness, as of a friend to a friend, or of a wife to her husband.
Swore *fealty* to the new government. *Macaulay*

Syn. — Homage, fidelity, constancy. See LOYALTY.

fear (fēr), *n.* [ME. *fer*, *feer*, *fere*, AS. *fær* danger; akin to D *vaar*, *gevaar*, danger; OHG. *fāra*, G. *gefahr*, Icel. *fār* harm, mischief, plague, and to E. *jare*. See FARE.] 1. The painful emotion characteristic of the apprehension of evil; a primitive affection marked by revulsion and agitation in the presence of the object feared and normally by a desire to flee or avoid it; apprehension, alarm, or dread; in its more intense forms, fright or terror.
Where no hope is left, is left no *fear*. *Milton.*
The . . . principal *fear* was for the holy temple. 2 *Macc.* xv. 18.
Fear is a genuine instinct, and one of the earliest shown by the human child. *Wm. James.*
2. Apprehension or terrified contemplation (of something).
The *fear* o' hell's a hangman's whip
To haud the wretch in order *Burns.*
3. **a** Apprehension of incurring, or solicitude to avoid, the wrath or violence of some one, as of God; hence, the dread reverence felt toward the Supreme Being.
I will teach you the *fear* of the Lord. *Ps.* xxxiv 11.
b Respectful reverence for men of authority or worth. *Obs.*
Render therefore to all their dues; tribute to whom tribute is due, . . . *fear* to whom *fear*. *Rom.* xiii 7.
4. That which causes, or which is the object of, apprehension or alarm; ground for or occasion of alarm; danger. *Obs. or R.*, except in *no fear*; as, he will not fail, no *fear*.
There were they in great fear, where no *fear* was. *Ps* liii 5.

Syn. — FEAR, DREAD, FRIGHT, ALARM, DISMAY, CONSTERNATION, PANIC, TERROR, HORROR. FEAR is the most general term; as, "*Fear* came upon me, and trembling" (*Job* iv. 14); "Death stands above me, whispering low I know not what into my ear: of his strange language all I know is, there is not a word of *fear*" (*Landor*). DREAD emphasizes the idea of apprehension or anxiety; as, "He [Dr. Johnson] had, indeed, an awful *dread* of death, or rather 'of something after death'" (*Boswell*); "stupefied by the dim, thick, stifling atmosphere of *dread*, which . . . obliterated all definiteness of thought" (*Hawthorne*). FRIGHT implies the shock of sudden, startling, and commonly short-lived fear; as, "Few mind the public panic *fright*, and fear increased the horror of the night" (*Dryden*); "An echo . . . shuddering fled from room to room, and died of *fright* in far apartments" (*Tennyson*). ALARM suggests the surprise and agitation which is excited by imminent or unexpected danger; as, "a blanket, in the *alarm* of fear caught up" (*Shak.*); "I shook her breast with vague *alarms*" (*Tennyson*). DISMAY (see DISMAY) implies deprivation of spirit, courage, or initiative, esp. by an alarming or disconcerting prospect; as, "His words impression left of much amazement to the infernal crew, distracted and surprised with deep *dismay* at these sad tidings" (*Milton*); "The storm prevails, the rampart yields a way, bursts the wild cry of horror and *dismay*" (*Campbell*). CONSTERNATION heightens the implication of prostration or confusion of the faculties; as, "It is a question of *consternation*, a question that should strike him that should answer it, dumb" (*Donne*). PANIC is overmastering and unreasoning, often groundless, fear or fright; as, "And each dweller, *panic*-stricken, felt his heart with *terror* sicken" (*Shelley*); "A blockhead, who was in a perpetual *panic* lest I should expose his ignorance" (*De Quincey*). TERROR suggests the extremity of consternation or (often violent) dread; as, "the *terror* by night" (*Ps.* xci. 5); "frozen with *terror*" (*Beckford*); "soul-chilling *terror*" (*Shelley*). HORROR adds the implication of shuddering abhorrence or aversion; as, "the *horror* of supernatural darkness" (*W. Pater*); "The feeling which fell upon me was a shuddering *horror*" (*De Quincey*); "fierce thrills of delighted *horror*" (*F. W. Farrar*); "What is *terror* in poetry is *horror* in prose" (*Lancaster*). See APPREHENSION, AFRAID, FEARFUL, TREPIDATION.
for fear, in apprehension lest. "*For fear* you ne'er see chain nor money more." *Shak.*

Feast of Angel Guardians *or* **Guardian Angels,** *R. C. Ch.*, a church festival instituted by Pope Paul V., and celebrated on October 2d. — **F. of Asses** *or* **of the Ass,** in the Middle Ages, a festival in which one or more asses were represented, such as the ass of Balaam, that on which Mary and the child rode in the flight into Egypt, and that on which Jesus made his triumphal entry into Jerusalem. This festival, originally, perhaps, designed to teach the Bible, degenerated into a scandalous burlesque (a form of the Feast of Fools), and in the 15th century was forbidden. — **f. of cups** *or* **beakers.** See ANTHESTERIA. — **F. of Dolors of the Blessed Virgin Mary.** *R. C. Ch.* See *Dolors of Mary*, under DOLOR. — **F. of Fools,** *or* **Fools' Festival,** in the Middle Ages, a burlesque festival held usually on the Feast of the Circumcision (Jan. 1), a prominent feature being mummeries, such as, occasionally, a burlesque of the High Mass, in connection with mimic dignitaries called Pope of Fools, Patriarch of Sots, Boy Bishop, Abbot of Unreason, etc., who were elected and often for the day took possession of the churches. — **Feast of Ingathering,** the Feast of Tabernacles; — so called as a harvest festival. (*Ex.* XXIII. 16; XXXIV. 22.) — **F. of Lanterns.** = 1st BON. — **F. of Our Lady of the Rosary,** *R. C. Ch.*, the first Sunday in October, a feast instituted to commemorate the victory of Don John of Austria over the Turks at Lepanto in 1571. — **f. of pots.** See ANTHESTERIA. — **F. of Roses** (rōz'ĕz; -ĭz), in Persia, an annual festival during the time when roses are in bloom. — **F. of Tabernacles** (tăb'ĕr-na-k'lz), one of the three principal festivals of the Jews, on which all males were required to make pilgrimages to the Temple at Jerusalem. Originally it was a harvest festival with no fixed date, and during it the people lived in booths, a practice which went back to the custom of so living during the fruit harvest, and which was later regarded as commemorative of the dwellings of the Israelites while wandering in the wilderness. Its celebration began on the 15th day of the seventh month, lasting for seven days (at a late period for nine), and various ceremonies were connected with it. — **F of the Circumcision.** *Eccl.* See CIRCUMCISION, 3. — **F. of the Dedication.** See HANUKKA. — **F. of the Immaculate Conception,** *R. C. Ch.*, a festival held (Dec. 8) in honor of the immaculate conception of the Virgin Mary — **F of the Immaculate Heart.** See IMMACULATE HEART. — **F. of the Presentation** (of Christ in the Temple). See FEAST OF THE PURIFICATION. — **F. of the Presentation** (of Mary), *Eastern & R. C. Ch.*, a festival, observed November 21, in honor of the presentation of Mary in the temple at the age of three, as related in apocryphal gospels. — **F. of the Purification** (of the Virgin Mary), *Eccl.*, a feast in commemoration of the ceremonial purification of the Virgin Mary, celebrated on February 2d. (See *Lev.* xii. and *Luke* ii. 22.) Called also *Candlemas* (which see) and *Feast of the Presentation (of Christ in the Temple).* — **F. of the Sacred Heart,** *R. C. Ch.*, a feast generally kept on the Friday (in England on the Sunday) after the octave of Corpus Christi. — **F. of Trumpets,** a feast of the Jews celebrated on the first day of the seventh month (*Lev.* xxiii. 24, 25; *Num.* xxix. 1-6) and marked by blowing of trumpets. Called also *Yom Teruah.* — **F. of Unleavened Bread,** a Jewish agricultural feast which began the next day (the 15th of the first month) after the Passover, lasted seven days, and was marked by the offering of a sheaf of the new grain to the Lord. This feast and the Passover finally became one continuous festival. — **F. of Weeks.** See PENTECOST, 1.

feast (fēst), *v. i.;* FEAST'ED; FEAST'ING. [ME. *festen*; cf. OF. *fester* to rest from work, to entertain, F. *fêter*. See FEAST, *n.*] **1.** To eat of a feast; to dine or sup on rich provisions, particularly in large companies, or on public festivals; to enjoy some unusual pleasure or delight.

feath'er (fĕth'ẽr), *n.* [ME. *fether*, AS. *feðer;* akin to D. *veder*, OHG. *fedara*, G. *feder*, Icel. *fjoðr*, Sw. *fjäder*, Dan. *fjæder*, Gr. πτερόν wing, feather, πέτεσθαι to fly, Skr. *patra* wing, feather, *pat* to fly, and perh. to L. *penna* feather, wing. Cf. PEN a feather.] **1.** One of the peculiar light, horny, epidermal outgrowths which make up the external covering or plumage of birds, and form the greater part of the surface of their wings. Feathers are found only on birds, and their presence is the most distinctive character of that group. A typical feather consists of a stem or shaft, the proximal part of which is hollow and is termed the *barrel, calamus,* or *quill.* The distal part, which is called the *rachis,* is furrowed on one side and filled internally with a pithy substance, and bears a series of slender somewhat obliquely directed processes on each side, called the *barbs.* The barbs bear in like manner the *barbules,* and these in turn the *barbicels.* Those barbicels which grow on the barbules directed toward the tip of the feather end in many cases in small hooks, or *hamuli*, which hook on to the barbules of the next barb, uniting the whole series of processes into a vane or web. Absence of the hamuli causes a feather to be soft and fluffy. In addition, many feathers bear an *aftershaft,* or *hyporhachis,* which resembles a small feather, springing from the shaft at the proximal end of the rachis. A feather grows from the epidermal covering of a vascular dermal papilla, whose base is sunk in a follicle or pit. On this papilla the feather is molded, and as the rachis grows out it carries out with itself the pairs of barbs in succession. Feathers do not grow uniformly on a bird's body, but in definite areas called *pterylæ.* See DOWN, FILOPLUME, QUILL, PINFEATHER.

Feather. *a* Shaft, from which part of the barbs have been cut away on the left; *b* Aftershaft with the barbs cut away on the right; *c c c* Barbs; *d* Quill.

fee, *n.* [ME. *fe* fief, payment, OF. *fié, fieu;* prob. of G. origin; cf. OHG. *fihu, fehu,* cattle. Cf. FEE property, FEUD a fief, FIEF.] **1.** *Eng. Feudal Law.* A heritable estate in land held of a superior lord by whom the estate was granted, and who retains rights in the land, or tenement, and in return acquires rights against the tenant.

To say of a tenant that he holds in *fee* (tenet in feodo) means no more than that his rights are inheritable; . . . he holds heritably and for his own behoof. But nothing more is implied as to the terms of his holding, the relation between him and his lord. His duties to his lord may be onerous or nominal, noble or humble, military or agricultural, but if his rights are heritable, then he holds in *fee* and the land is feodum suum, at all events if his tenure has about it no taint of villenage. *Pollock & Mait.*

2. In general, in feudal law, any feudal benefice, or estate in land held of a feudal lord; also, sometimes, the interest or right of the lord in the land so held. These rights are often respectively called by the Roman law terms *dominium utile* and *dominium directum.*

3. *Law.* **a** At the common law, an estate of inheritance in land, being either a fee simple or a fee tail (which see, below). **b** A fee simple; that is, an absolute fee; a fee without limitation to any particular class of heirs or restrictions upon alienation. A fee simple may be either a **fee simple absolute,** which is one without any condition or limitation whatsoever, or a **qualified,** or **limited, fee simple,** often called a *base fee,* which is one that may determine upon the fulfillment of a contingent qualification or limitation, or the happening of a certain event. The term *fee simple,* or the term *fee* alone, is often used as synonymous with the term *fee simple absolute* in the sense noted above. See CONDITIONAL FEE. "Buy the *fee simple* of my life for an hour and a quarter." *Shak.* At the common law, to convey a fee it is essential that the grant should be to the grantee and his "heirs" or to him and the "heirs of his body," according as it is desired to convey an estate in fee simple or fee tail, in the latter case the "words of procreation," such as "of his body," being necessary as well as the word "heirs." By the Conveyancing Act of 1881 in England it is sufficient if the estate be described as a "fee simple" or "in tail," as the case may be, and by custom in some manors other words may be used; the common-law rule has been generally greatly modified also in the United States. In a will no technical words are required, but as a general rule the estate will be given which corresponds to the intention shown by the testator.

4 The territory held in fee.

8. A perquisite; share of property, spoils, etc. *Obs.*

9. Pay; wages; salary. *Obs.*

10. Reward or compensation for services rendered or to be rendered; esp., payment for professional services, of optional amount, or fixed by custom or laws; charge; pay; as, the *fees* of lawyers and physicians.

To plead for love deserves more *fee* than hate. *Shak.*

11. A payment for admission to a place of amusement or instruction, an association, etc.; as, school *fees;* club *fees.*

12. A gift in return for services; gratuity; tip.

13. A bribe. *Obs.*

Syn. — FEE, ASSESSMENT are distinguished as in the following quotation.

A price is a charge for special services which people are not compelled to accept unless they choose. A *fee* or *assessment* is a charge for special services which people are compelled to accept. . . . 8. *Psychol.* In the broadest sense, a state of consciousness, or consciousness in general considered in itself and apart from any reference to an object of perception or of thought ; that which includes sensation, emotion, and thought as subordinate species. In a narrower sense, that division or element of conscious life which includes all affective states, consciousness apart from conation and cognition.

A *feeling* and a state of consciousness are, in the language of philosophy, equivalent expressions : everything is a *feeling* of which the mind is conscious ; everything which it feels, or, in other words, which forms a part of its own sentient existence.
J. S. Mill.

Tetens and Mendelssohn are said to have been the first who, by asserting the essential distinctness of *feeling* and volition, substituted for the dual division of the mental functions into cognition and will, which had been handed down from the time of Aristotle, the triple division into cognition, *feeling*, and will, which is now current. *G. F. Stout.*

9. That quality of a work of art which embodies the emotion of the artist, and is calculated to affect similarly the spectator.

Syn. — FEELING, EMOTION, SENTIMENT, PASSION are here compared in their nontechnical uses only ; for psychological distinctions, see defs. FEELING, the general term, suggests less of agitation or excitement than EMOTION ; it is often sharply contrasted with *judgment*, and frequently implies little more than susceptibility to, or capacity for, sympathetic emotion ; as, "a *feeling* of sadness and longing" (*Longfellow*) ; "Her humanity was a *feeling*, not a principle" (*H. Mackenzie*) ; "What is his *feeling* for the beautiful, the sublime, the ridiculous ?" (*E. Dowden*) ; "that eagerness for *emotion* and adventure which books of that sort inspire" (*Sydney Smith*) ; "means of exciting religious *emotion*" (*Ruskin*) ; "a sensation of strength, inspired by mighty *emotion*" (*G. Eliot*). SENTIMENT connotes a larger intellectual element than *feeling* or *sensation* ; it frequently suggests refined, sometimes romantic, occasionally affected or artificial, feeling ; as, "that moral *sentiment* which exists in every human breast" (*Bancroft*) ; "His opinions are more the result of conviction than of *sentiment*" (*Lowell*) ; "the fondness for *sentiment* . . . which is often observed as characterizing American taste in literature" (*Bryce*) ; "Steeped in *sentiment* as she [Oxford] lies, spreading her gardens to the moonlight, or whispering from her towers the last enchantments of the Middle Age" (*M. Arnold*) ; Sterne has been called a man overflowing with *sentiment* on paper, but devoid of real *feeling*. PASSION suggests powerful or controlling emotion ; as, "Hark ! how the sacred calm, that breathes about, bids every fierce tumultuous *passion* cease" (*Gray*) ; "The ruling *passion*, be it what it will, the ruling *passion* conquers reason still" (*Pope*) ; "The sounding cataract haunted me like a *passion*" (*Wordsworth*). See SENSE, OPINION, WILL, MIND, SOUL, REASON.

The colors are usually white or nearly white, flesh-red, bluish, or greenish. H., 6–6.5. Sp. gr., 2.5–2.9. The group includes the monoclinic (*orthoclastic*) species *orthoclase*, or common potash feldspar, and the rare *hyalophane*, or baryta feldspar ; also the triclinic species *microcline*, a potash feldspar ; *anorthoclase*, chiefly a soda-potash feldspar ; *anorthite*, or lime feldspar ; *albite*, or soda feldspar ; also, intermediate between the last two species, *labradorite, andesine, oligoclase*, containing both calcium and sodium in varying amounts. The feldspars are essential constituents of nearly all crystalline rocks, as granite, gneiss, mica slate, most kinds of basalt and trachyte, etc. The decomposition of feldspar has yielded a large part of the clay of the soil, also the mineral kaolin, an essential material in the making of fine pottery. Common feldspar is itself largely used in the same industry.

feld-spath'oid (fĕld-spăth'oid), *n. Min.* Any of a group of minerals similar to the feldspars in composition and in function in forming rocks. They are nephelite, leucite, sodalite, haüyne, nosean, and melilite. See ANALCITE.

Fé'li'bre (fā'lē'br'), *n.* [F., fr. Pr. *felibre*, in OPr., doctors of the law (*Luke* ii. 46), fr. Sp. *feligrés*, now meaning "one belonging to a certain parish," L. *filii ecclesiae* sons of the church. The origin of the word was not known when it was adopted by the modern Provençal poets.] A member or supporter of the Félibrige. — **Fé-li'bre-an** (fā-lē'brē-ăn), *a.*

‖ **Fé'li'brige'** (fā'lē'brēzh'), *n.* [F., fr. Pr. *felibrige*. See FÉLIBRE.] A literary association or brotherhood of Provençal writers. It was founded near Avignon in 1854, under the leadership of Joseph Roumanille, for the maintenance and the purification of Provençal as a literary language and the promotion of the artistic interests of the south of France. The movement has given rise to a very interesting and remarkable literature by such writers as Mistral, Roumanille, Aubanel, and Felix Gras, and it has produced an artificial literary language, not spoken anywhere, but readily understood by speakers of Provençal.

fe'li-cif'ic (fē'lĭ-sĭf'ĭk), *a.* [L. *felix, -icis*, happy + *facere* to make.] Making happy ; causing happiness.

fe-lic'i-tate (fē-lĭs'ĭ-tāt), *a.* [L. *felicitatus*, p. p. of *felicitare* to felicitate, fr. *felix, -icis*, happy. See FELICITY.] Made happy. *Archaic. Shak.*

fe-lic'i-tate (-tāt), *v. t.* ; -TAT'ED (-tāt'ĕd) ; -TAT'ING (-tāt'-ĭng). **1.** To make happy or prosperous. *Rare.*

What a glorious entertainment and pleasure would fill and *felicitate* his spirit. *I. Watts.*

2. To call or consider happy ; to congratulate.

Every true heart must *felicitate* itself that its lot is cast in this kingdom *W. Howitt.*

3. To offer congratulations on (some event). *Obs.*

Syn. — FELICITATE, CONGRATULATE. FELICITATE is the more formal term ; CONGRATULATE, while also frequently formal, commonly implies a heartier and more genuine expression of sympathetic joy.

fe-lic'i-ta'tion (-tā'shŭn), *n.* [Cf. F. *félicitation.*] Act of felicitating ; a wishing of joy or happiness ; congratulation.

fe-lic'i-tous (fē-lĭs'ĭ-tŭs), *a.* **1.** Happy ; indicative of happiness. *Rare.*

fe-lic'i-ty (-tĭ), *n. ; pl.* -TIES (-tĭz). [ME. *felicite*, F. *félicité*, fr. L. *felicitas*, fr. *felix, -icis*, happy, fruitful.] **1.** State of being happy ; blessedness ; enjoyment of good.

Our own *felicity* we make or find. *Johnson.*

To attain everlasting joy and *felicity*. *Book of Common Prayer.*

2. That which promotes happiness ; a successful or gratifying event ; blessing ; prosperity ; good fortune.

The *felicities* of her wonderful reign. *Atterbury.*

3. A pleasing faculty or accomplishment, esp. in art or language ; remarkable aptness or grace ; as, *felicity* in painting portraits, or in writing or talking.
4. A happy achievement ; an apt expression.
5. *Astrol.* Favorable aspect ; — said of a planet. *Obs.*

Syn. — Bliss, beatitude, blissfulness. See HAPPINESS.

Fe'li-dæ (fē'lĭ-dē ; fĕl'ĭ-dē), *n. pl.* [NL. See FELIS.] *Zoöl.* The cat family, a family of digitigrade carnivorous mammals of which the domestic cat is the type. The family includes also the lion, tiger, leopard, puma, jaguar, wild cat, lynxes, etc , and the cheetah. Except the cheetah (which see), all the existing members are very closely related and may be included in the typical genus *Felis*, though the lynxes are usually made a separate genus (*Lynx*). The typical cats have a lithe body, very soft, often handsomely marked fur, powerful and exceedingly active muscles, comparatively short limbs with soft pads on the feet, permitting of a stealthy tread, and with claws which when not in use are retracted into sheaths, thus preserving their sharpness for seizing their prey and for defense. Their jaws, which are provided with formidable teeth, are short, enabling them to crush strong bones. Except the lion, the true cats are more or less expert at climbing. As compared to the dogs they are of unsocial disposition. The extinct saber-toothed cats are sometimes included in the Felidæ as a subfamily (Machairodontinæ).

fe'line (fē'lĭn ; 277), *a.* [L. *felinus*, fr. *feles, felis*, cat.] **1.** *Zoöl.* Catlike ; of or pertaining to the genus *Felis* or family Felidæ.

fellow servant. Also **fel'low-serv'ant,** *n.* **1.** One of two or more servants employed together.

2. *pl. Law.* Those persons who are employed by the same master and are engaged under the same general control in promoting or accomplishing a common object under such relations to each other that the safety of any one in the ordinary and natural course of events depends upon the exercise of due care and skill by the others. This definition is according to the decisions of the British courts and of the Federal and most of the State courts in the United States, but in a few States it is held that such employees are not fellow servants when they are of different ranks, as conductors and brakemen, mill superintendent and operatives, etc. The general common-law rule that one fellow servant cannot recover for injuries sustained from another fellow servant in their common employment unless such other is shown to be a person unfit or improper to have been so employed has been modified by statute in Great Britain and in most of the United States so as to increase the employers' liability.

fel'low-ship (fĕl'ō-shĭp), *n.* [*fellow* + *-ship.*] **1.** State or relation of being a fellow or associate.

2. Partnership; alliance; membership (in a society); casual intercourse. *Obs.*

O thievish Night,
Why should'st thou, but for some *felonious* end,
In thy dark lantern thus close up the stars? *Milton.*

— **fe-lo'ni-ous-ly,** *adv.* — **fe-lo'ni-ous-ness,** *n.*

fel'on-ry (fĕl'ŭn-rĭ), *n.* The class of felons; specif., the convict population of a penal colony.

fel'o-ny (fĕl'ō-nĭ), *n.*; *pl.* -NIES (-nĭz). [ME. *felonie*, OF. *felonie*, F. *félonie* treachery, malice. See 2d FELON.]

1. Wickedness; baseness; treachery; deceit; wrath; daring, a crime or sin. *Obs.*

2. *Feudal Law.* An act on the part of the vassal which involved the forfeiture of his fee, or an act of the lord which involved the forfeiture of his lordship. Later the term *felony* came to be used of every grave crime, and seemingly with no reference to the feudal bond except that the felon's land escheated to his lord, and a charge of *felony* became an indispensable part of the charge of every crime punishable by death or mutilation, and such an offense had to be prosecuted by an appeal (which see).

3. *Common Law.* a In the early common law (with possibly some small anomalies), any crime that could be prosecuted by an appeal, the consequences peculiar to offenses that could be so prosecuted being: in case of conviction, loss of lands by escheat or forfeiture with confiscation of goods and loss of life or member; in case of the alleged felon fleeing from trial, outlawry. Of these features forfeiture was fairly constant during those changes (in the law or its actual administration) that rendered practically obsolete appeal and outlawry and otherwise modified the criminal law, so that Blackstone's definition (which broadly sensed the law of his own day and was followed for a century or more afterward) was in effect as in def. b (below). b As defined by Blackstone: An offense which occasions a total forfeiture of either lands or goods, or both, at the common law, and to which capital or other punishment may be superadded, according to the degree of guilt, the chief offenses of this kind being homicide, rape, larceny, burglary, arson, and strictly, also, treason, which last is often classed by itself as distinct from felony. With the abolition of forfeiture (which see) for crime there remained no serviceable criterion for distinguishing a felony from a misdemeanor. Hence, *felony* came to be used as in sense 4 (following).

4. *Common and Statute Law.* Any of various crimes, artificially grouped together, that are in general graver or more serious in their natures and penal consequences than those called *misdemeanors*. In this sense *felony* may include common-law felonies (in sense 3), offenses expressly declared to be felonies by statute, and offenses held to be felonies by the courts though not expressly created as such. This is the case in England, where as a general rule those statutory offenses that involve loss of life or limb are held to be felonies, though without being expressly made so by statutory definition. In some of the United States the distinction between felonies and misdemeanors has been expressly abolished by statute; in many other States the distinction is expressly made by statute to depend upon the kind of punishment involved, most of the statutes declaring a felony to be: any offense that is punishable by death or confinement in the penitentiary, or State prison, such being the characteristic modern punishment of common-law felonies (in sense 3 b).

fem. † FEME.

fem. *Abbr.* Feminine.

wort, AS. *feldwyrt*.] Any of several gentianaceous plants, esp. *Swertia perennis* and *Gentiana lutea*.

fe'male (fē'māl), *n.* [ME. *femele, femal*, F. *femelle*, fr. L. *femella*, dim. of *femina* woman. See FEMININE.] **1.** A woman or girl; a female human being; also, by extension, a female animal.

2. *Bot.* A pistillate plant.

Syn.—FEMALE, WOMAN, LADY. FEMALE (the correlative of *male*) emphasizes the idea of sex; it applies alike to human beings, animals, and plants. Its employment as a synonym for *woman* was once frequent among good writers; as, "three smart-looking *females*" (*Jane Austen*); "to please the *females* of our modest age" (*Byron*); "the *female* and her garments vexed and tossed" (*Wordsworth*). But this use is now commonly tabooed. As compared with WOMAN (the correlative of *man*), which emphasizes essential qualities, LADY (the correlative of *gentleman*) connotes rather the externals of social position or refinement. It is frequently used as a mere courteous synonym for *woman* (as, Please allow these *ladies* to pass); but its indiscriminate substitution for *woman* is vulgar; as, "I admit that our abuse of the word is villainous. I know of an orator who once said . . . that 'The *ladies* were last at the cross and first at the tomb'!" (*Lowell*). See FEMALE, *a.*, WOMAN.

fe'male, *a.* **1.** Of or pertaining to a woman, or human being of that sex which conceives and brings forth young; hence, by extension, of or pertaining to animals of the corresponding sex, or designating that sex, or the functions, organs, and parts especially pertaining to it; — opposed to *male*. See SEX. In *Nat. Hist.* the female sex, or female animals or characters, are denoted by the symbol of Venus (♀).

To the generous decision of a *female* mind, we owe the discovery of America. *Belknap.*

2. Peculiar to, or characteristic of, woman; feminine; as, *female* tenderness. "*Female* usurpation." *Milton.*

3. Effeminate; weakly; paler or less vivid in color (said of precious stones); — rarely, inferior. *Obs.*

4. *Bot.* **a** Pertaining to or designating any reproductive organ or portion of a plant body in which relatively large, nonmotile gametes (eggs or oospheres) are organized, requiring fertilization by smaller, often motile, gametes before they are capable of development into a new individual. **b** By analogy, pertaining to or designating any plant organ or reproductive body which produces, or is concerned in the production of, fruit, after fecundation; — hence applied to the plant which bears such organs; as, the *female* hemp. Of seed plants, loosely, pistillate.

5. *Mech.* Designating a hollow part, tool, etc., into which is inserted a corresponding, or male, part; as, a *female* center, die, gauge, screw, template, or the like.

Syn.—FEMALE, FEMININE, WOMANLY, WOMANLIKE, WOMANISH, EFFEMINATE, LADYLIKE. FEMALE (opposed to *male*) applies to animals and plants as well as to human beings, and always suggests sex; FEMININE (opposed to *masculine*) denotes that which belongs to, or is characteristic of, women (not, in modern usage, the females of animals), and frequently suggests gender rather than sex; it has now practically displaced all except the more strictly physiological senses of *female*; as, "the *female* bee" (*Milton*); "the *female* ivy" (*Shak.*); a *female* slave; "tinge with red the *female* reader's cheek" (*Byron*); "her heavenly form angelic, but more soft and *feminine*" (*Milton*); "the powerful, *feminine*, maternal hands" (*G. Eliot*); "the domestic virtues, which are especially *feminine*" (*Lecky*); "Hunt, whose *femmine* temperament gave him acute perceptions at the expense of judgment" (*Lowell*). WOMANLY (often opposed to *girlish*) suggests esp. a woman's deeper, tenderer, more gracious qualities; as, "All will spy in thy face a blushing, *womanly*, discovering grace" (*Donne*); "'T was just a *womanly* presence, an influence unexprest" (*Lowell*). WOMANLIKE is more apt to suggest characteristically feminine faults or foibles; as, "*Womanlike*, taking revenge too deep for a trenchant wrong done but in thought to your beauty" (*Tennyson*). WOMANISH (compare *mannish*, *childish*) is a term of contempt; as, "Art thou a man? Thy form cries out thou art: thy tears are *womanish*" (*Shak.*); "the *womanish* terror and fondles of Bianca" (*Walpole*); "*womanish* and wailing grief" (*Cowper*). EFFEMINATE emphasizes the idea of unmanly delicacy, luxuriousness, or enervation; as, "A woman impudent and mannish grown is not more loathed than an *effeminate* man in time of action" (*Shak.*); "an *effeminate* and unmanly foppery" (*Bp. Hurd*); "Something *feminine* — not *effeminate*, mind — is discoverable in the countenances of all men of genius" (*Coleridge*). LADYLIKE is frequently used sarcastically to imply a dainty and finical affectation of the proprieties; as, "fops at all corners, *ladylike* in mien" (*Cowper*); "He is a very *ladylike* poet" (*Hazlitt*); "opinions . . . of a highly genteel and *ladylike* order" (*Skeat*). See FEMALE, *n.*; cf. MALE.

Fer·ma'tI-an (fĕr-mā'shĭ-ăn; -shăn), *a. Math.* Referring to the French mathematician Pierre de Fermat (1601–65); —esp. applied to a form of mathematical induction invented by Fermat as the basis of the theory of numbers.

Fer'mat' prime (fĕr'mä'). [See FERMATIAN.] *Math.* A number of the form $2^n + 1$, where n is of the form 2^r; as 3, 5, 17, 257, . . . for $r = 0, 1, 2, 3, \ldots$ Regular polygons the numbers of whose sides are these primes are the only fundamental polygons inscriptible in the circle.

Fer'mat's' law *or* **principle** (fĕr'mäz'). *Physics.* The principle that, in wave motion, the course of a ray is that for which the time is a minimum; the principle of least time.

Fermat's theorem. *Theory of Numbers.* The theorem that if n be a prime number and a be a number prime to n, then $a^{n-1} - 1$ is divisible by n.

fer'ment (fûr'mĕnt), *n.* [L. *fermentum* ferment (in senses 1 & 2), perh. for *fervimentum*, fr. *fervere* to be boiling hot, boil, ferment: cf. F. *ferment*. Cf. BARM, FERVENT.]

1. An agent capable of producing fermentation, as yeast or diastase; a zyme. It is customary to divide ferments into two classes: (1) *Formed* or *organized* ferments, which are living organisms (molds, bacteria, yeasts). (2) *Unorganized, structureless,* or *chemical* ferments, which are chemical substances and which belong for the most part to the class of complex soluble organic compounds known as *enzymes* or *soluble ferments*. The action of many, if not all, organized ferments is probably due to enzymes formed by them. See ENZYME.

2. Fig.: Tumult; agitation; excitement; heat.

The nation is in a *ferment*. *Walpole.*

3. A gentle internal motion of the constituent parts of a fluid; fermentation.

Syn. — See EBULLITION.

fer·ment' (fĕr-mĕnt'), *v. i.*; FER·MENT'ED; FER·MENT'ING. [L. *fermentare, fermentatum*: cf. F. *fermenter*. See FERMENT, *n.*]

1. To undergo fermentation; to work; effervesce.

2. To be agitated or excited by violent emotions.

But finding no redress, *ferment* and rage. *Milton.*

fer·ment', *v. t.* To cause ferment or fermentation in; to set in motion; to excite internal emotion in; to heat; agitate; exacerbate; foment.

Ye vigorous swains! while youth *ferments* your blood. *Pope.*

fer·ment'a·ble (fĕr-mĕn'tă-b'l), *a.* **1.** Capable of undergoing fermentation, esp. alcoholic fermentation.

2 Capable of causing fermentation. *Rare.*

—fer·ment'a·bil'i·ty (-bĭl'ĭ-tĭ), *n.*

Fer'men·ta'ri·an (fûr'mĕn-tā'rĭ-ăn), *n.* [L. *fermentum* leaven. See FERMENT, *n.*] *Eccl. Hist.* One who adheres to the doctrine that the Eucharist should be celebrated with leavened bread; — a name of reproach given by Latin Christians to the members of the Greek Church. Cf. AZYMITE.

fer'men·ta'tion (-tā'shŭn), *n.* **1.** A process of chemical change with effervescence, of the nature of or similar to that produced by the action of yeast; by extension, *Chem.*, any of various transformations, esp. of organic substances, by the action of ferments, as in the souring of milk, the ripening of cheese, or the formation of vinegar from cider or sugar from starch. Fermentation is usually the catalytic decomposition of a complex compound into simpler ones. The different varieties are often named after the most important product. Ordinary or alcoholic fermentation, whereby certain kinds of sugar, esp. glucose, are converted into alcohol and carbon dioxide, proceeds whenever yeast is added to dough or to sugar solutions under conditions of temperature, dilution, etc., favorable to the growth of the yeast plant (see YEAST). Starch (as in dough) and cane sugar do not themselves undergo alcoholic fermentation, but they are capable of being decomposed into fermentable substances. See DIASTASE, INVERTASE; also ACETIC FERMENTATION, LACTIC FERMENTATION, etc.

2. A state of agitation or excitement.

A universal *fermentation* of human thought. *C. Kingsley.*

fermentation theory. *Med.* The theory which likens the course of certain diseases (esp. infectious diseases) to the process of fermentation, and attributes them to the organized ferments in the body. It does not differ materially from the now accepted *germ theory* (which see).

fer·ment'a·tive (fĕr-mĕn'tă-tĭv), *a.* [Cf. F. *fermentatif*.] Causing, having power to cause, or produced by, fermentation; fermenting; as, a *fermentative* process. **—fer·ment'a·tive-ly,** *adv.* **—fer·ment'a·tive-ness,** *n.*

fermentative dyspepsia. See DYSPEPSIA.

fer·men'tive (-mĕn'tĭv), *a.* Fermentative.

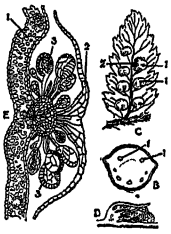
fer'ment oils. Volatile oils produced by the fermentation of plants, and not originally contained in them.

fer'ment·ol'o·gy (fûr'mĕn-tŏl'ō-jĭ), *n.* [*ferment* + *-logy*.] Science dealing with ferments and fermentation.

fer'mer·y (fûr'mĕr-ĭ), *n.* Also *farmery*. [OF. *enfermerie*.] An infirmary; esp., one of a religious house.

fer'me·ture (fûr'mē-tûr), *n.* [F., fr. *fermer* to close.] *Ordnance.* In breech-loading firearms, the breech-closing mechanism, or device, which resists the pressure toward the rear, and seals the chamber against escape of gas in that direction.

fern (fûrn), *n.* [AS. *fearn*; akin to D. *varen*, G. *farn*, *farnkraut*; cf. Skr. *parṇa* wing, feather, leaf, sort of plant, Lith. *papartis* fern, Russ. *paporot*, Ir. *raithneach*.] A plant of the order Filicales and phylum Pteridophyta; one of the higher cryptogams. Ferns resemble seed plants in being differentiated into root, stem, and leaves (fronds) and in having vascular tissue. In both cases the sporophyte or asexual generation is the conspicuous one. Ferns, however, produce no seeds, but by germination of the asexual spores borne on the fertile fronds (the sori containing them were known at one time as "fern fruits") they develop a distinct gametophyte (prothallium). This is a flat thalloid body bearing antheridia and archegonia on its surface; the egg of the archegonium, fertilized by a spermatozoid, gives rise to the young fern plant or sporophyte. Ferns differ greatly in habit and in the form and size of their fronds. In the majority, as the spleenworts (*Asplenium*), the stem consists only of a subterranean rootstock; but some tropical genera (*Alsophila, Cyathea*, etc.) have erect woody trunks and are known as *tree ferns*. The earliest fossil ferns occurred in the Devonian, and throughout the Carboniferous they were extremely abundant, dominating the flora of that age. Many fossil genera have been described. See FILICALES, PTERIDOPHYTA, and the names of the various leading genera.



Fern (*Dryopteris filix-mas*). *C* Single Pinnule showing Sori (1, 1 Indusium, 2, Sporangia); *D* Sorus. Longitudinal Section; *E* Sorus, Transverse Section (1 Leaf, 2 Indusium, 3 Sporangia); *B* Section of Rhizome (1, 1 Vascular Bundles).

fern ally. In general, any pteridophytic plant exclusive of members of the order Filicales; frequently, any plant of the family Marsileaceæ or of the family Salviniaceæ. The term is popularly applied to such plants as the horsetails, lycopods, etc., to distinguish them from the true ferns having a leafy habit. Cf. FERNWORT.

fern ball. A ball composed of the compacted growing rhizomes of several small ferns, principally species of *Davallia*, imported from Japan for use in house decoration.

fern'bird' (fûrn'bûrd'), *n.* A small passerine bird (*Sphenœacus punctatus*) of New Zealand which frequents marshy ground. It is a poor flyer, and is becoming rare, owing to the burning of the bush and draining of the swamps. There are several related species.

fern'brake' (-brāk'), *n.* **a** The common brake or bracken. **b** A dense growth or thicket of ferns.

fern'er·y (fûr'nĕr-ĭ), *n.*; -ERIES (-ĭz). An artificial plantation or collection of ferns.

fern moss. Any moss of the genus *Fissidens*.

fern owl. **a** The European goatsucker. **b** The short-eared owl. *Ireland.*

fern seed. The dustlike asexual spores of ferns, formerly taken for seeds, and reputed to render one who carried them invisible.

I think you are more beholding to the night than to *fern seed* for your walking invisible. *Shak.*

fern'wort' (fûrn'wûrt'), *n.* Any plant belonging to the Pteridophyta; a fern or fern ally.

fern'y (fûr'nĭ), *a.* Of, pert. to, or abounding in, ferns.

fe·ro'cious (fē-rō'shŭs), *a.* [L. *ferox*, *-ocis*, fierce, akin to *ferus* wild. See FIERCE.] Fierce; savage; cruel; indicating ferocity; as, *ferocious* look or features; a *ferocious* lion. **—fe·ro'cious·ly,** *adv.* **—fe·ro'cious·ness,** *n.*

It [Christianity] has abated the *ferociousness* of war. *Blair.*

Syn. — Barbarous, inhuman, brutal, merciless, pitiless, ruthless, remorseless, relentless, implacable, bloody, bloodthirsty, sanguinary, murderous, ravenous, rapacious, malignant, malevolent. — FEROCIOUS, FIERCE, SAVAGE, TRUCULENT, CRUEL, FELL. FEROCIOUS is always used in an unfavorable sense, and implies rapacity, wanton cruelty, or (frequently) formidable aspect; FIERCE suggests excessive vehemence, sometimes pitilessness, of temper or action; it may also express extreme eagerness or ardency; SAVAGE adds the implication of barbarity or inhumanity; as, "the lion, a *fierce* and *ferocious* animal" (*Sir T. Browne*); "Slow rose a form . . . shaking the horrors of his sable brows, and each *ferocious* feature grim with ooze" (*Pope*); "formidable and *ferocious* . . . scorn" (*Stevenson*); "Like a stag turning at bay, my naturally good temper grows *fierce* and dangerous" (*Scott*); "Liberty . . . keeps alive his *fierce* but noble fires" (*Cowper*); "Looking at this helpless old creature, something stronger than love took possession of Hannah — a spirit of *fierce* protection and faithfulness" (*Mary Wilkins*), "tame the *savage* spirit of wild war" (*Shak.*); "It [a speech of John Bright] was positively *fierce*, not to say *savage*" (*R. W. Dale*). TRUCULENT frequently suggests ostentatious ferocity; CRUEL implies indifference to the suffering of others, or even positive pleasure in it; FELL (now only poetical or rhetorical) connotes dire or baleful cruelty; as, "He [Carlyle's 'Hero'] must not lead mankind like a shepherd, but bark, bite, and otherwise worry them toward the fold like a *truculent* sheep dog" (*Lowell*); "her mouth *crueler* than a tiger's, colder than a snake's, and beautiful beyond a woman's" (*Swinburne*); "O Spartan dog, more *fell* than anguish, hunger, or the sea!" (*Shak.*); "[a] *fell* trap of destiny" (*W. Pater*). See BARBARIAN, *a.*

fe·roo'i·ty (fē-rŏo'ĭ-tĭ), *n.* [L. *ferocitas*, fr. *ferox*, *-ocis*, fierce: cf. F. *férocité*. See FEROCIOUS.] Savage wildness or fierceness; fury; cruelty; as, *ferocity* of countenance.

The pride and *ferocity* of a Highland chief. *Macaulay.*

fer·o'her (fĕr-ō'hĕr), *n. Archæol.* A symbol in the form of a winged disk, with or without a man's (or god's) figure therein, found on ancient Assyrian, Babylonian, and Persian monuments. It is especially the symbol of the Assyrian god Ashur. The name *feroher* is given to it on the supposition that (in Persian monuments) it is a representation of the *fravashi* (which see). An analogous winged disk, which some authorities consider the source of the device, is found on Egyptian monuments. See ASHUR, *Illust.*

Fe·ro'ni·a (fē-rō'nĭ-ă), *n.* [L.] **1.** *Rom. Relig.* An ancient Italian goddess, apparently a protectress of freedmen and of markets. Her cult was introduced into Rome (previous to 217 B. C.), probably from Capena, where was her most famous temple, plundered by Hannibal 211 B. C.

2. [NL.] *Bot.* A monotypic genus of Asiatic rutaceous trees. *F. elephantum* is the elephant apple.

fer-ous (-fĕr-ŭs). [L. *-fer*, fr. *ferre* to bear: cf. F. *-fère*. See BEAR to support.] A suffix signifying *bearing, producing, yielding*; as, auri*ferous*, yielding gold; chyli*ferous*, producing chyle. It forms derivatives freely with any Latin stems, always after *i* as a stem or connecting vowel; as, cruci*ferous*, odori*ferous*.

☞ The reference "See *-ferous*" is sometimes given as the only definition of a word ending in *-ferous*, if its meaning can readily be gathered from the definitions of the suffix and the root word.

Fer·ran'ti ca'bles (fĕr-răn'tĭ), **Ferranti mains.** *Elec.* A form of conductor, designed by Ferranti, for carrying currents of high potential, and consisting of concentric tubes of copper separated by an insulating material composed of paper saturated with black mineral wax.

Fer·ran'ti ef·fect' *or* **phe·nom'e·non.** *Elec.* An increase in the ratio of transformation of an alternating-current transformer, accompanied by other electrical changes occurring when the secondary of the transformer is connected with a condenser of moderate capacity. It was first observed in connection with the Ferranti cables in London.

Fer·ra'ra (fĕr-rä'rä), *n.* A broadsword or claymore bearing the name of Ferrara on the blade. These swords were highly esteemed in England and Scotland in the 16th and 17th centuries, and are thought to have been made by Andrea Ferrara of Italy and members of his family.

Fer·ra'ri's so·lu'tion (fĕr-rä'rēz). *Math.* The solution of the general biquadratic equation obtained by the Italian Luigi Ferrari (1522–65). Cf. DESCARTES'S SOLUTION.

fer'rate (fĕr'āt), *n.* [L. *ferrum* iron.] A salt of ferric acid.

fer'ra·tin (-ă-tĭn), *n.* [L. *ferrum* iron.] *Chem.* A ferruginous nucleoproteid or proteid mixture, found in the liver.

fer're·ous (-ē-ŭs), *a.* [L. *ferreus*, fr. *ferrum* iron. Cf. FARRIER.] Of, like, or containing, iron. *Obs. or R.*

fer'ret (fĕr'ĕt; -ĭt; 151), *n.* [It. *fioretto*, dim. of *fiore* flower; cf. F. *fleuret*. Cf. FLORET.] A kind of narrow tape, orig. of silk, but now of cotton or wool; — called also *ferreting*.

fer'ret, *n.* [F. *furet*, OF. also *fuiret*; cf. LL. *furo*; prob. dim. fr. L. *fur* thief (cf. FURTIVE).] **1.** An animal of

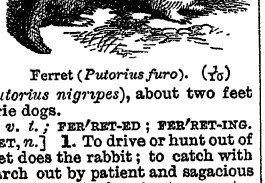
fer'rer, fer'ror. † *farrer*, obs. or Scot. compar. of FAR.

fer'rest. Obs. superl. of FAR.

fer'ret, *n.* [F. *ferret*, dim. of *fer* iron, L. *ferrum*.] *Glass Making.* The iron used for trying the

the weasel family (*Putorius furo*) closely related to, and perhaps a domesticated variety of, the polecat (*Putorius putorius*). It is about fourteen inches long, of a pale yellow or white color, with red eyes. It is a native of Africa, but is kept in Europe and America for hunting rabbits and sometimes rats.



Ferret (*Putorius furo*). (⅓)

2. In the western United States, a black-footed, brown-bodied weasel (*Putorius nigripes*), about two feet long, which devours prairie dogs.

fer'ret (fĕr'ĕt; -ĭt; 151), *v. t.*; FER'RET-ED; FER'RET-ING. [Cf. F. *fureter*. See FERRET, *n.*] **1.** To drive or hunt out of a lurking place, as a ferret does the rabbit; to catch with ferrets; to search; to search out by patient and sagacious efforts; — often used with *out*; as, to *ferret* out a secret.

2. To hunt; to worry; to hunt in or over with a ferret.

fer'ret, *v. i.* To hunt with ferrets; to search about; to worry.

fer-ret'to (fĕ-rĕt'ō), *n.* [It *ferretto* di Spagna, dim. of *ferro* iron, fr. L. *ferrum*.] Copper sulphide, used to color glass.

fer'ret-y (fĕr'ĕt-ĭ), *a.* Of, like, or pertaining to, a ferret.

fer'ri- (fĕr'ĭ-). *Chem.* A combining form indicating *ferric iron* as an ingredient; as, *ferricyanide*.

fer'ri-age (fĕr'ĭ-ĕj), *n.* [From FERRY.] The price or fare to be paid for passage at a ferry; conveyance over a ferry.

fer'ric (fĕr'ĭk), *a.* [L. *ferrum* iron: cf. F. *ferrique*. See FARRIER.] Pertaining to, derived from, or containing, iron. Specif., *Chem.*, denoting those compounds in which iron has a higher valence than in the *ferrous* compounds, or iron with such a valence; as, *ferric* oxide, *ferric* acid.

ferric acid, an acid, H_2FeO_4, not known in the free state, but obtained in the form of a red crystalline salt, potassium ferrate, by fusing a mixture of iron and saltpeter. — **f. chloride,** a compound, $FeCl_3$, obtained in anhydrous form as dark green lustrous crystals by heating iron in chlorine. It forms stable hydrates with four, five, seven, and twelve molecules of water, and yields a reddish brown aqueous solution. An alcoholic solution of it is used in medicine as *tincture of iron*. — **f. hydroxide,** any of several compounds of ferric iron, oxygen, and hydrogen, occurring in rust, and as the mineral limonite (typically $H_6Fe_4O_9$ or $2Fe_2O_3{\cdot}3H_2O$) or prepared artificially, as by the addition of ammonia to a solution of ferric chloride. In the latter case a brown gelatinous precipitate is formed which can be dried to an amorphous granular mass. — **f. oxide,** a compound, Fe_2O_3, occurring in nature as the mineral hematite and obtained as an amorphous reddish powder by heating copperas, ferric sulphate, or ferric hydroxide. — **f. sulphate,** a compound, $Fe_2(SO_4)_3$, forming colorless crystals containing nine molecules of water. These occur in nature as coquimbite. — **f. sulphocyanate,** a dark red crystalline substance usually obtained in a blood-red solution, and recognized as a test for ferric iron.

fer'ri-cy-an'ic (fĕr'ĭ-sĭ-ăn'ĭk), *a.* [*ferri-* + *cyanic.*] *Chem.* Pertaining to or designating a brown crystalline acid, $H_3Fe(CN)_6$, obtained by treating ferricyanides with strong acids. It decomposes easily.

fer'ri-cy'a-nide (-sĭ'ă-nīd; -nĭd; 184), *n. Chem.* A salt of ferricyanic acid. These salts are also represented as double cyanides of ferric iron and some basic element or radical.

fer'ri-cy-an'o-gen (-sĭ-ăn'ō-jĕn), *n.* [*ferri-* + *cyanogen.*] *Chem.* The trivalent radical, $Fe(CN)_6$, of ferricyanic acid and the ferricyanides.

fer-rif'er-ous (fĕ-rĭf'ẽr-ŭs), *a.* [L. *ferrum* iron + *-ferous.*] Containing iron; iron-bearing.

Fer'ris wheel (fĕr'ĭs). An amusement device consisting of a giant power-driven steel wheel, revolvable on its stationary axle, and carrying a number of balanced passenger cars around its rim; — so called after G. W. G. Ferris, American engineer, who erected the first of its kind for the World's Columbian Exposition in Chicago in 1893.

fer'rite (fĕr'īt), *n.* [L. *ferrum* iron + *-ite.*] **1.** *Micros.* **a** In rocks, any yellowish, reddish, or brownish amorphous substance apparently consisting of iron compounds, but not certainly referable to a particular mineral. **b** In iron and steel, pure metallic iron. Three allotropic forms are recognized, and called *α-*, *β-*, and *γ-ferrite*. The first is magnetic and is stable below 850° C.; above that temperature the stable form is the nonmagnetic *β*-ferrite.

2. *Chem.* Any of several compounds which may be regarded as metallic derivatives of the ferric hydroxide $Fe_2O_3(OH)_2$, analogous to aluminates; as, franklinite is zinc *ferrite*.

fer'ro- (fĕr'ō-). A combining form indicating: **a** In general, *presence of*, or *connection with*, *iron*; as, *ferro*nickel, an alloy of iron and nickel; *ferro*silicon, *ferro*type. **b** Specif., *Chem.*, *ferrous iron* as an ingredient; as, *ferro*cyanide.

fer'ro-al-loy', *n.* An alloy of iron with some other metal; as, ferrochrome and ferromanganese are *ferro-alloys*.

fer'ro-al'u-min'i-um (-ăl'ū-mĭn'ĭ-ŭm), *or* **fer'ro-a-lu'mi-num** (-ă-lū'mĭ-nŭm), *n.* An alloy of iron and aluminium. It is sometimes added to molten steel to insure sound castings.

fer'ro-cal'cite (-kăl'sīt), *n. Min.* Calcite containing ferrous carbonate. It turns brown on exposure.

fer'ro-chrome (fĕr'ō-krōm) } *n.* An alloy of iron and
fer'ro-chro'mi-um (-krō'mĭ-ŭm) } chromium. It is used in steel making.

fer'ro-con'crete (fĕr'ō-kŏn'krēt), *n. Arch. & Engin.* Concrete strengthened by a core or foundation skeleton of iron or steel bars, strips, etc. Floors, columns, piles, water pipes, etc., have been successfully made of it. Called also *armored concrete*, *concrete steel*, and *rēēnforced concrete*.

fer'ro-cy-an'ic (fĕr'ō-sĭ-ăn'ĭk), *a.* [*ferro-* + *cyanic.*] *Chem.* Pertaining to or designating a white crystalline acid, $H_4Fe(CN)_6$, obtained by treating ferrocyanides with acids. It decomposes in moist air.

fer'ro-cy'a-nide (fĕr'ō-sī'ă-nīd; -nĭd; 184), *n. Chem.* A salt of ferrocyanic acid. These salts are also represented as double cyanides of ferrous iron and some basic element or radical.

fer'ro-cy-an'o-gen (-sĭ-ăn'ō-jĕn), *n.* [*ferro-* + *cyanogen.*] *Chem.* The quadrivalent radical, $Fe(CN)_6$, of ferrocyanic acid and the ferrocyanides.

fer'ro-in-clave' (fĕr'ō-ĭn-klāv'), *n. Arch.* Sheet metal with dovetailed corrugations used as a foundation for cement, plaster, etc., in construction work.

fer'ro-mag-ne'sian (-măg-nē'shăn), *a. Min.* Containing iron and magnesium.

fer'ro-mag-net'ic (-măg-nĕt'ĭk), *a. Physics.* **a** Formerly, paramagnetic, as distinguished from diamagnetic and also from magnetic as relating to animal magnetism. **b** Now, usually, magnetic in a high degree, like iron, nickel, and cobalt; — distinguished from *paramagnetic*. — **fer'ro-mag'net-ism** (-măg'nĕt-ĭz'm), *n.*

fer'ro-man'ga-nese (-măn'gă-nēz; -măn'gă-nēs'), *n. Metal.* An alloy of iron and manganese usually containing 25–85 per cent of manganese and several per cent of carbon. Cf. SPIEGELEISEN.

fer'ro-mo-lyb'de-num (-mō-lĭb'dē-nŭm), *n.* An alloy of iron and molybdenum, used in steel making.

fer'ro-nick'el (-nĭk'ĕl), *n.* An alloy of iron and nickel.

fer'ro-sil'i-con (-sĭl'ĭ-kŏn), *n.* An alloylike substance consisting of iron and silicon. It is added to molten iron to increase the percentage of silicon.

fer-ro'so- (fĕ-rō'sō-). [See FERROUS.] *Chem.* = FERRO-.

fer-ro'so-fer'ric oxide, a black magnetic iron oxide, Fe_3O_4, occurring in nature as magnetite, and prepared artificially in various ways, as by heating iron in steam.

fer'ro-so'di-um (fĕr'ō-sō'dĭ-ŭm), *n.* An alloy of iron and sodium, used in steel making.

fer'ro-ti-ta'ni-um (-tī-tā'nĭ-ŭm), *n.* An alloy of iron and titanium, used in steel making.

fer'ro-tung'sten (-tŭng'stĕn), *n.* An alloy of iron and tungsten, used in steel making.

fer'ro-type (fĕr'ō-tīp), *n.* A photographic picture taken on a thin iron plate by a collodion process; also, the process itself; — familiarly called *tintype* — **fer'ro-typ'er** (-tīp'ẽr), *n.*

fer'rous (-ŭs), *a.* [L. *ferrum* iron: cf. F. *ferreux*. See FARRIER.] Pertaining to, or derived from, iron; — in *Chem.* said esp. of iron compounds in which the metal is bivalent or of the iron with that valence. See PETROGRAPHY.

ferrous carbonate, a compound, $FeCO_3$, occurring native as the mineral siderite, and also prepared artificially as a white, easily oxidizable precipitate. — **f. chloride,** a compound, $FeCl_2$, obtained in anhydrous form as colorless or white crystalline scales by heating iron in hydrochloric acid gas. With four molecules of water it forms pale green transparent crystals which oxidize readily. — **f. hydroxide,** a compound, $Fe(OH)_2$, obtained as a pale green gelatinous precipitate by the addition of an alkali to a ferrous salt solution. It readily oxidizes to brown ferric hydroxide. — **f. oxide,** a compound, FeO, obtained as a readily oxidizable gray powder by heating ferric oxide in hydrogen. — **f. sulphate,** a compound, $FeSO_4$ or H_2FeSO_5, best known in the form of a hydrate called copperas. See COPPERAS. It readily oxidizes to ferric sulphate. — **f. sulphide,** a compound, FeS, obtained as a black precipitate by the addition of an alkaline sulphide to the solution of an iron salt, and as heavy brittle masses by heating iron and sulphur together. It is used in making hydrogen sulphide.

fer'ro-va-na'di-um (fĕr'ō-vă-nā'dĭ-ŭm), *n.* An alloy of iron and vanadium, used in steel making.

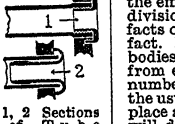
fer-ru'gi-nate (fĕ-rōō'jĭ-nāt), *v. t.*; -NAT'ED (-nāt'ĕd); -NAT'ING (-nāt'ĭng). [See FERRUGINOUS.] To charge or stain, as a rock, with a compound of iron; to impart the color or properties of iron rust to. — **fer-ru'gi-na'tion** (-nā'shŭn), *n.*

fer-ru'gi-nous (-nŭs), *a.* [L. *ferruginus*, *ferrugineus*, fr. *ferrugo*, *-ginis*, iron rust, fr. *ferrum* iron: cf. F. *ferrugineux*.] **1.** Of, pertaining to, or containing, iron.

2. Resembling iron rust in appearance or color; brownish red, or yellowish red.

fer'rule (fĕr'ōōl; -rĭl; 277), *n.* [Formerly *verrel*, F. *virole*, fr. LL. *virola*, L. *viriola* little bracelet, dim. of *viriae*, pl., bracelets. The spelling with *f* is due to confusion with L. *ferrum* iron.] **1.** A ring or cap of metal put round a cane, tool handle, or similar object, to strengthen it, or prevent splitting and wearing.

2. a *Steam Boilers.* A bushing of wood or copper alloy used for making a steam-tight joint between the end of a steam, water, or condenser tube and a tube plate. **b** *Mech.* The small pulley around which the string of a bow is coiled to rotate it, as in a bow drill. **c** *Metal., etc.* The water-cooled metal tube surrounding a carbon in an electric furnace. **d** *Plumbing.* A kind of connection between a water main and a communication or service pipe.



1, 2 Sections of Tube Plates and Tubes, showing types of Ferrule, 2 a.

fer'rule, *v. t.* To supply with a ferrule.

fer-ru'mi-nate (fĕ-rōō'mĭ-nāt), *v. t.*; -NAT'ED (-nāt'ĕd); -NAT'ING (-nāt'ĭng). [L. *ferruminatus*, p. p. of *ferruminare*, fr. *ferrumen* cement, fr. *ferrum* iron.] To solder or unite, as metals. *Rare. Coleridge.* — **fer-ru'mi-na'tion** (-nā'shŭn), *n. Rare.*

fer'ry (fĕr'ĭ), *n.*; *pl.* -RIES (-ĭz). [ME. *feri*; akin to Icel. *ferja*, Sw. *färja*, Dan. *færge*, G. *fähre*. See FERRY, *v. t.*]

1. A place of crossing. *Obs.*

2. A place or passage where persons or things are carried across a river, arm of the sea, etc., in a boat.

> To row me o'er the *ferry*. *Campbell.*

3. A vessel in which passengers and goods are conveyed over narrow waters; a ferryboat; wherry. *Archaic.*

4. A franchise or right to carry passengers or goods, or both, from shore to shore across a river, channel, or narrow body of water, charging tolls; also, provision for regularly so transporting such passengers or goods. Legally, a ferry is a continuation of the highway, and under the same general control. Any one operating a ferry is a common carrier.

fer'ry (fĕr'ĭ), *v. t.*; FER'RIED (-ĭd); FER'RY-ING. [ME. *ferien* to convey, AS. *ferian*, fr. *fær* a journey; akin to Icel. *ferja* to ferry, Goth. *farjan* to sail. See FARE, *n.*] **1.** To carry; transport. *Obs.*

2. To carry or transport over a river, strait, or other narrow water or, formerly, over the sea, in a boat.

3. To propel (a boat) across a body of water.

fer'ry, *v. i.* To pass over water in a boat or by a ferry.

> They *ferry* over this Lethean sound
> Both to and fro. *Milton.*

fer'ry-boat' (-bōt'), *n.* A vessel for conveying passengers, merchandise, etc., across a river or other narrow water.

ferry bridge. **1.** A ferryboat adapted in its structure for the transfer of railroad trains across a river or bay.

2. A floating or hanging structure hinged or movably fastened to a wharf to facilitate passing on or off a ferryboat.

fer'ry-man (fĕr'ĭ-măn), *n.*; *pl.* -MEN (-mĕn). One who maintains or attends a ferry.

fer'tile (fûr'tĭl; -tīl, 182), *a.* [L. *fertilis*, fr. *ferre* to bear, produce: cf. F. *fertile*. See BEAR to support.] **1.** Producing fruit or vegetation in abundance; fruitful; able to produce abundantly; prolific; fecund; productive; rich; inventive; as, *fertile* land or fields; a *fertile* mind.

> Though he in a *fertile* climate dwell. *Shak.*

2 *Bot.* **a** Capable of producing fruit; fruit-bearing; as, *fertile* flowers or trees. **b** Containing pollen; — said of anthers. **c** Developing spore-bearing organs; as, a *fertile* frond; — said of cryptogamous plants.

3. Produced in abundance; plenteous; ample. *Obs.*

> The *fertile* burden . . .
> Of thy full branches. *Milton.*

4. **a** As applied to seeds or eggs, capable of growing or developing. **b** Capable of breeding, or producing offspring.

5. Causing fertility; promoting production or fecundity.

6. *Beekeeping.* Pregnant.

Syn. — Fecund, teeming, exuberant, rich, productive, abundant, plentiful. — FERTILE, FRUITFUL, PROLIFIC. In a lit. sense, that is FERTILE (esp. soil) which has the inherent power of producing; that is FRUITFUL (esp. plants, trees, and fields) which actually does produce; that is PROLIFIC (esp. animals) which produces frequently or abundantly; as, soil *fertile* by nature may be made *fruitful* by cultivation, a *fruitful* orchard, *prolific* as a frog. Fig., corresponding distinctions apply; as, "In him [Dr. Johnson] were united a most logical head with a most *fertile* imagination" (*Boswell*); "Certain poems . . . may be as *fruitful* of thoughts and emotions too deep for words as a shaken prism is *fruitful* of tinted lights" (*T. Watts-Dunton*); "Flattery is the *prolific* parent of falsehood" (*Gibbon*). See PLENTIFUL, PROFUSE, RICH.

— **fer'tile-ly,** *adv.* — **fer'tile-ness,** *n.*

fer-til'i-ty (fẽr-tĭl'ĭ-tĭ), *n.* [L. *fertilitas*: cf. F. *fertilité*.] **1.** State or quality of being fertile; fruitfulness; productiveness; fecundity; richness; abundance of resources; fertile invention; quickness; readiness; as, *fertility* of imagination; also, a quality that renders fertile; a productive power; as, the *fertilities* of the soil.

> Thy very weeds are beautiful; thy waste
> More rich than other climes' *fertility*. *Byron.*

2. *Econ.* Specif., of soil, capacity for production under favorable conditions; — used variously, sometimes as including all the advantages for producing for a given market, sometimes as referring only to the natural powers of the soil and climate.

fer'ti-li-za'tion (fûr'tĭ-lĭ-zā'shŭn; -lī-zā'shŭn), *n.* **1.** Act or process of rendering fertile.

2. *Biol.* The union of a male germ cell with the female germ cell or egg; fecundation; impregnation. It is a process preliminary to and essential to the development of most eggs, and may be defined as a form of conjugation in which there is a marked distinction of sex between the two germ cells or gametes taking part in the process. The much smaller motile male cell (*spermatozoön* in animals, *sperm*, *spermatozoid*, or *antherozoid* in plants) penetrates and fuses with the much larger nonmotile female cell (or *egg*), which thus comes to have two nuclei, one its own, the other that of the male cell. The essential part of the process then follows, the union of the two nuclei, or the grouping together of their essential substance (the chromatin) into a single mitotic figure. In either case the result is that the nucleus, or mitotic figure, of the fertilized egg contains chromatin from both parents. As the cells of the embryo are derived from the fertilized egg by mitotic division, the same is true of them also, and many of the facts of inheritance are probably to be explained by this fact. Moreover, the number of chromosomes (or small bodies into which the chromatin is aggregated) derived from each parent is the same, and is one half the usual number in order that after fertilization the egg may have the usual number. The fertilization of the egg may take place after it is laid, or in the mother's body. Some eggs will develop without a process of true fertilization (see PARTHENOGENESIS), others will begin development as a result of chemical stimulation. In plants, fertilization is confined to the gametes of the sexual generation. When these are similar the process is called conjugation. The normal product of fertilization is a zygote, which gives rise to the asexual generation. In the higher algæ, mosses, ferns, and some gymnosperms the motile, ciliated sperm finds its way by chemotropism through a water medium to the egg. In seed plants the sperm is nonmotile, and fertilization is accomplished by means of a tube (pollen tube) which penetrates the megaspore (ovule) and discharges the male pronucleus. In these plants the fertilized egg, with its investments, is known as a seed.

3. *Bot.* Incorrectly, the process of pollination in seed plants. See POLLINATION.

fertilization tube. *Bot.* **a** In certain phycomycetous fungi, a tube emitted by the antheridium which pierces the oogonium, conveying to it the male sex cells. **b** In some of the higher red algæ, a similar tube emitted by the trichophore which fertilizes the carpogonium.

fer'ti-lize (fûr'tĭ-līz), *v. t.;* FER'TI-LIZED (-līzd); FER'TI-LIZ'ING (-līz'ĭng). [Cf. F. *fertiliser.*] **1.** To make fertile or enrich; to supply with nourishment for plants; to make fruitful or productive; as, to *fertilize* land.

2. To pollinate (a flower).

fer'ti-liz'er (-līz'ẽr), *n.* One that fertilizes; specif.: **a** The agent that carries the fertilizing principle, as a moth to an orchid. **b** That which renders fertile; specif., a commercial manure for land, as guano, phosphate of lime, bone dust, etc., esp. one artificially prepared.

fer'u-la (fĕr'ōō-lȧ), *n.; pl.* -LÆ (-lē). [L. *ferula* giant fennel (its stalks were used in punishing schoolboys), rod, whip; cf. *ferire* to strike. Cf. FERULE.] **1.** [*cap.*] *Bot.* A very large genus of Old World apiaceous plants, mostly of large size, with deeply divided leaves, compound umbels of yellow flowers, and membranous-winged fruit with three threadlike ridges. They yield various medicinal gum resins, as galbanum and asafetida. A few species are cultivated. See ASAFETIDA, GALBANUM, NARTHEX.

2. A ferule; a rod; hence, school discipline. *Beau. & Fl.*

3. A straight wand of command, or scepter; esp., the imperial scepter in the Byzantine, or Eastern, Empire.

fer'ule (fĕr'ōōl; -ĭl; 277), *n.* [L. *ferula:* cf. F. *férule.* See FERULA.] **1.** The giant fennel. *Obs.*

2. A piece of wood, often flat, as a ruler, used for striking children, esp. on the hand, in punishment.

fer'ule, *v. t.;* FER'ULED (-ōōld; -ĭld); FER'UL-ING. To punish with a ferule.

fe-ru'lic (fē-rōō'lĭk), *a. Chem.* Pertaining to or designating a white crystalline acid, $C_{10}H_{10}O_4$, obtained from asafetida and other species of *Ferula,* and related to vanillin.

fer'ven-cy (fûr'vĕn-sĭ), *n.* [Cf. OF. *fervence.* See FERVENT.] **1.** State of being fervent, or hot; intensity of heat; ardor; warmth of feeling or devotion; eagerness.

When you pray, let it be with *fervency.* *Wake.*

2. Bitterness; severity; — said of cold. *Obs.*

fer'vent (-vĕnt), *a.* [F. *fervent,* L. *fervens, -entis,* p. pr. of *fervere* to be boiling hot, to boil, glow.] **1.** Hot; glowing; boiling; burning; as, a *fervent* summer.

The elements shall melt with *fervent* heat. 2 *Pet.* iii. 10.

2. Bitter; intense; — said of cold. *Obs.*

3. Warm in feeling; ardent in temperament; earnest; full of fervor; zealous, glowing.

Not slothful in business; *fervent* in spirit. *Rom.* xii. 11.

4. Fierce; savage; raging; as, a *fervent* beast. *Obs. or R.*

A moment ends thy *fervent* din. *Wordsworth.*

Syn. — Hot, burning, fiery, glowing, vehement, impassioned, passionate, intense, eager, keen, zealous, fierce. — FERVENT, FERVID, ARDENT. FERVENT suggests great warmth or earnestness of feeling (esp. as manifested in zeal, piety, aspiration, and the like); FERVID is stronger, and expresses vehement, impassioned, or (often) overheated feeling (esp. with reference to imagination, eloquence, and the like); ARDENT connotes eagerness and fine enthusiasm in whatever cause, as, "The effectual *fervent* prayer of a righteous man availeth much" (*James* v. 16); "*fervent* zeal" (*Daniel*), "*fervent* faith" (*A. Tucker*); "Modern poets . . . strive to replace the rapture of the mind with a *fervid* intensity of phrase" (*Lowell*), "The magic caldron of a *fervid* and ebullient fancy, constantly fueled by an unexampled opulence of language" (*Coleridge*); "Both had from nature an *ardent* impulse for seeking the genuine truth on all matters they thought about" (*M. Arnold*); "A taste for letters, and a fine, *ardent,* modest, youthful soul" (*Stevenson*). See FERVOR, EAGERNESS, IMPETUOUS, ENTHUSIAST.

fe'tish-ism, fe'tich-ism (fē'tĭsh-Iz'm; fĕt'ĭsh-), *n.* [Cf. F. *fétichisme.*] Devotion to or belief in fetishes; the practice of fetish worship; also, the religious or intellectual stage in which this is characteristic.
Comte described the mental attitude of early man towards religion as "pure *fetishism*, constantly characterized by the free and direct exercise of our primitive tendency to conceive all external bodies soever, natural or artificial, as animated by a life essentially analogous to our own, with mere differences of intensity." His authority, combined with the natural attractions of a cleanly cut definition, gave wide currency to this extended sense of the word, and it is only of late years that it has been confined to the particular class of superstitions to which the Portuguese explorers originally applied it. In the light of our present knowledge *fetishism* may be defined as the worship of tangible inanimate objects believed to possess in themselves some kind of mysterious power. *Census of India*, 1901.

fe'tish-ist, fe'tich-ist, *n.* A believer in fetishes.

fe'tus, fœ'tus (fē'tŭs), *n.* [L. *fetus, foetus*, a bringing forth, brood, offspring, young ones; cf. *fetus* fruitful, fructified, that is or was filled with young; akin to E. *faun* a deer, and prob. to *be, future.*] The young or embryo of an animal in the womb, or in the egg; — commonly restricted to the young in the later stages of development in the womb or egg, in man often from the end of the fifth week until birth, *embryo* being applied to the earlier stages. The term is used chiefly of vertebrate animals.

feu (fū), *n.* [OF. *feu, fieu*, fief. See 2d FEUD, FEE, FIEF.] *Scots Law.* **a** A fee, or feudal benefice. See FEE, *n.* **b** A tenure where the vassal, in place of military services, makes a return in grain or in money; — opposed to *ward*, or military holding, and *blanch*, or holding at a nominal rent; also, a grant of land to be so held; hence, inaccurately, a perpetual lease for a fixed rent. = FEU-FARM. Cf. EMPHYTEUSIS. **c** A piece of land held under one of these tenures.

feu, *v. t.*; FEUED (fūd); FEU'ING. *Scots Law.* To grant (land) upon feu.

feu'ar (fū'ăr), *n.* *Scots Law.* One who holds a feu.

feud (fūd), *n.* [An alteration of ME. *feude*, fr. OF. *faide, feide*, of G. origin; cf. OHG. *fêhida*, G. *fehde*, akin to AS. *fæhð*, fr. *fâh* hostile. See FOE.] **1.** Enmity; hostility. *Obs.*
2. A contention or quarrel; bitter mutual ill feeling and hostility; esp., an inveterate strife between families, clans, or parties marked by bloodshed and by alternate outrages in the guise of revenge for former injuries. Cf. VENDETTA.
Syn. — Affray, fray, broil, contest, dispute, strife.

feud, feod (fūd), *n.* Also, Lat. form, *feudum, feodum.* [LL. *feudum, feodum*, prob. of same origin as E. FEE a fief. The *d* in LL. has not been satisfactorily explained. See FEE a fief.] *Law.* A fee, or feudal benefice; a fief (see FEE). In England *feud* (or L. *feum, feudum*, or *feodum*) was very early, if not from the first, used to denote a heritable though dependent right, but on the Continent the term had been interchangeable with the precarious benefice. The Norman conquest of England took place at a time when the transition of the beneficium (held at the lord's will) to the heritable feodum had gone so far that little difference was felt between the feud and the alodium, or fullest ownership possible, but the trait of precariousness still survived in the ease with which the land was forfeitable to the lord.

feu'dal (fū'dăl), *a.* [F. *féodal*, or LL. *feudalis.*] **1.** Of, pertaining to, or of the nature of, feuds, fiefs, or fees; as, *feudal* rights or services; *feudal* tenures.
2. Of or pertaining to the tenure by which feuds or fiefs are held; founded upon or involving the relation of lord and vassal with tenure of land in feud; as, the *feudal* polity; *feudal* arrangement.
3. Of or pertaining to the feudal system; as, *feudal* law; *feudal* writers; *feudal* period.
feudal system, the system of polity which prevailed in Europe in the Middle Ages, based upon the relation of lord to vassal, with the holding of land in feud; feudalism (which see). Although the system of feudal tenure was abolished by 12 Car. II. c. 24, the principles of the system still remain as the foundation of the English and American law of real property. The principal incidents of the feudal system of England and Europe in general were homage, the service of the tenants (including military service and court service), wardship, marriage, reliefs, aids, escheat, and forfeiture. The principal classes of the people were nobles, or lords, the clergy, and the peasantry, both free and unfree. In England, at least, all the land was in theory held of the king; those holding directly from him were tenants **in capite**, or **in chief**, and other lords holding of them as tenants or subtenants were called **mesne lords.**

feu'dal-ism (fū'dăl-Iz'm), *n.* [Cf. F. *féodalisme.*] The feudal system, or the principles, or relations and usages, on which it was based. Besides the landholding relationship involved in the feud or fee (to which the term *feudalism* primarily referred), feudalism was characterized also by the relationship of lord and vassal and the merging of public in private law so that office, jurisdiction, and even kingship, are forms of property (cf. PRECARIUM, BENEFICIUM, FEUD, COMMENDATION, LIEGE, LORD, VASSAL, etc.). Feudalism reached its highest development during the period from the 9th to the 14th or 15th century, during which time it prevailed in France, Italy, Germany, and England. With the rise of modern institutions in the 14th century it began its decline, until it has now disappeared except for certain customs (as escheat to the lord, incidents of copyhold tenure, etc.) that still exercise considerable influence.

feu'dal-ist, *n.* A representative or upholder of feudalism.

feu'dal-is'tic (fū'dăl-Is'tĭk), *a.* Of or pert. to feudalism or feudalists; characteristic of, or inclining to, feudalism.

fi'bered, fi'bred (fī'bẽrd), *a.* Having, or made up of, fibers.

fiber, *or* fibre, plant. Any plant yielding a fiber useful in the arts, as hemp, ramie, jute, etc. Cotton, though commonly so called, is not strictly a fiber plant, as the commercial product consists of the hairy tuft of the seeds and not of the bast fibers of the stem.

fi'bril (fī'brĭl), *n.* [NL. *fibrilla,* dim. of L. *fibra* fiber: cf. F. *fibrille.*] A small thread or fiber, as one of the fine threads into which the substance of a striated muscle fiber may be longitudinally split after treatment with alcohol; specif.: *Bot.* **a** A root hair. **b** A threadlike outgrowth of the thallus in lichens.

fi'bril-lar (fī'brĭl-ẽr) } *a.* Of, pertaining to, or like, fibrils
fi'bril-la-ry (-ă-rY) } or fibers; as, *fibrillar* twitchings.

fi'bril-late (fī'brĭl-āt) } *a.* [From NL. *fibrilla.*] Having a
fi'bril-lat'ed (-āt'ĕd) } fibrous structure; furnished with fibrils; fringed. — **fi'bril-la'tion** (-ā'shŭn), *n.*

fi'bril-lose (fī'brĭl-ōs; fī-brĭl'ōs), *a. Bot.* Furnished with fibrils, or hairlike appendages. — **fibrillose mycelium,** mycelium in which the hyphæ unite in branching strands.

fi'brin (fī'brĭn), *n.* [Cf. F. *fibrine.* See FIBER.] *Physiol. Chem.* **1.** **a** A white insoluble fibrous proteid, formed from fibrinogen by the action of thrombin, esp. in the clotting or coagulation of the blood. Fibrin is readily digestible in gastric and pancreatic juice. **b** Gluten; — called specif. *plant* or *vegetable fibrin.* See GLUTEN, 3.
2. That which remains after washing lean beef or other meat with water until all coloring matter is removed.

fi'bri-na'tion (fī'brĭ-nā'shŭn), *n. Med.* State of acquiring or having an excess of fibrin.

fi'brin-o- (fī'brĭn-ō-). Combining form for *fibrin.*

fi-brin'o-gen (fī-brĭn'ō-jĕn; fī'brĭn-ō-jĕn'), *n.* [*fibrino-* + *-gen.*] *Physiol. Chem.* A soluble proteid existing in the blood, and in other animal fluids, which by the action of fibrin ferment, or thrombin, yields the insoluble substance fibrin, thus producing coagulation.

fi'brin-o-gen'ic (-nō-jĕn'Ik), *a. Physiol. Chem.* Possessed of properties similar to fibrinogen; capable of forming fibrin.

fi'brin-ous (fī'brĭn-ŭs), *a.* Having, or partaking of the properties of, fibrin; as, *fibrinous* exudation.

fi'bro- (fī'brō-). A combining form used in anatomy, physiology, etc., to indicate *connection with,* or *relation to, fibrous structure, fibrous tissue,* or *connective tissue.*

fi'bro-car'ti-lage (fī'brō-kär'tĭ-lāj), *n. Anat.* A form of cartilage in which the matrix (except immediately about the cells) is largely composed of fibers like those of ordinary connective tissue; also, a structure or part composed of such cartilage. Fibrocartilage occurs around the margins of articular surfaces and within certain joints, in symphyses, and in the intervertebral disks. (The above is the ordinary meaning of the word. In a broad sense *elastic cartilage* (which see) is also a form of fibrocartilage.) — **fi'bro-car'ti-lag'i-nous** (-lăj'Y-nŭs), *a.*

fi'broid (fī'broid), *a.* [*fibro-* + *-oid.*] Resembling, or forming, fibrous tissue; made up of fibers; as, *fibroid* tumors. — *n.* A fibroid tumor; a fibroma.

fibroid phthisis, *Med.,* a form of pulmonary consumption associated with the formation in the lungs of fibrous tissue, the contraction of which draws in and flattens the chest wall. — **f. pneumonia,** *Med.,* a chronic form of pneumonia marked by inflammation of the interstitial connective tissue lying between the lobules of the lungs.

fi'bro-in (fī'brō-ĭn), *n.* [L. *fibra* a fiber.] *Physiol. Chem.* A proteid substance, the chief ingredient of raw silk, extracted as a white amorphous mass. By decomposition it yields alanine, glycocoll, tyrosine, etc.

fi'bro-lite (fī'brō-līt), *n.* [*fibro-* + *-lite.*] *Min.* A brown, grayish, or pale green silicate of aluminium, Al_2SiO_5, occurring in orthorhombic crystals which often pass into fibrous or columnar forms. It shows strong double refraction. H., 6–7. Sp. gr., 3.23–3.24. — **fi'bro-lit'ic** (-lĭt'Ik), *a.*

fi-bro'ma (fī-brō'mȧ), *n.; pl.* -MATA (-mȧ-tȧ). [NL.; *fibro-* + *-oma.*] *Med.* A tumor consisting mainly of fibrous tissue, or of some modification of such tissue. — **fi-brom'a-tous** (fī-brŏm'ȧ-tŭs; fī-brō'mȧ-tŭs), *a.*

fi-bro'sis (fī-brō'sĭs), *n.* [NL.; *fibro-* + *-osis.*] *Med.* A condition marked by a relative increase in the formation or development of interstitial fibrous tissue in any organ or region of the body; fibrous degeneration.

fi-bro'so- (fī-brō'sō-). Combining form for *fibrous; fibro-.*

Fi'bro-spon'gi-æ (fī'brō-spŏn'jĭ-ē), *n. pl.* [NL.; *fibro-* + L. *spongia* a sponge.] *Zoöl.* An order of sponges with a fibrous skeleton, including all sponges except the Calcarea.

fi'brous (fī'brŭs), *a.* [Cf. F. *fibreux.*] Containing, consisting of, or like, fibers; as, the *fibrous* husk of the cocoanut; the *fibrous* roots of grasses.

fibrous tissue, *Anat.,* tissue largely composed of fibers; esp., ordinary connective tissue, composed chiefly of compactly disposed bundles of white fibers.

fi'brous-root'ed, *a. Bot.* Having fibrous, in distinction from tuberous, roots; as, a *fibrous-rooted* begonia.

fib'u-la (fĭb'ū-lȧ), *n.; L. pl.* -LÆ (-lē). [L., clasp, buckle.] **1.** *Antiq.* A brooch, clasp, or buckle.
2. *Anat. & Zoöl.* The outer or postaxial, and usually the smaller, of the two bones of the hind limb, below the knee. In proportion to its length it is the slenderest bone of the human body, and corresponds to the ulna of the arm. The human *fibula* articulates above with the external tuberosity of the tibia, and below with the astragalus, its lower end forming the external malleolus of the ankle. In most birds and many mammals, as the horse and the ruminants, the fibula is rudimentary, and it is often ankylosed with the tibia.

fib'u-lar (-lẽr), *a. Anat.* Of or pertaining to the fibula.

fib'u-la're (-lā'rē), *n.; pl.* -LARIA (-rĭ-ȧ). [NL. See FIBULA.] *Zoöl.* The outer or postaxial element or bone of the proximal row of the tarsus. In the higher vertebrates it is represented by the calcaneum (which see).

Fich'te-an, *n.* An idealist of the school of the German philosopher J. G. Fichte.

Fich'te-an-ism (-ĭz'm), *n.* The philosophy of J. G. Fichte, the second of the great German philosophers of the Kantian School. He attempted to perfect the Kantian system by connecting the Practical Reason with the Pure Reason, i. e., to deduce a priori from the Ego (Kant's "transcendental unity of apperception") not only the categories quantity, quality, relation, and modality, but also the doctrines of morals and rights (ethical and legal obligations), and thus unite these two critiques in one system, the "Science of Knowledge" (called by him Wissenschaftslehre). He also attempted in the same manner to deduce the a priori grounds of time and space and thus to found a philosophy of nature. Schelling's labors (see SCHELLINGIANISM) were through it concentrated on this field ; he explored the a priori grounds of nature and contributed to a philosophy of art and poetry, thus attempting the same service for Kant's "Critique of Judgment" that Fichte attempted for the "Critique of the Practical Reason." *W. T. Harris.*

fich'tel-ite (fĭk'tĕl-īt), *n. Min.* A white crystallized resin from peat beds in the Fichtelgebirge, Bavaria.

fich'u (fĭsh'ōō; *F.* fē-shü'), *n.* [F., neckerchief.] A kind of ornamental three-cornered cape, usually of lace, muslin, or silk, worn by women as a covering for the shoulders and sometimes for the head.

5. Fictitious literature ; comprehensively, all works of imagination in narrative or dramatic form ; specif. novels and romances.

6. A work of fiction ; a tale ; novel *Rare.*

7. *Law.* An assumption of a possible thing as a fact irrespective of the question of its truth ; — specif. used : **a** In the usual sense, of an allegation or supposition of a state of facts assumed to exist which the practice of the courts allows to be made in pleading, and refuses to allow the adverse party to disprove, as in the common-law action of conversion, and in the Roman-law action of bonorum possessio. A *fiction* is distinguished from a *presumption* in that a fiction assumes the existence of a state of facts irrespective of their truth or falsity, and a presumption infers their existence from their logical connection or association with certain other facts which are known and proved. **b** In a wider and less usual sense, of, "any assumption which conceals, or affects to conceal, the fact that a rule of law has undergone an alteration, in its letter remaining unchanged, its operation being modified." *Sir H. Maine.* In this sense it would include every process by which the law becomes modified by judicial decision.

8. Any assumption made for convenience, as for passing more rapidly over what is not disputed, and arriving at points really at issue.

Syn. — Invention, fable, coinage, forgery, falsehood. — FICTION, FIGMENT, FABRICATION are here compared in their general sense of invention. FICTION (see NOVEL) suggests imaginative fashioning, whether with or without intent to deceive ; it is opposed to *fact, truth, reality ;* FIGMENT implies more irresponsible invention ; it often suggests a somewhat transparent or flimsy fiction, esp. to keep up appearances ; FABRICATION (see FASHION, *v. t.*) commonly (though not always) conveys the implication of something willfully made up to deceive ; as, "With all their vivacity and pictorial richness of color, they are *fictions* and not realities" (*Carlyle*) ; "He [Coleridge] . . . used in all companies to build the universe, like a brave poetical *fiction*, of fine words" (*Hazlitt*) ; "his transparent *fiction* . . . to divert suspicion" (*W. Elwin*) ; "This is all a *figment* of your imagination" (*Stevenson*) ; "the rude, unvarnished gibes with which he demolished every *figment* of defense" (*id.*) ; "the *figment* of the Stoics" (*Emerson*) ; "His [Pope's] accusation of forgery was an acted clamor to screen himself. He finally adopted all the letters but seven, and his assertion that these seven were *fabrications* was a falsehood" (*W. Elwin*) ; "a general notion . . . formed from all of them by a *fabrication* of my mind" (*J. H. Newman*). See ARTIFICIAL, FABULOUS, DELUSION.

fic'tion-al (fĭk'shŭn-ăl), *a.* Pertaining to, or characterized by, fiction ; fictitious ; romantic. "*Fictional* rather than historical." *Latham.* — **fic'tion-al-ly,** *adv.*

fic'tion-ist, *n.* A writer of fiction ; a story teller.

fic-ti'tious (fĭk-tĭsh'ŭs), *a.* [L. *ficticius*. See FICTION.] **1.** Feigned ; imaginary ; pretended ; not real ; fabulous ; counterfeit ; false ; not genuine ; as, *fictitious* fame.

2. Of, pertaining to, or like, fiction.

3. Arbitrarily invented or devised ; as, a *fictitious* standard. *Obs. or R.*

fi'de-i-com-mis'sum (-kŏ-mĭs'ŭm), *n.* [L., prop, a thing intrusted to faith. See FAITH ; COMMIT.] *Roman & Civil Law.* A bequest which a decedent effects by begging or requesting his heir (whether an heir by law or by testament) to turn over to another a portion of the decedent's estate. Originally such request might be oral or in writing by codicil (in sense 1 **b**), and the obligation of the trustee to perform the trust was purely moral. Later, the request might be in the will itself, and in the reign of Augustus the trustee was compelled to perform the trust when certain precatory words were used, and later whenever it was the testator's intention to create a trust. The fideicommissum differs from the common-law trust in that the vested interests of the common-law trustee and cestui que trust are coexistent, but in the case of a fideicommissum the interests of the fiduciary and the fideicommissary are successive, so that in the latter case, among other things, the interest of the fideicommissary does not vest until the performance of the trust by the fiduciary, and his interest lapses in case of his predeceasing the fiduciary. The fideicommissum enabled bequests to be made to one person limited or conditioned to vest in another at a certain time or upon a certain condition (this being called *substituto fideicommissaria*). This is, with some modifications, similarly permitted by the Spanish and French civil codes, and in the Roman Dutch law ; and in the German Imperial code is accomplished by what is termed postinheritance (*Nacherbschaft*), *Fideikommiss* being the technical term for a permanent entail.

fiend'ish, *a.* Like a fiend; diabolically wicked or cruel.

Syn. — FIENDISH, DEVILISH, DIABOLICAL, DEMONIACAL, DEMONIC agree (except sometimes *demonic*) in the idea of superhumanly evil qualities. FIENDISH commonly implies excessive cruelty or malignity; as, *fiendish* tortures, *fiendish* glee. DEVILISH, which frequently suggests abnormal wickedness of whatever sort, is often loosely used as an intensive with a coarsely humorous connotation; as, "This wisdom . . . is earthly, sensual, *devilish*" (*James* iii. 15); "*devilish* good dinner" (*Dickens*). DIABOLICAL often (and sometimes *devilish*) connotes colder and more calculating malevolence than *fiendish;* as, *diabolical* (cf *fiendish*) cruelty, *diabolical* ingenuity, a *diabolical* sneer (cf. a *fiendish* grin); cf. "She has the temper of a *fiend* and the ingenuity of the *Devil*" (*Thackeray*). DEMONIACAL frequently suggests frenzy or excesses, as of one "possessed;" as, *demoniacal* strength, *demoniacal* laughter. DEMONIC, though sometimes synonymous with *demoniacal*, more frequently suggests, in recent usage (chiefly under the influence of Goethe, and often with the spelling *dæmonic*), the inexplicable or superhuman element in life or esp. genius; as, "In the solidest kingdom of routine and the senses, he [Goethe] showed the lurking *dæmonic* power" (*Emerson*); "the rapt, *dæmonic* features of the Magic Muse" (*M. Hewlett*).

Fi-la'ri-a (fĭ-lā'rĭ-ă), *n.*; *pl.* -RIÆ (-ē). [NL., fr. L., *filum* a thread.] *Zoöl. & Med.* A genus (or [*l. c.*] any member of the genus) of slender, threadlike, nematode worms parasitic in the blood and tissues of vertebrates, having also various invertebrate animals as intermediate hosts. The name is loosely applied to members of other genera, as the guinea worm (which see). Under the term *Filaria sanguinis hominis* several distinct species have been confounded, which in the embryonic state are found in human blood and tissues, esp. in tropical countries. Filariæ are believed to cause elephantiasis.

fi-la'ri-al (-ăl), *a.* **1.** *Zoöl. & Med.* Of, pertaining to, or caused by, filariæ and allied parasitic worms.

2. Straight, as if in a line; as, the *filarial* flight of birds.

fil'a-ri'a-sis (fĭl'ă-rī'ă-sĭs), *n.* [NL.] *Med.* The presence of filariæ in the blood; infection with filariæ.

fi-lasse' (fĭ-lăs'), *n.* [F., fr. *fil* thread, L. *filum*.] Vegetable fiber, as jute or ramie, prepared for manufacture.

fi'la-tor (fī'lā-tĕr; fĭl'ă-tôr), *n.* [Cf. F. *filer* to spin.] *Zoöl.* An organ connected with the spinneret of a silkworm, serving to regulate the size and form of the silk fiber.

fil'a-ture (fĭl'ă-tūr), *n.* [Cf. F. *filature*, LL. *filatura*, fr. *filare* to spin. See FILATORY.] **1.** A drawing out into threads; hence, the reeling of silk from cocoons.

2. A reel for drawing off silk from cocoons; also, an establishment for reeling silk.

fil'bert (fĭl'bĕrt), *n.* [F. dial. *noix de filbert*, prob. fr. a St. *Philibert*, whose day, Aug. 22, fell in the nutting season.] Either of two European hazels (*Corylus avellana* and *C. pontica*); also, the thick-shelled and sweet-flavored nut which they yield, and for which they are frequently cultivated. In some parts of the United States the native hazelnuts are also called filberts. See HAZEL, CORYLUS.

filch (fĭlch; 140, 277), *v. t.*; FILCHED (fĭlcht); FILCH'ING. [Of unknown origin.] **1.** To steal or take privily (commonly, that which is of little value); to pilfer.

Fain would they *filch* that little food away. *Dryden*

2. To beat; strike; also, to rob. *Obs. or R.*

Syn. — See STEAL.

filch, *n.* *Obs. or Slang.* **1.** A hooked staff used by thieves to snatch articles, as from windows. *Cant.*

2. The thing filched; one that filches or pilfers; a filcher.

3. Act of filching.

file (fīl), *n.* [F. *file* row (cf. Pr., Sp., Pg., & It. *fila*, LL. *fila*), prob. fr. *filer* to spin, to conduct, fr. L. *filum* thread; in some senses fr. F. *fil* thread, course, order, fr. L. *filum* thread. Cf. ENFILADE, FILAMENT, FILLET.] **1.** A thread or threadlike substance; thread of a story, life, etc. *Obs.*

2 A line, wire, or other contrivance, by means of which papers are put and kept in order.

It is upon a *file* with the duke's other letters. *Shak.*

3. An orderly collection of papers, arranged in sequence or classified for preservation and reference; as, *files* of letters or of newspapers; English *files* to the 15th instant.

4. A roll; list. *Obs.* "A *file* of all the gentry." *Shak.*

5. *Mil.* **a** A row of soldiers ranged one behind another; — in contradistinction to *rank*, which designates a row of soldiers standing abreast; a number constituting the depth of a body of troops, which, in the ordinary modern formation, consists of two men, the battalion standing two deep, or in two ranks, but which may consist of but one man or any number. **b** A small number of soldiers, usually corresponding to the prevailing number in file at formation, detailed as a detachment.

6. A row of persons, animals, or things arranged one behind the other.

7. *Chess.* A row of squares from one player to his opposite across the chessboard.

8. The runway or track of a hare.

9. *Her.* A label. *Obsoles.*

file (fīl), *v. t.*; FILED (fīld); FIL'ING (fīl'ĭng). **1.** To string; thread. *Obs.*

2. To set in order; to arrange, or lay away, as papers in a methodical manner for preservation and reference; to place on file; to insert in its proper place in a file.

3. *Law.* **a** To deliver (a paper or instrument) to the proper officer so that it is received by him to be kept on file, or among the records of his office. When preliminary requisites, as the payment of fees, are required by law these must be complied with to constitute a filing, but the filing on the part of the one presenting the paper is complete without the act of the officer in indorsing, entering, etc., the paper. **b** Of the receiving officer, to place (a paper or instrument) on file among the records of his office by receiving and properly indorsing, entering, or the like. His indorsements, etc., constitute evidence of the act and time of filing.

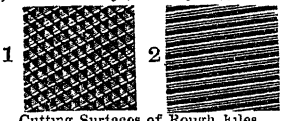
4. To arrange in files, as soldiers, objects, etc. *Obs. or R.*

file (fīl), *v. i.* *Mil.* To march in a file or line, as soldiers, not abreast, but one after another.

to file off, *Mil.*, when marching in line, to wheel by files and march in single file at right angles to the original direction. — **to f. with**, to follow closely, as one soldier after another in file, to keep pace.

My endeavors
Have ever come too short of my desires,
Yet *filed with* my abilities. *Shak.*

file (fīl), *n.* [AS. *fēol*; akin to D. *vijl*, OHG. *fīla*, *fīhala*, G. *feile*; cf. Icel. *þjöl*, OSlav. *pĭsati* to write, and Skr. *piç* to cut out, shape, adorn; perh. akin to E. *paint*.] **1.** *Mech.* A hardened steel instrument having cutting ridges, or teeth, upon its surface, made by rows of straight chisel cuts running diagonally across it, used for abrading or smoothing metal, ivory, and other hard substances; — technically distinguished from a *rasp*, which is a similar instrument having coarse single teeth raised by a pointed triangular punch. See RIFFLER, RASP. Files are **single-cut**, with one series of parallel chisel cuts; or **double-cut**, or **crosscut**, with two crossing series of cuts, one finer than the other. Single-cut files, esp. when the teeth are large and coarse, are often called **float-cut files**, or simply **floats**.



Cutting Surfaces of Rough Files. 1 Double-cut; 2 Single-cut

Files are graded according to *fineness* as **rough** (the coarsest), **coarse** or **middle**, **bastard**, **second-cut**, **smooth**, and **dead-smooth**; and, for the more lightly cut, or **superfine**, files, as 00 (the coarsest), 0, 1, etc., to 8. Files with parallel edges are called **parallel** or **blunt**; with converging edges, **taper** or **pointed**; when very narrow in proportion to their length, **slim**.

Files are classified according to *cross section* as. flat, more

Files of different shapes, in profile and section. *a* Flat, or Equaling File; *b* Square File; *c* Knife File; *d* Half-round File; *e* Round or R t-tail File; *f* Three-square file; *g* Entering File; *h* Cross File; *i* Slitting File

or less rectangular; **round**, circular; square, or sugar-loaf, shape, **square**; **triangular** or **three-square**, **half-round**, curved on one side and flat on the other; **cant**, shaped like an isosceles triangle with an obtuse angle (when this angle is that of a regular hexagon, 120°, the file is called **six-canted**, or simply **cant**; when equal to that of a pentagon, 108°, it is called a **five-canted**, or **lightning**, file); **knife**, triangular with a very acute vertex angle, **cross**, **crossing**, or **double half-round**, curved on both sides; **great American**, triangular with a curved base (the **pippin** and **auriform** sections are similar to this last, but used only for small files, as for die sinkers, engravers, etc.); **lozenge**, **onglette**, shield-shaped; **oval**, approximately elliptical, or double half-round, etc. **Safe-edge** files are left uncut on at least one edge, and are used for filing near a corner so as not to cut the surface at right angles. Special types of the flat file are: **mill files**, which are usually bastard or second-cut, single-cut files, slightly tapered both in thickness and width from the middle to the point, although sometimes made blunt (when they are usually double-cut) or with one round edge; **hand files**, which are bellied, that is, tapered in thickness from the middle both ways, so as to be suitable for the most accurate work; **potance**, or **pottance**, **files**, tapered in width both ways from the middle and usually double-cut bastard; and **pillar files**, usually double-cut, nearly parallel in width, with one safe edge, tapered in thickness from the middle both ways, and esp. suitable for narrow work.

Files are also classified according to the special kind of work for which they are intended or according to various *peculiarities of shape, methods of manufacture, purposes for which used*, etc. Among these are the following: **banking file**, a blunt triangular file used by watchmakers; **barrette file**, cant file, commonly cut only on its broad face, used for working corners; **cabinet file**, a half-round file of little thickness, taper from the middle to the point, generally bastard double-cut, and used by cabinet-makers and others; **cotter file**, for filing slots as for cotters; **crochet file**, a small superfine flat file with round edges, double-cut and tapering sharply toward the point, used by die sinkers; **drill file**, a joint file (see below); **entering file**, a flat file tapering to the point like the last; **equaling** or **equalizing file**, an almost parallel, slightly bellied, flat file, with edges usually convex, but sometimes concave; **featheredge** or **currycomb file**, for filing feather springs (sear springs) for gunlocks, or the niches in currycombs, of narrow rhomboidal or double half-round section; **gin-saw file**, a saw file, commonly taper and of knife section; **gulleting file**, a single-cut, round, blunt, saw file, for extending the gullets in gullet teeth and in brier-toothed saws; **hack file**, a locksmith's slitting file; **joint file**, a flat, blunt file cut only on its round edges (or sometimes circular in section), used for making grooves in hinges; **key file**, a locksmith's flat file of even thickness; **lock file**, a blunt hexagonal file of little thickness, cut only on its sloping edges; **needle file**, a very narrow file of various shapes and sections, commonly from 4 to 6½ inches in length, used esp. by jewelers; **pitsaw file**, a single-cut, thick half-round file, left uncut at the point; **reaper file**, a slightly tapered, single-cut file (sometimes double-cut on one face), of various sections, used for sharpening reaper and mower knives, etc.; **saw file**, a file for cutting saw teeth; **slitting file**, a blunt file of narrow lozenge section; **slot** or **slotting file**, a cotter file; **stave-saw file**, a blunt file of sugar-loaf section, or flat with rounded edges; **topping file**, a flat blunt file with rounded edges and left uncut at the point; **tumbler file**, a thick, taper, double-cut, oval file, for shaping gunlock tumblers; **warding file**, for cutting the wards of keys, usually thin, flat, and very taper. Short broad files fitted with holders and handles projecting from them at an angle are called **stub files**, and are used esp. for filing broad flat surfaces. Round files are called **rat-tail** or **rat-tailed files**, esp. when of ¼ inch or less diameter, and tapered toward the point. Machine-cut files which are purposely cut slightly irregularly according to a definite scheme, in order that succeeding teeth shall not follow in the grooves made by their predecessors, are sometimes called **increment-cut files**. Many special files are made for use in machine work. Most of these are blunt, or circular with bevel edges. Others are shaped like a snail cam. Files for manicure work are superfine and single-cut and are of many special shapes.

2. Anything employed to smooth, polish, or rasp.

PEN a feather.] **1.** A membranous winglike or paddlelike process of an aquatic animal, used in propelling, balancing, or guiding the body. The fins of fishes are of two principal kinds, **median** and **paired**. The median include the **dorsal** fin, or fins, on the back, the **caudal**, or tail fin (commonly called simply the *tail*), and the **anal** (of which there is rarely more than one), on the posterior part of the under side. The two pairs of paired fins, the **pectoral** and **pelvic**, represent the fore and hind limbs respectively. The pectorals are commonly placed on each side of the body just behind the head, but the pelvic vary greatly in position and are said to be **abdominal** if placed well behind the pectorals, **thoracic** if placed under them, and **jugular** if placed well forward on the throat. They are very often wanting entirely. The pelvic fins are often termed **ventral** fins, but this term is also applied to the median fin commonly called **anal**. The fins of fishes are stiffened by bony or horny dermal *rays*, some of which are often hard and spiny. These are supported by internal bony elements. Whales have the fore limbs modified into a pair of pectoral fins or flippers, and the tail ending in a pair of flukes which form a horizontal caudal fin (that of fishes is vertical). They may also have a *dorsal* fin, but the hind limbs are represented only by internal rudiments.

fin (fĭn), *v. t. ;* FINNED (fĭnd) ; FIN'NING. [Cf. FIN of a fish.] To carve or cut up, as a chub; to cut off the fins of.

fin, *v. i.* To move the fins; to lash the water with the fins, as a dying whale; — often used with *out;* as, the wounded whale began to *fin* out.

fin'a-ble, fine'a-ble (fīn'ȧ-b'l), *a.* [From FINE.] Liable or subject to be fined or to the payment of a fine.

fi'nal (fī'năl), *a.* [F., fr. L. *finalis*, fr. *finis* boundary, limit, end. See FINE end.] **1.** Pertaining to, or occurring at, the end or conclusion; last; terminating; ultimate; as, the *final* day of a school term.

> Yet despair not of his *final* pardon. *Milton.*

2. Conclusive; decisive; as, a *final* judgment; the battle of Waterloo brought the contest to a *final* issue.

3. Respecting an end or object to be gained; respecting the purpose or ultimate end in view.

4. *Econ.* Last in a series of increments; as, *final* utility; — proposed by Jevons, and corresponding to *marginal*.

5. *Law.* Of an order, decision, judgment, decree, or sentence of a court, designating: **a** Usually, one which ends the action or proceeding in the court that makes it, leaving nothing further to be determined by the court, or to be done except the administrative execution of the decision, judgment, etc. Such a judgment does not as such preclude an appeal. It is distinguished from an *interlocutory* decision, judgment, etc. **b** One which is conclusive as to jurisdiction, and precludes the right to appeal to, or continue the case in, any other court upon the merits; as, in some minor matters the decisions of the lower courts are usually made *final*. This does not preclude the right to take exception to the proceeding as invalid or to take proceedings to set it aside for irregularity, fraud, or mistake. In this sense **final and conclusive** is perhaps more often used. **c** With reference to the judgments or decrees of the Supreme Court of the United States rendered under the provisions of the statutes giving it jurisdiction over appeals and writs of error, a judgment which terminates the litigation between the parties on the merits, leaving nothing for the inferior court to do in case of an affirmance except to execute the judgment or decree.

Syn. — See LAST.

final cause, the end, design, or object, for which anything is done; — one of the four causes distinguished by Aristotle. See CAUSE. — **f. concord** *or* **peace,** *O. Eng. 2. Of a member of a society, trade union, or other association: paying dues, in distinction from honorary members; in good standing as to payment of dues.

Syn. — FINANCIAL, FISCAL, MONETARY, PECUNIARY. FINANCIAL is used of money matters in general, esp. as conducted on a large scale; FISCAL applies properly to the public revenues; in the phrase "*fiscal* year," it is synonymous with *financial;* as, the *financial* interests of the country, the *fiscal* officers of the crown. MONETARY has more direct reference than *financial* to money as such; PECUNIARY suggests the application of money to practical ends; as, the *monetary* unit, *pecuniary* difficulties, wants, rewards. See MONEY.

financial year, the fiscal year. *Eng.*

finch (fĭnch ; 140), *n.* [AS. *finc ;* akin to D. *vink*, OHG. *fincho*, G. *fink;* cf. W. *pinc* a finch, Gr. σπίζα, σπίγγος, also E. *spink.*] *Zool.* Any of the numerous singing birds constituting the family Fringillidæ, which includes the sparrows, grosbeaks, crossbills, goldfinches, linnets, buntings, etc. The family is a very large one, and is especially well represented in the Northern Hemisphere. Australia has but few forms. The exact limits of the family are hard to define, as it is intimately related to the tanager and weaver bird families. The finches are of small or moderate size, rather stout build, generally with a short stout conical bill adapted for crushing seeds, which usually form a large part of their diet. They are very beneficial to agriculture, by destroying the seeds of weeds. Some, as the canary, are fine singers. Bright plumage, esp. in the male, sometimes occurs, but as a rule the coloration is not very conspicuous. Many members of the family are designated by compounds of the word *finch*, as bull*finch*, chaf*finch*, etc.

find (fīnd), *v. t. ; pret. & p. p.* FOUND (found) ; *p. pr. & vb. n.* FIND'ING. fire'fly′ (fīr'flī′), *n.*; *pl.* -FLIES (-flīz′). In popular language, any nocturnal winged light-producing insect. They are mostly beetles belonging to two families, Lampyridæ and Elateridæ, and hence are more correctly termed *fire beetles*, which name is, however, usually applied only to the large tropical species of the last-mentioned family. (See FIRE BEETLE.) The ordinary fireflies are small, rather elongated, flattened, soft-bodied beetles of the family Lampyridæ, the common North American species belonging to the genera *Photinus* and *Photuris*. They produce a bright, soft, intermittent light, without sensible heat, from an organ in the lower part of the abdomen. This organ appears to be a specialized part of the fat body, and is supplied with nerves and abundant tracheæ. The light is supposed by some to be caused by oxidation of a substance secreted by the cells. In many of these beetles the female is wingless; in some the larva is luminescent. These wingless females and larvæ are popularly termed *glowworms*.

American Firefly *a* Adult Beetle of *Photinus pennsylvanica*. *b* Larva of another *Photuris*. Somewhat enlarged.

fire'guard′ (fīr'gärd′), *n.* **1.** A protecting shieldlike wire screen or grating placed before or fitting over the front of an open fireplace. Cf. FENDER **1**.

PISCATORIAL, GRAMPUS, PORPOISE.] In some cases, such as *fish* joint, *fish* plate, this word has prob. been confused with *fish*, fr. F. *fiche* a peg.] **1.** In the broadest sense, a designation of almost any exclusively aquatic animal, vertebrate or invertebrate.

☞ This usage is technically obsolete and is becoming rare among educated people except in certain general phrases, but survives in compound terms, as *shellfish*, *starfish*, *cuttlefish*, and others.

2. Any of numerous completely aquatic, water-breathing craniate vertebrates having the limbs (when present) developed as fins, and in the more typical forms an elongated or somewhat fusiform body commonly covered with scales or plates and ending in a broad vertical caudal fin. The fishes are divided into several classes in many recent classifications; in older or more conservative classifications, they are all placed in the class *Pisces*. (See PISCES.) The chief and commonly the only breathing organs of fishes are the gills (see GILL), attached to the branchial arches at the sides of the pharynx. Water is drawn in through the mouth, and expelled through the clefts between the arches, aërating the blood circulating in the thin-walled gills. The heart has one auricle and one ventricle, the former sometimes partly divided. From the heart the blood passes by the ventral aorta to the gills, and from them to the various parts and organs, returning to the heart in a venous condition. Their blood is cold (in some large forms, somewhat warm) and its red corpuscles are oval and nucleated. Both hepatic and renal portal systems of circulation are commonly present. There is often an air bladder (which see), sometimes having the function of an accessory breathing organ. Elongated fishes usually swim chiefly by undulations of the body; most short-bodied forms principally by means of the caudal fin, the other fins being used chiefly in balancing and controlling their movements (see FIN). Most fishes are oviparous, and the eggs are usually fertilized by the male after they are laid. The eggs are meroblastic and often produced in immense numbers. Many elasmobranchs and some other fishes are viviparous. **3.** [*cap.*] *pl. A place for catching fish or taking other sea products; as, the pearl *fisheries*; an oyster *fishery*; a salmon *fishery*. **3.** *Law.* The right to take fish at a certain place, or in particular waters, esp. by drawing a seine or net; — called a **several fishery**, when founded on ownership of the underlying soil, and therefore exclusive; **free fishery**, when an exclusive privilege, derived from royal or public grant, to fish in public waters, and independent of the soil; and a **common fishery**, when a right enjoyed in common with others to fish in public waters. By the English common law the crown has by prerogative the right of fishery in all tidal waters to a distance three miles from the shore; in nontidal waters the right of fishery belongs to the owner of the land under the water, or to the riparian owner. In the United States the rights of fishery over navigable and nonnavigable waters generally similarly belong respectively to the State and the private owners.

> The distinction between several and free *fisheries* has always been uncertain. Blackstone's opinion was that several *fishery* implied a *fishery* in right of the soil under the water, while free *fishery* was confined to a public river and did not necessarily comprehend the soil. He is supported by later writers, such as Woolrych and Paterson. On the other hand, the opinions of Coke and Hale are opposed to this view. *Encyc. Brit.*

Classics,** the Confucian canon of five sacred books (*Ching* or *King*), comprising: (1) The **Yi Ching,** or **Book of Changes,** probably the most ancient of these writings, ascribed to Wen Wang in the 12th century B. C. It consisted originally of eight diagrams of triplet lines, divided and undivided (thus: ☰, ☷, ☳, ☶, etc.), increased, by doubling them, to sixty-four, each resulting sextet being followed by a short and very enigmatic essay, ascribing a meaning to each line. The text is followed by ten *wing*, or commentaries. (2) The **Shu Ching,** or **Book of History,** compiled and edited by Confucius from ancient documents, and recording a period from the 24th to the 8th century B. C. (3) The **Shih Ching (Shi King),** or **Book of Odes,** 305 rimed lyrics, dating from the 18th to the 6th century B. C., selected by Confucius, and arranged under four heads: (*a*) popular ballads of the various feudal states; (*b*) odes for royal entertainments; (*c*) odes for state assemblages of the feudal nobles; (*d*) panegyrics and sacrificial odes. (4) The **Li Chi (Li Ki),** or **Book of Rites,** a post-Confucian compilation of ceremonial forms and usages. Until about 1368 an older work, the Chou Li, or Rites of the Chou dynasty, was coupled with it, forming one of the then recognized *Six Classics*. (5) The **Ch'un Ch'iu (Ch'un Ts'iu),** or **Spring and Autumn Annals,** a chronological record of events in the state of Lu, B. C. 722-484, written by Confucius. 3. That which is fixed or attached to something as a permanent appendage; as, the *fixtures* of a pump.
4. *Law.* Anything of an accessory character annexed to houses and lands, so as to legally constitute a part thereof; — often called an **immovable fixture.** The law on the subject of *fixtures* varies with different subjects and in different jurisdictions. In general, however, a chattel will become a *fixture* if it is annexed in a manner relatively permanent and is of such a nature as to be suitable for use as part of the land to which it is annexed. Things fixed to the freehold for purposes of trade or manufacture (called **trade fixtures**) may in general be taken away when their removal is not contrary to a prevailing practice. In general the rule as between landlord and tenant favors the tenant, as between grantor and grantee and mortgagor and mortgagee it favors the grantee and mortgagee in doubtful cases, and as between heir and executor removal will not be permitted where it will injure the freehold.
5. *Law.* Less commonly, a personal chattel annexed to lands or tenements but removable by the person annexing them, or his personal representative, without the consent of the owner of the real estate; — often called a **movable fixture.**
6. A settled date or time for anything to take place, esp. in a series of sporting events; also, the event to occur. *Cant.*

flag'ship' (flăg'shĭp'), *n.* *Naval.* The ship that carries the commander of a fleet or squadron and flies his flag.

flag'staff' (-stăf'), *n.*; *pl.* -STAVES (-stāvz') or -STAFFS (-stăfs'). A staff on which a flag is hoisted.

flag station. *Railroad.* A station at which trains do not stop unless signaled, as by a flag.

flag'stone' (flăg'stōn'), *n.* A flat stone used in paving, or any rock which will split into such stones. See 3d FLAG, 2.

flail (flāl), *n.* [ME. *flegl*, *fleyl*, *flayle* (cf. AS. *fligel*), fr. L. *flagellum* whip, scourge, a threshing flail: cf. OF. *flaiel*, F. *fléau*. See FLAGELLUM.] **1.** An instrument for threshing or beating grain from the ear by hand, consisting of a wooden handle at the end of which a stouter and shorter stick, called a *swiple* or *swingel*, is so hung as to swing freely. **2.** An ancient weapon, like the common flail, often having the striking part armed with spikes, or loaded. **3** A swinging part, as a gate bar or a lever of a press. *Obs.*

flail, *v. t. & i.*; FLAILED (flāld); FLAIL'ING. To beat with or as if with a flail; to thrash; flog.

flail joint. *Med.* A joint showing abnormal mobility, as sometimes occurs after resection.

flair (flâr), *n.* [ME. *flaire* odor, fr. OF. & F. *flair*, fr. OF. *flairier*, F. *flairer*, to smell, LL. *flagrare* for L. *fragrare*. See FRAGRANT.] **1.** Smell; odor. *Obs.* **2.** Sense of smell; scent; fig., discriminating or sagacious sense; instinctive discernment.

Every now and then . . . this intuition came to him, this *flair*, this intangible, vague premonition. *F. Norris.*

flak'age (flāk'ĕj), *n.* Flakes of flint or other stone struck off in the process of manufacturing stone implements.

flake (flāk), *n.* [Cf. Icel. *flaki*, *fleki*, Dan. *flage*, D. *vlaak*.] **1.** A paling or hurdle. *Obs. or Dial. Eng.* **2.** A rack for storing provisions; also, a stage or platform for drying fish or produce. **3.** *Naut.* A small stage hung over a vessel's side for workmen to stand on in calking or the like. **4.** *Mining.* A sheltering framework.

flake (flāk), *n.* [Etym. uncertain; cf. 1st FAKE.] A flat layer, or fake, of a coiled cable.

flake, *n.* [Cf. Icel. *flakna* to flake off, split, Sw. *flake* plate, Dan. *flage* snowflake; also Icel. *flóki* flock of wool or hair, G. *flocke* flock of wool, flake (of snow). Cf. FLAG a flat stone.] **1.** A loose filmy mass or a thin chiplike or scalelike layer of anything; a film; flock; lamina; layer; scale; as, a *flake* of snow, tallow, or fish. **2.** A particle of lighted or incandescent matter, darted from a fire; a flash. "*Flakes* of ruddy fire." *Somerville.* **3.** *Hort.* A race of carnations having only two colors in the flower, the petals with large stripes.

flake, *v. t.*; FLAKED (flākt); FLAK'ING (flāk'ĭng). **1.** To form or separate into flakes. **2.** To cover with flakes, as of snow. **3.** To mark with flakes; to streak.

flake, *v. i.* **1.** To come down in or as if in flakes. **2.** To separate in flakes; to peel or scale off.

flak'er (flāk'ẽr), *n.* **1.** One that flakes; specif., one who produces flint flakes for striking fire, or one who manufactures flaked stone implements. **2.** *Archæol.* An implement of bone, or other material, used to chip off flakes of stone in making stone implements.

flake white. **1.** Pure white lead deposited in flakes, and ground with oil or gum water as a pigment for artists. **2.** = PEARL WHITE **a**.

flak'y (flāk'ĭ), *a.*; FLAK'I-ER (-ĭ-ẽr); FLAK'I-EST. Consisting of flakes, or small loose masses; lying, or cleaving off, in flakes or layers; flakelike. — **flak'i-ly**, *adv.* — **flak'i-ness**, *n.*

What showers of mortal hail, what *flaky* fires! *Watts.*

flam (flăm), *n.* [Of uncertain origin. Cf. FLIMFLAM.] **1.** A freak; whim; conceit. *Obs.* **2.** A falsehood; an illusory pretext; trick; deception.

A perpetual abuse and *flam* upon posterity. *South.*

3. Humbug; nonsense; rubbish.

flam, *a.* Deceptive; trickily false; untrue.

flam, *v. t.*; FLAMMED (flămd); FLAM'MING. To deceive, as by lying; to trick; cheat.

God is not to be *flammed* off with lies. *South.*

flam, *n.* [Prob. imitative.] A drumbeat executed after the manner of a grace note, by allowing the sticks to strike the head so as just to be heard apart.

‖ **flam'bé'** (flăn'bā'), *a.* [F., p. p. of *flamber* to singe, pass (a thing) through flame. Cf. FLAMBEAU.] *Ceramics.* Decorated by glaze splashed or irregularly spread upon the surface, or apparently applied at the top and allowed to run down the sides, — said of pieces of Chinese porcelain.

flam'beau (flăm'bō), *n.*; *pl.* -BEAUX (-bōz) or -BEAUS (-bōz). [F., fr. OF. *flambe* flame, for *flamble*, from L. *flammula* a little flame, dim. of *flamma* flame. See FLAME.] **1.** A flaming torch, esp. one made by combining thick wicks invested with a quick-burning substance (as pitch), hence, any torch. **2.** An ornamental candlestick. **3.** A kettle used in boiling sugar. *Southern U. S.*

flam'berg (flăm'bûrg), ‖ **flam'berge'** (flăn'bârzh'), *n.* [F. *flamberge*, OF. *Floberge*, *Froberge*, names of swords, esp. that of Renaud de Montauban.] A kind of rapierlike sword.

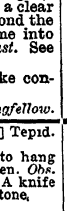
flam-boy'ance (flăm-boi'ăns) } *n.* State or quality of be-
flam-boy'an-cy (-boi'ăn-sĭ) } ing flamboyant.

flam-boy'ant (-ănt), *a.* [F.] **1.** *Arch.* Characterized by waving or flamelike curves, as the tracery of windows, etc., in the later French Gothic style, about 1450-1510. Often applied to the whole style, the florid French Gothic. See ARCHITECTURE, *Table.*

Flamboyant Tracery from Church at Rouen.

2. Flamelike, in form or color; wavy; gorgeous; showy. — **flam-boy'ant-ism** (-ĭz'm), *n.* — **flam-boy'ant-ly**, *adv.*

flame (flām), *n.* [ME. *flame*, *flaume*, OF. *flame*, F. *flamme*, fr. L. *flamma*, perh. fr. *flagrare* to burn. See FLAGRANT; cf. FLAMBEAU, FLAMINGO.] **1.** A body of burning gas or vapor. Flames are usually the result of chemical combination with atmospheric oxygen. A simple flame, as that of a candle, consists of a luminous envelope (1 in *illust.*) surrounding a body of unburned vapor (2) and itself surrounded by an invisible layer of gases produced by the burning (3). Ordinary yellow flames owe their luminosity chiefly to incandescent particles of carbon set free from hydrocarbons, and gases naturally deficient in these compounds are frequently "enriched" to enable them to burn with a luminous flame. See CARBURET, *v.* The temperature of an ordinary flame is about 2000° C. (3632° F.). When illuminating gas is mixed with air previous to its burning, as in a gas stove, the flame becomes hotter, owing to better combustion, and at the same time becomes pale blue. This loss of luminosity is due to the more complete combustion of the carbon (such flames are not smoky), to the cooling of the gas, and to its dilution with an inert gas (nitrogen). In blowpipe analysis, the **oxidizing flame** (*O. F.*) is a clear blue flame used by placing the substance just beyond the tip; the **reducing flame** (*R. F.*) is a luminous flame into which the substance is inserted. See BLOWPIPE, *Illust.* See also FLAME REACTION.



Flame.

2. State of blazing combustion; also, any flamelike condition or appearance, as a light ray; brilliance.

When the moon began to show her silver *flame. Longfellow.*

3. Burning zeal or passion; elevated and noble enthusiasm; glowing imagination; passionate excitement or anger. "In a *flame* of zeal severe." *Milton.*

Where *flames* refin'd in breasts seraphic glow. *Pope.*

4. Ardor of affection; the passion of love. *Coleridge.* **5.** A person beloved; a sweetheart. *Thackeray.*

Syn. — Blaze, brightness, ardor.

flame (flām), *v. i.*; FLAMED (flāmd); FLAM'ING (flām'ĭng). [ME. *flamen*; cf. OF. *flamer*. See FLAME, *n.*] **1.** To burn with a flame or blaze; to burn as gas emitted from bodies in combustion; to burst into flame; to blaze. **2.** To burst forth like flame; to break out in violence of passion; to be kindled with zeal or ardor.

He *flamed* with indignation. *Macaulay.*

3 To have a flamelike or brilliant appearance; to shine brightly; to glow.

Syn. — FLAME, BLAZE, FLARE, GLARE, GLOW are here compared chiefly with reference to their fig. senses. FLAME suggests a sudden or violent (often intermittent) outburst, as of anger, passion, zeal; BLAZE commonly connotes greater steadiness and intensity; as, "[He] . . . *flamed* with zeal of vengeance inwardly" (*Spenser*); "Leolin *flamed* and fell again" (*Tennyson*); "My consciousness, . . . which hitherto . . . had been only partial, intermittent, and vague, suddenly *blazed* into full, consistent, practical activity" (*Du Maurier*); "her eyes *blazing* in her white face" (*Stevenson*). To FLARE is to shine or (esp.) burst out with a spreading, unsteady, and often unpleasant light; to GLARE, as here compared (see GAZE), is to shine with a lurid or painfully dazzling light; as, "torches that guttered and *flared* soothly in the dancing light of day" (*M. Hewlett*); "Mrs. Assingham hesitated, but at last her bravery *flared*" (*H. James*); "The broad light *glares* and beats" (*Tennyson*); "He [Dante] . . . lets the fire *glare* on the sullen face for a moment, and it sears itself into the memory forever" (*Lowell*). In their adj. uses, FLARING connotes gaudy, ostentatious, or flaunting display; GLARING (see FLAGRANT, GAUDY), whatever is flagrant or notorious; FLAMING often suggests vividness, sometimes gaudiness, of color; as, "*flaring* contrasts" (*Carlyle*), "the *flaring*, noisy thoroughfares of a great city" (*Stevenson*); "one *glaring* chaos and wild heap of wit" (*Pope*); *glaring* absurdity; *flaming* yellow, *flaming* posters. GLOW suggests strong and continued heat, and (often) heightened color; fig., it suggests fervor or strong emotion of whatever sort, as, "The first is a case of acute — the second of chronic — pleasure: the one is a *flame*, the other a steady and equable *glow*" (*De Quincey*); "Amongst . . . all the weathered faces that surrounded her in church, she *glowed* like an open flower" (*Stevenson*); "He bids him *glow* with unremitting love" (*Cowper*). See FLASH.

flame, *v. t.* **1.** To send or convey by flame as a signal. **2.** To burn; to consume by burning. *Rare.* **3.** To kindle; inflame; excite.

To *flame* the poet's noble breast. *Feltham.*

4. To treat with flame, as by passing over or through it.

flame cell. *Zoöl.* A large cell terminating the branches of the excretory vessels of many flatworms, rotifers, etc. It has a cavity, continuous with the excretory tube and containing a vibrating flagellum or bundle of cilia.

flame'-col'ored *or* **-col'oured**, *a.* Of the color of flame; of a bright orange-yellow color.

flamed (flāmd), *p. a.* Having flamelike markings, as a tulip.

flame gauge *or* **gage**. *Photom.* An instrument having a short-focused lens which casts a real image of a flame upon a translucent screen, used for measuring the height of the luminous portion of a flame.

fla'men (flā'mĕn), *n.*; *pl.* E. FLAMENS (-mĕnz), L. FLAMINES (flă'mĭ-nēz). [L.] **1.** *Rom. Relig.* A priest devoted to the service of a particular god. The most honored were those of Jupiter, Mars, and Quirinus, called respectively **flamen Dialis**, **flamen Martialis**, and **flamen Quirinalis**. **2.** Hence, a priest of a pagan deity; esp., a priest of an alleged order or rank in ancient Britain.

flame'-of-the-woods', *n.* An East Indian rubiaceous shrub (*Ixora coccinea*) having showy scarlet flowers.

flame'proof' (flām'prōōf'; 87), *a.* Proof against flame; not inflammable when exposed to flame.

flame reaction. *Chem.* The characteristic coloration which certain elements or their compounds impart to a flame, thus affording a test (**flame test**) for their presence. Cf. SPECTRUM ANALYSIS.

flame spectrum. *Physics.* The spectrum obtained by volatilizing substances in a nonluminous flame.

flame standard. *Photom.* A standard of photometric intensity consisting of a luminous flame of specified size produced by burning a fuel of known composition under uniform and carefully specified conditions of combustion.

flame tree. Any of several trees or shrubs with showy scarlet flowers. **a** In Australia, the loranthaceous tree *Nuytsia floribunda* or the sterculiaceous tree *Brachychiton acerifolius*. **b** In India, *Rhododendron arboreum* or the palas tree (*Butea frondosa*). **c** The peacock flower.

fla-min'e-ous (flă-mĭn'ē-ŭs), *a.* [Cf. L. *flaminius*.] Pertaining to a flamen; flaminical.

flam'ing (flām'ĭng), *p. a.* **1.** Emitting flames; afire; blazing; consuming; illuminating. **2.** Of the color of flame; high-colored; brilliant; dazzling. "In *flaming* yellow bright." *Prior.* **3.** Flamelike; flamboyant. **4.** Ardent; passionate; burning with zeal; irrepressibly earnest; as, a *flaming* proclamation or harangue.

flaming arc. See ARC, *n.*, 5.

fla-min'go (flă-mĭŋ'gō), *n.*; *pl.* -GOS or -GOES (-gōz). [Sp. *flamenco*, cf. Pg. *flamingo*, Pr. *flamenc*, F. *flamant*; fr. L. *flamma* flame + (perh.) the G. suffix *-ing* (cf. FLEMING). So called in allusion to its color. See FLAME.] Any of several aquatic birds having remarkably long legs and neck, webbed feet, and a broad lamellated bill resembling that of the yellow flag (*Iris pseudacorus*).

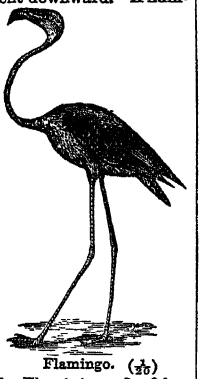
of the duck family, but abruptly bent downward. A number of species have been described, from the warmer parts of both hemispheres. Most of them have rosy white plumage with scarlet wing coverts, but an American species (*Phœnicopterus ruber*) which ranges north to the extreme southern United States (though now rare) has the plumage bright red. All the forms have black wing quills. The best-known Old World species is *P. roseus*, still found in parts of southern Europe. Flamingos are gregarious, breeding in colonies and building nests of mud in swamps and shallow lagoons, laying but one or two eggs. The flamingos constitute a family, Phœnicopteridæ, and a suborder or order, Odontoglossæ.



Flamingo. ($\frac{1}{10}$)

flamingo flower *or* **plant.** A Central American araceous plant (*Anthurium scherzerianum*) the spathe and spadix of which are bright scarlet. It is often cultivated.

Fla-min'i-an (flă-mĭn'ĭ-ăn), *a.* [L. *Flaminianus.*] Of or pert. to the Roman censor Caius Flaminius (d. 217 B. C.), or the public works which he executed; as, the *Flaminian* Way, the great road leading northward from Rome.

fla-min'i-cal (-kăl), *a.* Pertaining to a flamen.

flam'ma-ble (flăm'ă-b'l), *a.* Inflammable. — **flam'ma-bil'i-ty** (-bĭl'ĭ-tĭ), *n.*

flam'me-ous (flăm'ē-ŭs), *a.* [L. *flammeus*, fr. *flamma* flame.] Pert. to, consisting of, or like, flame. *Now Rare.*

flam'mule (flăm'ūl), *n.* [L. *flammula.*] A small flame, as one shown in a picture of a Chinese or Japanese god.

flam'y (flām'ĭ), *a.* [From FLAME.] Flaming; blazing; flamelike; flame-colored, composed of flame.

flan (flăn; *F.* flăN), *n.* [F. See FLAWN.] **1.** A cake made with a filling of cheese, fruit, or cream.

2. *Numis.* A piece of metal prepared to receive the stamp of the die; a blank.

flan (flăn), *n.* A net used to cover holes in ferreting rabbits.

flanch (flănch; 140), *n.* [Cf. OF. *flanche* flank.] **1.** [Cf. FLANGE.] A flange. *Rare.*

2. *Her.* A subordinary consisting of either of two circular segments encroaching on the field one from each side of the shield.

A Pair of Flanches

flanch, *v. i.* [Cf. FLANGE, *n.*] To slant outward; to flare.

flanched (flănchť; 140), *a. Her.* Having flanches; — said of an escutcheon with those bearings.

flan'co-nade', **flan'con-nade'** (flăn'kŏ-nād'), *n.* [F. *flanconade.*] *Fencing.* A thrust in the side.

‖ **flâ'ne-rie'** (flä'n'-rē'), *n.* [F. See FLÂNEUR.] Lit., strolling; hence, aimlessness; idleness; as, intellectual *flânerie.*

‖ **flâ'neur'** (flä'nûr'), *n.* [F., fr. *flâner* to stroll.] One who strolls about aimlessly; a stroller.

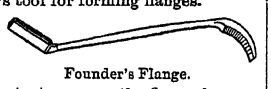
flang (flăng), *n.* A miner's two-pointed pick.

flange (flănj), *n.* [Of uncertain origin; cf. FLANCH flange, FLANCH (in heraldry).] **1.** A part that spreads out like a rim, as of a vein of ore.

2. An external or internal rib, or rim, for strength, as the *flange* of an iron beam; or for a guide, as the *flange* of a car wheel; or for attachment to another object, as the *flange* on the end of a pipe, steam cylinder, etc.

3. *Founding.* A molder's tool for forming flanges.

flange, *v. t.;* FLANGED (flănjd); FLANGING (flănj'ĭng). *Mach.* To make a flange on; to furnish with a flange.



Founder's Flange.

flange, *v. i.* To spread out; to assume the flange form.

flange coupling. *Mach.* A shaft coupling consisting of two flanges keyed each to its own shaft and bolted together. See COUPLING, 2, *Illust.*

flange joint. A joint, as of pipes, where the connecting pieces have flanges by which parts are bolted together.

flange nut. *Mech.* A nut with an enlarged base.

flang'er (flăn'jĕr), *n.* **1.** *Mech. & Shipbuilding.* One who makes flanges or bends metal plates, also, a tool or machine for forming flanges.

2. *Railroad.* A scraper for clearing snow or ice from the inside of the rails where the wheel flanges bear.

flange rail. **a** A rail with a flange on one side, to keep wheels from running off the track. It was formerly much used for railways, but is now practically replaced by the edge rail. **b** *Railroads.* A T rail. Cf. BULLHEADED, *a.*, 2.

flange turning. The process of forming a flange on a metal plate, as by bending in a flanging press.

flank (flăŋk), *v. t.;* FLANKED (flăŋkt); FLANK'ING. [Prob. imitative.] To flick or flip; to beat lightly; to flap. *Rare.*

flank (flăŋk), *n.* [F. *flanc*, of uncertain origin; cf. OHG. *hlanca* loin, hip.] **1.** The fleshy part of the side of an animal, between the ribs and the hip. See BEEF, *Illust.*

2. Hence, the side of anything, as of a hill or a building.

3. *Leather Manuf.* Hide from the flank, or side.

4. *Mil. & Nav.* **a** The right or left of an army, fleet, or any command, whether in line or column; also, the element, or portion of the command, on the right or left of a line; as, he attacked the enemy on both *flanks;* he ordered his right *flank* to advance.

When to right and left the front

1. Any of certain wingless blood-sucking insects having a hard, usually laterally compressed, body, and extraordinary powers of leaping. They were formerly included in the Diptera, but constitute a distinct order, Siphonaptera, syn. *Aphaniptera,* in recent classifications. The species form a single family, Pulicidæ, or in recent classifications several families. They mostly infest warm-blooded animals. The common American form is the cat or dog flea (*Ctenocephalus canis,* syn. *Pulex serraticeps*), which sometimes becomes very abundant in houses and is more or less troublesome to human beings. The human flea (*P. irritans*), though abundant in Europe, is not common in America. See also CHIGOE. The fleas undergo a complete metamorphosis; the larvæ are slender, legless, and wormlike, and are found in the dust and dirt about buildings inhabited by infested animals. Fleas on dogs are readily destroyed by dusting pyrethrum powder into the fur.

4. Responsive to, or readily adjustable to meet the requirements of, changing conditions; as, gas is more *flexible* than electric light; the steam engine is more *flexible* than the internal-combustion engine.

Syn. — Flexile, lithesome, elastic; yielding, tractable, ductile, facile, complaisant, docile; obsequious, servile, fawning. — FLEXIBLE, PLIABLE, PLIANT, SUPPLE, LIMBER, LITHE, LISSOME. That is FLEXIBLE (opposed esp. to *rigid, brittle*) which is easily bent, or which adapts itself readily to change of shape; that is PLIABLE (opposed esp. to *stiff, hard*) which is easily bent, folded, or (esp.) worked; PLIANT suggests more of inherent quality, less of susceptibility to external influence; as, a *flexible* cartilage, skin; leather made *pliable* by soaking, the *pliable* twigs of the osier; "to cleave with *pliant* arm [the] glassy wave" *(Gray)*; "his *pliant* length of whip" *(Cowper)*. Fig., *flexible* connotes susceptibility to impression, modification, or adaptation of whatever sort; *pliable*, esp. susceptibility to (often evil) influence or control; *pliant* often adds the implication of accommodation or complaisance; as, "a book language not yet *flexible* enough for the demands of rhythmic emotion" *(Lowell)*; "It is a *flexible* imagination which can take such a leap" *(G. Eliot)*; "Those lukewarm, irreligious temporizers had learned *pliably* to tack about" *(Wood)*; "subtle Litigation's *pliant* tongue" *(Burns)*; "A truly lyric genius could breathe life into the rigid formula and make it *pliant* to his more passionate feeling" *(Lowell)*. SUPPLE suggests esp. ease or freedom of movement; LIMBER, in modern usage, is chiefly employed of bodily movements; LITHE frequently connotes grace and activity; LISSOME is poetical; as, "iron jointed, *supple*-sinewed" *(Tennyson)*; "I will knead him; I'll make him *supple*" *(Shak.)*; "when . . . legs of trees were *limber*" *(Tennyson)*; "We could not use the term [*buxom*] as Milton did, in its original sense of 'bowsome,' — that is, 'lithe, graceful, bending,'" *(Lowell)*; "straight, but as *lissome* as a hazel wand" *(Tennyson)*. Fig., *supple* connotes obsequiousness and fawning; *limber*, weak compliance; *lithe* is rarely fig.; as, "Hypocrites are . . . too *supple* to be cruel. For cruelty is a stern and unbending passion; while hypocrisy is a fawning and *flexible* art" *(Buckle)*; "Read rascal in the motions of his back, and scoundrel in the *supple*-sliding knee" *(Tennyson)*; "*limber* vows" *(Shak.)*; *limber* virtue. See DUCTILE, ELASTIC, MOVABLE, ACTIVE, LIMP, LAX.

a Flexible Shaft **a.** 1 With Driving Pulley and Auger; 2 Detail partly in Section, showing Core, Wire Layers, and Wrapper. *b* Flexible Shaft **b** 1 With Guide Pistons; 2 With Guide Pistons and Springs for high-speed turbine.

— flex'i-ble-ness, *n.* — **flex'i-bly,** *adv.*

flex'ile (flĕk'sĭl), *a.* [L. *flexilis*.] Flexible; pliant; pliable; plastic; tractable; versatile. — **flex-il'i-ty** (flĕk-sĭl'ĭ-tĭ), *n.*

flex'or (flĕk'sŏr), *n.* [NL.] *Anat.* A muscle which serves to bend a limb or part; — opposed to *extensor*. The term is used in combination in the names of many muscles; as: (1) The **‖flex'or bre'vis** (*or* **per'fo-ra'tus**) **di'gi-to'rum** (brē'vĭs (pûr'fō-rā'tŭs) dĭj'ĭ-tō'rŭm), in the sole of the foot, sending tendons to the second phalanges of the four outer toes. (2) & (3) The **‖flex'or car'pi ra'di-a'lis** *and* **ul-na'ris** (kär'pī rā'dĭ-ā'lĭs, ŭl-nā'rĭs), superficial muscles of the front and ulnar side of the forearm, respectively. (4) The **‖flex'or di'gi-to'rum pro-fun'dus** (*or* **per'fo-rans**) (prō-fŭn'dŭs, pûr'fō-rănz), deeply situated in the ulnar region of the forearm, and sending tendons to the last phalanges of all the fingers except the thumb. (5) The **‖flex'or di'gi-to'rum sublī'mis** (*or* **per'fo-ra'tus**) (sŭb-lī'mĭs), situated in the front of the forearm, sending tendons to the second phalanges of all the fingers except the thumb. (6) The **‖flex'or lon'gus** (*or* **per'fo-rans**) **di'gi-to'rum**, on the tibial side of the leg, whose tendon passes behind the internal malleolus and divides, to be inserted into the last phalanges of the four lesser toes. (7) The **‖flex'or lon'gus hal-lu'cis** (hă-lū'sĭs), on the fibular side of the leg, whose tendon passes to the last phalanx of the great toe. Those flexor muscles which (as above noted) are sometimes termed *perforans* (perforating), and *perforatus* (perforated), receive these names because each of the four tendons of each perforans muscle passes through an opening in the corresponding tendon of the corresponding perforatus muscle about opposite the base of the digit to which it runs.

flow'er (flou'ẽr), *n.* [ME. *flour*, OF. *flour, flur, flor*, F. *fleur*, fr. L. *flos, floris.* Cf. BLOSSOM, EFFLORESCE, FLORET, FLORID, FLORIN, FLOUR, FLOURISH.] **1.** In popular usage, that part of a seed plant which normally bears reproductive organs, esp. when some or all of its parts are colored or conspicuous, a bloom or blossom. The word is thus used not only of single blossoms with colored floral leaves, as the pansy, rose, etc., but of a whole inflorescence or cluster, as the head of a daisy or clover. In this sense floral structures destitute of perianth, as those of grasses, oaks, elms, etc., would not be called flowers. Cf. BLOOM, *n.*
2. Any plant cultivated or esteemed for its blossoms; as, a garden planted with *flowers* instead of vegetables.
3. *Bot.* In the higher plants, a modified shoot of the sporophyte, adapted for reproductive purposes, and consisting of a shortened axis bearing one or more series of floral leaves, of which some or all are sporophylls. In the widest sense the term may be applied to the metamorphosed reproductive shoots of gymnosperms and many pteridophytes, as the cone of a pine or that of a horsetail. Some botanists, however, follow popular usage in limiting *flower* to those structures of seed plants in which there is an obvious floral envelope. In this sense neither the conifers, nor the oaks, willows, grasses, etc., can be said to produce true flowers. Structural analogies and the preponderance of opinion, however, favor the wider application of the word. A typical complete flower of a seed plant consists of an external protective envelope, or *perianth*, often differentiated into *calyx* and *corolla;* an *androecium*, composed of one or more *stamens*, which bear microspores, or *pollen grains;* and a *gynœcium*, often called a *pistil*, consisting of one or more *carpels* bearing *ovules*, each of which contains a megaspore; the latter, when fertilized by the contents of the microspore, organizes from its egg cell a new individual or embryo, which remains for a time dormant in the *seed.*

fluc'tu-an-cy, *n.* Tendency to fluctuation. *Obs. Oxf. E. D.*

are. See FLUCTUATE.] **1.** Moving like a wave; wavering; *Med.*, showing fluctuation; as, a *fluctuant* tumor.
2. Floating on the waves. *Obs.* *Bacon.*

fluc'tu-ate (flŭk'tŭ-āt), *v. i.*; -AT'ED (-āt'ĕd); -AT'ING (-āt'-ĭng). [L. *fluctuare* to wave, fr. *fluctus* wave, fr. *fluere*, *fluctum*, to flow. See FLUENT.] **1.** To move as a wave; to roll hither and thither; to wave; to float backward and forward, as on waves; as, a *fluctuating* field of air.
2. Hence, to be wavering, unsteady, irresolute, or undetermined; to vacillate.

Syn. — FLUCTUATE, OSCILLATE, VIBRATE, UNDULATE, VACILLATE, WAVER. FLUCTUATE suggests irregular or alternating movement (esp. up and down, or back and forth); to OSCILLATE is to swing within or between relatively fixed limits; to VIBRATE is to oscillate rapidly, or to quiver; fig., all three connote irresolution or instability; *vibrate* also frequently suggests responsiveness; as, the *fluctuation* of prices, the *oscillation* of a pendulum, the *vibration* of a bowstring; "The old unquiet breast, which neither deadens into rest, nor ever feels the fiery glow that whirls the spirit from itself away, but *fluctuates* to and fro" (*M. Arnold*); "Your poise will be more powerful than any *oscillating* tendency of mine" (*Hawthorne*); "[He] felt his soul thrill to the sight and *vibrate* to the sound" (*Shelley*). UNDULATE (which often suggests a waving or wavelike surface) is less frequently fig. than *fluctuate*; as, "The ripe corn under the *undulating* air *undulates* like an ocean" (*Shelley*); "The diversity, the *undulancy*, of human nature! — So deep a sense of it went with Montaigne always that himself too seemed to be ever changing color sympathetically therewith" (*W. Pater*). *Vacillate* and *waver* are now used chiefly of persons; to VACILLATE is to fluctuate weakly between two opinions or courses; to WAVER is to hesitate or shrink back, esp. with the implication of the shaking of previous determination; as, "The bad have fairly earned a victory o'er the weak, the *vacillating* inconsistent good" (*Wordsworth*); "Let him ask in faith, nothing *wavering*. For he that *wavereth* is like a wave of the sea driven with the wind and tossed" (*James* i. 6). See HESITATE, TRIFLE, SHAKE, CHANGE.

fluctuating variation. *Biol.* See VARIATION.

fluc'tu-ate, *v. t.* To cause to move as a wave; to put in motion.

And *fluctuate* all the still perfume. *Tennyson.*

fluc'tu-a'tion (-ā'shŭn), *n.* [L. *fluctuatio*; cf. F. *fluctuation.*] **1.** A motion like that of waves; a moving in this and that direction; as, the *fluctuations* of the sea.
2. A wavering or unsteadiness, as of opinion or prices.
3. *Med.* The wavelike motion of a fluid collected in a natural or artificial cavity, observed by palpation or percussion.

flue, flew (flōō; 243), *n.* [Cf. F. *flue* part of a net, Flem. *vluwe*, *vluve*, a fish net, OD. *vluwe.*] A kind of fishing net, fixed or dragged. *Habakkuk* i. 15 (*margin*).

flue (flōō; 243), *n.* [Of uncertain origin; perh. akin to *fly*, v.; cf. also *fluff*, in dial. use also a puff.] Light down, such as rises from cotton, fur, etc.; very fine lint or hair.

flue, *n.* [Of uncertain origin. Cf. 2d FLUKE.] A fluke or barb, as of an anchor or harpoon; also, a barb of a feather.

flue, *n.* [Of uncertain origin; cf. OF. *flue* a flowing, fr. *fluer* to flow, fr. L. *fluere* (cf. FLUENT); or perh. a corruption of E. *flute.*] **1.** An inclosed passageway for establishing and directing a current of air, gases, etc.; an air passage; esp.: **a** A compartment or division of a chimney for conveying flame and smoke to the outer air. **b** A passageway for conducting a current of fresh, foul, or heated air from one place to another. **c** *Steam Boiler.* A pipe or passage for conveying flame and hot gases around or through water in a boiler; — distinguished from a tube which holds water and is surrounded by fire. Small flues are called *fire tubes* or simply *tubes.* **d** In an organ flue pipe, the opening between the lower lip and the languette. See FLUE PIPE.
2. A gable or end-wall coping. *Dial. Eng.*

flue (flōō; 243), *v. i.*; FLUED (flōōd); FLU'ING. [Etym. uncertain.] To flare or expand, as the jambs of a window opening in a thick wall, or the jambs of a fireplace.

flue bridge. The separating low wall between the flues and the laboratory of a reverberatory furnace.

flued (flōōd), *a.* [See FLUE a fluke.] Having a flue, as a harpoon.

flu-el'len (flōō-ĕl'ĕn) } *n.* [W. *llysian Llewelyn*, lit., Lle-
flu-el'lin (flōō-ĕl'ĭn) } welyn's herbs.] **a** Either of the speedwells *Veronica officinalis* and *V. chamædrys.* **b** Toadflax or cancerwort (*Kickxia elatine* and *K. spuria*). **c** The mountain parsley of Europe (*Peucedanum oreoselinum*).

flu'en-cy (flōō'ĕn-sĭ; 243), *n.* [L. *fluentia*: cf. F. *fluence.* See FLUENT.] **1.** Profusion. *Obs.*
2. Quality of being fluent; smoothness; readiness of utterance; volubility.

The art of expressing with *fluency* and perspicuity. *Macaulay.*

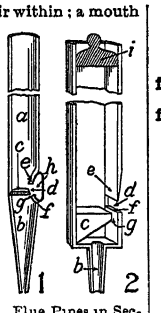
flu'ent (flōō'ĕnt), *a.* [L. *fluens, -entis*, p. pr. of *fluere* to flow; cf. Gr. φλύειν to boil over. Cf. FLUCTUATE, FLUX.]
1. Flowing, or capable of flowing; liquid; easily moving.
2. Ready in the use of words; voluble; copious; having words at command, and uttering them with facility and smoothness; as, a *fluent* speaker; hence, flowing; voluble; smooth; — said of language; as, *fluent* speech.
3. *Math.* Fluential.

Syn. — See TALKATIVE.

flu'ent, *n.* **1.** A current of water; a stream. *Obs.*
2. *Math.* A variable quantity, considered as continuously increasing or diminishing; — called, in the modern calculus, the *function* or *integral.*

flu-en'tial (flōō-ĕn'shăl), *a.* *Math.* Relating to, or like, a fluent.

flue pipe. *Music.* A pipe, esp. an organ pipe, whose tone is produced by the impinging of a current of air upon an edge, or lip, causing a wave motion in the air within; a mouth pipe; — distinguished from *reed pipe.*
Flue pipes are either open or closed (stopped at the distant end). The flute and flageolet are open pipes; a bottle acts as a closed pipe when one blows across the neck. The organ has both open and closed flue pipes, those of metal being usually round in section, and those of wood triangular or square. See PIPE.



Flue Pipes in Section. 1 Open Metal Pipe; 2 Stopped Wooden Pipe. *a* Body; *b* Foot; *c* Languette, *d* Mouth, *e* Upper Lip, *f* Lower Lip, *g* Flue, or Windway; *h* Ear, *i* Tompion, or Stopper.

flue plate *or* **sheet.** *Steam Engin.* A tube plate in a boiler for supporting the ends of flue tubes.

flue stop. *Organ Building.* A stop made up of flue pipes.

flue surface. *Steam Boiler.* The aggregate surface of flues exposed to flame or hot gases.

flue'work' (flōō'wûrk'), *n.* *Music.* The organ stops, collectively, in which the sound is caused by wind passing through a flue or fissure and striking an edge above; — in distinction from *reedwork.* It is commonly subdivided by differences of structure, shape, and tone into *principal work, gedackt work*, and *flutework.*

fluff (flŭf), *n.* [Cf. FLUE down.] **1.** Nap; down; flue; as: **a** The soft plumage on the abdomen and between the thighs of a domestic fowl. **b** The basal downy part of a feather.
2. *Slang, Eng.* **a** Among booking clerks, short change. **b** *Theat.* Forgetfulness of lines; imperfectly learned lines.

fluff, *v. i.*; FLUFFED (flŭft), FLUFF'ING. **1.** To become fluffy; to move lightly like fluff.
2. *Slang, Eng.* **a** Among booking clerks, to give short change. **b** *Theat.* To forget one's lines; to play one's part blunderingly.

fluff, *v. t.* To make fluffy.

fluff'y (flŭf'ĭ), *a.*; FLUFF'I-ER (-ĭ-ẽr); FLUFF'I-EST. **1.** Pertaining to, covered with, or resembling, fluff or nap; soft and downy. "The carpets were *fluffy*." *Thackeray.*

The present Barnacle . . . had a youthful aspect, and the *fluffiest* little whisker, perhaps, that ever was seen *Dickens.*

2. *Slang, Eng.* **a** Unsteady; drunk. **b** *Theat.* Forgetful of one's lines; of uncertain memory.

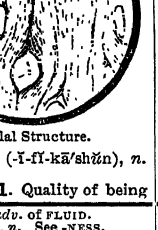
flu'id (flōō'ĭd; 243), *a.* [L. *fluidus*, fr. *fluere* to flow: cf. F. *fluide.* See FLUENT.] **1.** Having particles which easily move and change their relative position without a separation of the mass, and which easily yield to pressure; capable of flowing; liquid or gaseous.
2. Flowing; fluent, as speech.

Syn. — FLUID, LIQUID. Taken strictly, *fluid* and *liquid* are both opposed to *solid*; but LIQUID is also opposed to *gaseous*, whereas FLUID applies to both *liquid* and *gaseous* substances (see defs.). *Liquid*, more frequently than *fluid* (which suggests esp. freedom of flow or movement), is associated with drinking; as, "The enameled race, whose silvery wing . . . swims along the *fluid* atmosphere" (*Pope*); "There I suck the *liquid* air" (*Milton*). Fig., *fluid* is opposed to *rigid; liquid*, to *harsh; liquid* also connotes transparency; as, "All my former habits become suddenly *fluid*" (*Mrs. Humphry Ward*); "Thy *liquid* notes that close the eye of day" (*Millon*); "A singular charm of *liquid* air, with which the whole picture seems instinct, filling the eyes and lips, the very garments, of its sacred personages, with some wind-searched brightness and energy" (*W. Pater*): cf. "Chaucer's divine *liquidness* of diction, his divine *fluidity* of movement" (*M. Arnold*).

fluid dram, *or* **f. drachm,** a measure of capacity equal to one eighth of a fluid ounce. See FLUID OUNCE. — **f. extract,** *Pharm.*, a concentrated liquid preparation containing a definite proportion of the active principles of a medicinal substance. A fluid gram of extract should represent a gram of the crude drug. — **f. ounce,** a measure for liquid medicines, etc., divided into eight fluid drams. In the United States it equals $^1/_{16}$ pint, or 29.6 c. c. This, for water, is about 1.042 oz. av., or 455.6 grains. In Great Britain it equals $^1/_{20}$ imperial pint (28.4 c. c.), which for water is one ounce avoir., or 437.5 gr. — **f. pressure,** pressure of the nature of that exerted by a fluid. It is a thrust which is everywhere normal and of equal intensity.

flu'id, *n.* A fluid substance; one which yields to any force tending to alter its shape without altering its volume. *Fluids* include both liquids (incompressible fluids) and gases (compressible fluids); water, air, and steam are *fluids.* Electricity and magnetism were formerly regarded as fluids, and the phrases *electric fluid, magnetic fluid*, still survive in popular usage.

flu'id-al (flōō'ĭ-dăl), *a.* Pertaining to a fluid, or to its flowing motion. — **flu'id-al-ly,** *adv.*
fluidal structure, *Petrog.*, the structure characteristic of certain volcanic rocks in which the arrangement of the minute crystals shows the lines of flow of the material while molten.



Fluidal Structure.

flu'id-com-pressed', *a.* Compressed while in a fluid state; — said of steel.

flu-id'ic (flōō-ĭd'ĭk), *a.* Of, pertaining to, or like, a fluid; fluid.

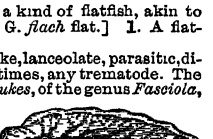
flu-id'i-fy (-ĭ-fī), *v. t.*; FLU-ID'I-FIED (-fīd); FLU-ID'I-FY'ING (-fī'ĭng). To render fluid; to fluidize. — **flu-id'i-fi-ca'tion** (-ĭ-fĭ-kā'shŭn), *n.* — **flu-id'i-fi'er** (-fī'ẽr), *n.*

flu-id'i-ty (-ĭ'tĭ), *n.* [Cf. F. *fluidité.*] **1.** Quality of being fluid, or capable of flowing; a liquid or gaseous state; — opposed to *solidity.*
2. Hence, changeableness; instability; easy adaptability.

The idea of personality . . . has been melted down again into its ancient and Oriental *fluidity.* *J. Martineau.*

flu'id-ize (flōō'ĭd-īz), *v. t.*; FLU'ID-IZED (-īzd); FLU'ID-IZ'ING (-īz'ĭng). To render fluid.

fluke (flōōk; 243), *n.* [AS. *flōc* a kind of flatfish, akin to Icel. *flōki* a kind of halibut, and G. *flach* flat.] **1.** A flatfish or flounder.
2. Any of various flattened, leaflike, lanceolate, parasitic, digenetic, trematode worms, sometimes, any trematode. The best-known flukes are the *liver flukes*, of the genus *Fasciola*, syn. *Distomum*, and allied genera. The common liver fluke, *F. hepatica*, infests the livers of cattle, swine, etc., and even man, but is especially destructive to sheep, causing the disease called *rot.* Its life history is complex. The eggs, if they happen to reach water, develop into a free-swimming embryo called a **miracidium**, which attacks and enters the body of an aquatic snail of the genus *Limnæa*, where it develops into a saclike stage called a **sporocyst.** In the sporocyst a generation of wormlike forms called **rediæ** is produced; these in turn (still within the body of the snail) produce tadpole-shaped larvæ termed **cercariæ.** These leave the snail and encyst themselves, and, if eaten by a suitable host, develop into an adult fluke.



Common Liver Fluke (*Fasciola hepatica*). *m* Mouth; *d* Branches of Stomach; *s* Ventral Sucker; *v* Genital Openings. Nat. size.

fluke, *n.* [Perh. named from its flatness, and the same word as *fluke* a flounder; or cf. LG. *flunk, flunke*, wing, the palm of an anchor.] **1.** That part of an anchor which fastens in the ground, esp. the broad end of each arm. See ANCHOR, 1.
2. The barbed head or one of the barbs of a harpoon, whaling lance, arrow, etc.
3 One of the lobes of a whale's tail, — so called from the resemblance to the fluke of an anchor.
4. An instrument shaped like a fluke of an anchor, such as that used to clean a hole in rock preparatory to blasting.
5. *Arsenic Manuf.* An inclined cast-iron plate in the roof of a furnace, dipping into the contents of the slowly rotating calciners to turn over and spread the mineral mispickel. *Cornwall, Eng.*

fluke, *n.* An accidentally successful stroke at billiards or pool; hence, any accidental or unexpected advantage; as, he won by a *fluke.* *Sporting Cant or Slang.*

fluke'wort' (flōōk'wûrt'), *n.* The European marsh pennywort (*Hydrocotyle vulgaris*); — so called because erroneously supposed to cause flukeworms in animals.

fluk'ing (flōōk'ĭng), *p. a.* *Naut.* Sailing fast with a fresh breeze, esp. running or reaching; — generally in *all fluking* or *a-fluking. Colloq.*

fluk'y (flōōk'ĭ; 243), *a.*; FLUK'I-ER (-ĭ-ẽr); FLUK'I-EST. [From FLUKE a successful stroke.] *Slang.* **1.** Happening or obtained by chance rather than skill; lucky.
2. Uncertain; unsteady; capricious; as, a *fluky* breeze

flume (flōōm; 243), *n.* [ME. *flum* river, OF. *flum*, fr. L. *flumen*, fr. *fluere* to flow. See FLUENT.] **1.** A stream; water. *Obs.*
2. A mill tail.
3. An inclined channel, usually of wood and often supported on a trestle, for conveying water from a distance to be utilized for power, transportation, etc., as in placer mining, logging, etc.
4. A ravine or gorge with a stream running through it. *U. S.*

flume, *v. t.*; FLUMED (flōōmd); FLUM'ING (flōōm'ĭng). **1.** To transport in a flume, as logs.
2. To divert by a flume, as the waters of a stream.

flume, *v. i.* To construct or utilize a flume.

flum'mer-y (flŭm'ẽr-ĭ), *n.*; *pl.* FLUMMERIES (-ĭz). [W. *llymru*, or *llymruwd*, a kind of food made of oatmeal steeped in water until it has turned sour.] **1.** A soft jellylike food made of flour or meal; pap.
2. A kind of custard or blancmange, often made of beaten eggs, cream, sweetened fruit, and cornstarch or gelatin.
3. A glutinous by-product in making starch from wheat.
4. Something insipid, or not worth having; empty compliment; trash; unsubstantial talk or writing.

The *flummery* of modern criticism. *J. Morley.*

flump (flŭmp), *v. t. & i.*; FLUMPED (flŭmpt); FLUMP'ING. [Imitative.] To sot, move, or fall, suddenly and heavily; to plump.

flump, *n.* Act of flumping; the dull sound or thud caused by the act; as, the shoe fell with a *flump.*

flunk (flŭnk), *v. i.*; FLUNKED (flŭnkt); FLUNK'ING. [Cf. FUNK.] To fail, as on a recitation or examination; to back out, as from an undertaking, through fear. — **flunk'er** (-ẽr), *n.* *Both Colloq., U. S.*

flunk, *v. t.* **1.** To fail in; to shirk. *Colloq., U. S.*
2. To cause to flunk, or fail. *School & College Cant, U. S.*

flunk, *n.* A failure or backing out; specif., *College Cant*, a total failure in a recitation or examination. *U. S.*

flunk'y, flunk'ey (flŭnk'ĭ), *n.*; *pl.* FLUNKIES, -EYS (-ĭz). [Perh. fr. or akin to *flank.*] **1.** A somewhat contemptuous name for a liveried servant; esp., a footman.
2. One who is obsequious or cringing; a snob; toady.

flunk'y, flunk'ey, *n.* [See FLUNK, *v.*] One who makes a flunk; esp., one easily deceived in buying stocks; an inexperienced and unwary jobber. *Cant, U. S.*

flunk'y-ism, flunk'ey-ism (-ĭz'm), *n.* Quality or characteristics of a flunky; toadyism. — **flunk'y-is'tic, flunk'ey-is'tic** (-ĭs'tĭk), *a.* — **flunk'y-ite, flunk'ey-ite,** *n.*

---

fluc'tu-ate, *a.* Fluctuating. *Obs.*

fluc'tu-ous (flŭk'tŭ-ŭs), *a.* [L. *fluctuosus.*] Full of waves; flowing or wavy. *Rare.* — **fluc-tu-os'i-ty** (-ŏs'ĭ-tĭ), *n.* *Rare*

flud. † FLOOD. [of FLOOD]

flude. Obs. or dial. Eng var of FLOODY.

flue. † *flew*, pret. of FLY

flue, flu (flōō), *n.* Influenza. *Colloq.*

flue, *n.* [Cf. FLEAM.] A lancet; a fleam. *Obs. or Dial. Eng.*

flue, *a.* Shallow; open; flaring. *Obs. or Dial. Eng.*

flue, *a.* [Cf. OF. *flou*] Feeble; sickly; thin. *Obs. or Dial. Eng*

flue'less, *a.* See -LESS.

Flu-el'len (flōō-ĕl'ĕn), *n.* A pedantic but brave Welsh captain in Shakespeare's "King Henry V."

flu'el-lite (flōō'ĕl-līt), *n.* [Irreg fr. *fluorine* + *-lite*] *Min.* Aluminum fluoride, $AlF_3·H_2O$, in colorless or white crystals.

flu'ence, *n.* A stream; also, fluency. *Obs.*

flu'ent-ly, *adv.* of FLUENT.

flu'ent-ness, *n.* See -NESS.

flu'et. Var. of FLEWET. *Scot. & Dial. Eng.*

flue'y (flōō'ĭ), *a.* [2d FLUE.] Downy; fluffy. *Rare.*

fluff (flŭf; flŏf), *n.* A puff, whiff, or flash. *Scot. & Dial. Eng.*

fluff, *v. i. & t.* To puff or flash; to cause to fluff. *Scot.*

fluff'-gib' (-gĭb'), *n.* A gunpowder squib. *Scot.*

fluff'i-ness (flŭf'ĭ-nĕs), *n.* See FLUFFY.

flu'gel (flū'g'l), *n.* [G., lit., a wing.] *Music.* A grand piano or a harpsichord, both being wing-shaped.

flu'gel-horn', *n.* [G.] *Music.* A hunting horn. **b** A variety of bugle.

flu'gel-man (flōō'g'l-măn), *n.*; *pl.* -MEN (-mĕn). [G. *Flügelmann.*] *Mil.* A fugleman.

flug-mat'ic. † PHLEGMATIC.

fluht. † FLIGHT.

flu'i-ble, *a.* [L. *fluere* to flow.] Fluid. *Obs.*

flu'id-ism (flōō'ĭd-ĭz'm), *n.* A theory that all diseases arise from change in the fluids of the body. — **flu'id-ist,** *n.*

flu'id-ly, *adv.* of FLUID.

flu'id-ness, *n.* See -NESS.

flu'i-drachm' (flōō'ĭ-drăm'), *n.* A fluid dram. See under FLUID.

flu'i-gram', **flu'i-gramme'** (-grăm'), *n.* [See GRAM.] A cubic centimeter.

flu'i-tant (flōō'ĭ-tănt), *a.* [L. *fluitans, -antis*, p. pr. of *fluitare* to float, v. freq.] Floating. *Rare.*

fluk'an. Var. of FLUCAN.

fluke, *v. t. & i.* To get, hit, or score by a fluke. *Slang.*

fluked (flōōkt), *a.* Infested with liver flukes; — said of sheep, etc.

fluke'less, *a.* See -LESS.

fluke'worm', *n.* = 1st FLUKE, 2.

fluk'ey. Var. of FLUKY.

fluk'i-ly (flōōk'ĭ-lĭ), *adv.* of FLUKY.

fluk'i-ness (flōōk'ĭ-nĕs), *n.* See -NESS.

fluk'y, *a.* Formed like, or having, a fluke, as an anchor.

fluk'y, *a.* Infested with flukes.

flum Scot. & dial. Eng. var. of FLAM, nonsense; FLAM, deceive.

flu-mat'ic. † PHLEGMATIC

flu'mi-nose (flōō'mĭ-nōs), **flu'mi-nous** (-nŭs), *a.* [L. *flumen, fluminis*, river.] Pertaining to rivers; abounding in streams.

flum'ma-did'dle (flŭm'ă-dĭd'l), *n.* Also **flumaddidle, flumdiddle, flummydiddle.** Nonsense; balderdash; humbug; something trivial or silly; flummery. *Colloq.*

flum'mer, *v. t. Obs.* **1.** To mumble; mouth. [bug; beguile]
2 [Cf. FLUMMERY.] To hum-

flum'mix Var. of FLUMMOX.

flum'mox (flŭm'ŭks), *v. t.* To throw into perplexity; to embarrass greatly; confound. *Slang.*

flum'mox. *v. t.* To fail ingnominiously; to collapse; to be thoroughly disconcerted. *Slang.*

flung (flŭng), *pret. & p. p.* of FLING.

flunge, *v. i.* Perh. a contamination (which see) of *fly* and *plunge. Obs.* [a servant.]

flunk'ie. Scot. var. of FLUNKY, a servant.

flunk'y-dom, **flunk'ey-dom** (flŭngk'ĭ-dŭm), *n.* See -DOM.

flunk'y-hood, flunk'ey-hood, *n.* See -HOOD. [-ISH]

flunk'y-ish, flunk'ey-ish, *a.* See

flunk'y-ize, flunk'ey-ize, *v. t.* See -IZE.

flu'o- (flōō'ŏ- ; 243). *Chem.* A combining form indicating *fluorine* as an ingredient; as in *fluo*silicate, *fluo*benzene.

flu'o-ben'zene (-bĕn'zēn ; -bĕn-zēn'), *n.* [*fluo-* + *benzene.*] *Org. Chem.* A colorless liquid, C_6H_5F, resembling benzene. It is made from benzene (by a series of reactions) by replacing one sixth of the hydrogen with fluorine.

flu'o-bo'rate (-bō'rāt ; 201), *n. Chem.* A salt of fluoboric acid. The salts of the acid HBF_4 are also called **borofluorides** or **fluoborides**. Some have been used as antiseptics.

flu'o-bo'ric (-rĭk ; 201), *a.* [*fluo-* + *boric.*] *Chem.* **a** Pert. to or designating a corrosive, fuming acid, perhaps $H_4BO_2F_3$, formed when water is saturated with boron fluoride, BF_3. **b** Pert. to or designating the acid HBF_4 (called also *hydrofluoboric acid*), formed in solution by treating the above acid or boron fluoride with much water. See FLUOBORATE.

flu'o-phos'phate (-fŏs'fāt), *n.* [*fluo-* + *phosphate.*] *Min.* A phosphate containing fluorine, as fluorapatite.

flu'or (flōō'ŏr ; 243), *n.* [L., flux, fr. *fluere* to flow. See FLUENT.] **1.** A stream; flowing; specif., menstruation. *Obs.* **2.** A fluid state; also, a fluid or fluid mass. *Obs.* **3.** *Min.* Fluorite.

flu'or- (flōō'ŏr-). Combining form for *fluorine.*

flu'or-ane (-ān), *n.* [*fluor-* + *-ane.*] *Org. Chem.* A crystalline substance, $C_{20}H_{12}O_3$, formed as a by-product in the preparation of phenolphthalein, of which it is an anhydride ; — so called from its fluorescence in solution.

flu'or-an'thene (-ăn'thēn), *n.* [*fluor*ene + *anthr*acene.] *Chem.* A white crystalline hydrocarbon, $C_{15}H_{10}$, of complex cyclic structure, found in the portions of coal tar having the highest boiling points, in petroleum, etc.

flu'or-ap'a-tite (-ăp'ă-tīt), *n. Min.* Common apatite, containing fluorine but little or no chlorine. See APATITE.

flu'or-at'ed (flōō'ŏr-āt'ĕd), *a. Chem.* Combined or treated with fluorine or hydrofluoric acid.

flu'or-ene (-ēn), *n. Chem.* A colorless crystalline hydrocarbon, $C_{13}H_{10}$, of complex cyclic structure, having (unless very pure) a beautiful violet fluorescence. It occurs in the coal tar products having the higher boiling points.

flu'o-resce' (flōō'ŏ-rĕs' ; 243), *v. i.* ; FLU'O-RESCED' (-rĕst'); FLU'O-RESC'ING. To produce or exhibit fluorescence.

flu'o-res'ce-in (-rĕs'ē-ĭn), *n.* Also **-ine.** *Chem.* **a** A yellowish red crystalline substance, $C_{20}H_{12}O_5$, produced by heating together phthalic anhydride and resorcin ; — so called from the very brilliant yellowish green fluorescence of its alkaline solutions. It is used in making eosin. *Uranin*, the potassium or sodium salt of fluorescein, is used for dyeing silk and wool brilliant yellow. **b** Any of several compounds of which the above is a type.

flu'o-res'cence (-ĕns), *n.* [From FLUOR.] *Physics.* That property which some bodies, particularly certain organic solutions, have of emitting light while exposed to the action of certain rays of either the visible or the ultra-violet spectrum, or of cathode rays, Rontgen rays, etc. ; also, the light so produced. The light of fluorescence is quite distinct from that reflected at the surface of the body, which gives it its surface color, and also from that transmitted by the body. It is definitely related to the light which the substance is capable of absorbing, and in the case of liquids and solids exhibits a continuous spectrum the maximum of which is of somewhat greater wave length than the maximum of some band in the absorption spectrum of the substance. Cf. LUMINESCENCE.

fluorescence spectrum. *Physics.* The spectrum of the light emitted by a body when excited to fluorescence.

flu'o-res'cent (-ĕnt), *a.* Having or showing fluorescence. **fluorescent blue,** resorcin blue. See DYE. — *f.* **lamp,** a lamp whose illumination is due to fluorescence. — *f.* **screen,** *Physics,* a screen, as of cardboard or vulcanite, one face of which is coated with some fluorescent substance, such as calcium tungstate or calcium sulphide. Cf. FLUOROSCOPE.

flu'o-res'ci-gen'ic (flōō'ŏ-rĕs'Ĭ-jĕn'Ĭk), *a.* [*fluorescence* + *-genic.*] Causing fluorescence, as certain bacteria.

flu'o-res-cig'e-nous (-rĕ-sĭj'ĕ-nŭs), *a.* [*fluorescence* + *-genous.*] Capable of producing fluorescence, as the ultra-violet rays of the spectrum, cathode rays, X rays, etc.

flu-or'ic (flōō-ŏr'Ĭk ; 243), *a.* [Cf. F. *fluorique.*] *Chem.* Pertaining to, obtained from, or containing, fluorine. **fluoric acid,** hydrofluoric acid. *Obs.*

flu'or-ide (flōō'ŏr-īd ; -Id ; 184, 243), *n.* Also **-id.** *Chem.* A compound of fluorine with another element or radical.

flu'or-in'dine (-Ĭn'dĭn ; -dēn), *n.* Also **-din.** [*fluor*escence + *indu*line.] *Org. Chem.* Any of a class of nitrogenous dyes of complex cyclic structure, prepared by heating indulines and by other methods. In general they are green and crystalline and their solutions have a red fluorescence.

flu'or-ine (flōō'ŏr-Ĭn ; -ēn ; 184), *n.* [NL. *fluorina :* cf. G. *fluorin,* F. *fluorine.* So called from its occurrence in the mineral *fluorite.*] *Chem.* An element of the chlorine family, isolated as a pungent, corrosive gas of pale greenish yellow color by electrolysis of anhydrous hydrofluoric acid. At. wt., 19.0. Symbol, *F.* Fluorine is found (in combined form only) in fluorite and cryolite, and in small amounts in several minerals, in mineral waters, in bones, etc. It is extremely active chemically, even at very low temperatures, so that, although it had long been recognized as an element, it was isolated for the first time in 1886 (by Moissan). It combines with every element except oxygen. It cannot be prepared or kept in vessels of glass, which it attacks freely. Sp. gr. (referred to air), 1.31. By intense cold it has been reduced to a yellow liquid boiling at —187° C., and to a pale yellow solid melting at —223° C. See FLUORITE, HYDROFLUORIC.

flu'or-ite (-īt), *n.* [From FLUOR.] *Min.* Calcium fluoride, CaF_2, a transparent or translucent mineral of many different colors, often very beautiful, crystallizing commonly in cubes with perfect octahedral cleavage, also massive. It is used as a flux. Some varieties are used for ornamental vessels. H., 4. Sp. gr., about 3.2.

flu'or-me'ter (flōō'ŏr-mē'tĕr), *n.* [*fluor-* + *-meter.*] *Chem.* An apparatus for the volumetric determination of fluorine.

flu-or'o-form (flōō-ŏr'ŏ-fôrm), *n.* [*fluor-* + *formyl.*] *Chem.* A colorless gas, CHF_3, similar to chloroform, $CHCl_3$, but containing fluorine instead of chlorine.

flu'or-oid (flōō'ŏr-oid), *n.* [*fluor-* + *-oid.*] *Cryst.* A tetrahexahedron ; — a common crystal form for fluorite.

flu-or'o-scope (flōō-ŏr'ŏ-skōp), *n.* [*fluor*escence + *-scope.*] *Physics.* An instrument for observing or exhibiting fluorescence. Specif., a fluorescent screen, with hood to protect the eyes, used to observe the shadows cast by objects in the path of the X rays. — **flu-or'o-scop'ic** (-skŏp'Ĭk), *a.*

Fluoroscope.

flu'or-os'co-py (flōō'ŏr-ŏs'kŏ-pĭ), *n.* Examination of an object, as the human body, by exposing it to the X rays and observing the shadow cast upon a fluorescent screen ; cryptoscopy.

fluor spar. The mineral fluorite.

flu'o-sil'i-cate (flōō'ŏ-sĭl'Ĭ-kāt), *n. Chem.* A salt of fluosilicic acid ; — called also *silicofluoride.*

flu'o-si-lic'ic (-sĭ-lĭs'Ĭk), *a.* [*fluo-* + *silicic.*] *Chem.* Pertaining to or designating an unstable dibasic acid, H_2SiF_6, known only in aqueous solution, being formed by the action of silicon fluoride, SiF_4, on water.

flu'o-tan-tal'ic (-tăn-tăl'Ĭk), *a.* [*fluo-* + *tantalic.*] *Chem.* Pert. to or designating an acid, H_2TaF_7, known only in its salts, the **flu'o-tan'ta-lates** (-tăn'tă-lāts), which are formed by union of tantalum fluoride with fluorides of other metals.

flu'o-zir'con-ate (-zûr'kŏn-āt), *n. Chem.* A zirconifluoride, esp. one of the general formula M_2ZrF_6.

flur'ried (flŭr'Ĭd), *a.* Agitated; excited.—**flur'ried-ly,** *adv.*

flur'ry (-Ĭ), *n. ; pl.* -RIES (-Ĭz). [Prob. imitative.] **1.** A sudden and brief commotion of the air ; as, a *flurry* of wind.

2. A light shower or snowfall accompanied with wind.

Like a *flurry* of snow on the whistling wind. *Longfellow.*

3. Spasmodic agitation ; nervous commotion ; flutter.

The racket and *flurry* of London life. *Blackw. Mag.*

4. The violent spasms of a dying whale.

flur'ry, *v. t. ;* FLUR'RIED (-Ĭd) ; FLUR'RY-ING. To put in a state of agitation ; to excite, as by haste.

Syn. — See FLUSTER.

flur'ry, *v. i.* To move, or be moved, in a flurry.

flush (flŭsh), *v. i. ;* FLUSHED (flŭsht); FLUSH'ING. [Cf. ME. *fluschen* to fly up, but influenced by *flash* and *blush.* See FLUSH to start up suddenly.] **1.** To flow and spread suddenly and freely ; to rush ; as, blood *flushes* into the face.

The *flushing* noise of many waters. *Boyle.*

2. To become suddenly suffused, as the cheeks ; to turn red or hot ; to blush.

3. To show red ; to shine suddenly ; to glow.

4. To fledge ; to throw out shoots. *Rare or Dial. Eng.*

flush, *v. t.* **1.** To animate; excite ; encourage.

The opposition, *flushed* with victory. *Macaulay.*
Feed his pride and *flush* his ambition. *South.*

2. To cause to flow ; to draw water from, or pour it over or through (a pond, meadow, sewer, etc.) ; to cleanse by means of a rush of water.

3. To make suddenly or temporarily red, rosy, or glowing, as if suffused with blood or flooded with color.

How faintly *flushed,* how phantom fair,
Was Monte Rosa, hanging there ! *Tennyson.*
Sudden a thought came like a full-blown rose
Flushing his brow. *Keats.*

flush, *n.* **1.** A sudden flowing or increase in volume ; a rush which fills or overflows, as of water for cleansing purposes.

In manner of a wave or *flush.* *Ray*

2. A sudden increase or expansion ; esp., a sudden or abundant growth ; as, the *flush* of grass ; hence, a tender young shoot, as of the tea plant.

3. A sudden flood or rush of feeling ; a thrill, as of excitement, animation, elation ; as, a *flush* of joy.

4. Any tinge of red or ruddy light or color, as that produced on the cheeks by a sudden rush of blood ; hence, glow ; vigor ; as, the *flush* on the side of a peach ; the *flush* on the clouds at sunset ; the *flush* of youth.

The *flush* of angered shame. *Tennyson.*

5. A fit of extreme heat, as in a fever.

flush, *v. i.* [ME. *fluschen ;* perh. of imitative origin.] To start up suddenly ; to fly like a startled bird.

Flushing from one spray unto another. *W. Browne.*

flush, *v. t.* To cause to start up and fly, as a startled bird.

We *flushed* them [birds] from the tall grass. *T. Roosevelt.*

flush, *a. ;* FLUSH'ER (-ĕr) ; FLUSH'EST. [Cf. FLUSH to flow, as blood.] **1.** Fully supplied ; well filled ; affluent ; as, rivers are *flush* in springtime ; he was very *flush* of money. **2.** Full of life and vigor ; lusty ; spirited ; hence, of a ruddy color ; flushed. "As *flush* as May." *Shak.* **3.** Abundant ; hence, lavish ; prodigal ; prosperous ; as, money is *flush ;* he is *flush* with money ; *flush* times. **4.** Unbroken or even in surface ; on a level with the adjacent surface ; forming a continuous surface ; as, a *flush* panel, bolt, joint, deck ; the river is *flush* with its banks. **5.** *Naut.* Of a vessel, having a flush deck. **6.** Direct ; full ; unswerving ; as, a *flush* statement or blow.

flush, *adv.* [See FLUSH, *a.*, fully supplied.] **1.** So as to be level or even ; in the same plane. **2.** Without interruption ; straight ; squarely.

flush, *n.* A flush surface. See FLUSH, *a.*, 4.

flush, *v. t.* [See FLUSH, *a.*, abundant, on a level.] To make flush or level, as joints in masonry by pointing ; — sometimes with *up.*

flush, *v. i. Arch.* **a** To break away at the edges through excess loading ; — said of a stone in a wall or other structure. **b** To be forced out to or from the joints through pressure ; — said of mortar.

flush (flŭsh), *n.* [From F. or Sp. *flux.* Cf. FLUX.] *Card Playing.* A hand of cards all of the same suit.

flush box. **1.** *Elec.* Any of a series of cast-iron boxes, flush with the roadway, arranged at intervals along an electric-wire conduit system, for introducing or pulling out wires to facilitate installation or repairing. **2.** = FLUSH TANK.

flush'er (flŭsh'ĕr), *n.* **1.** One that flushes something ; specif. : **a** A workman who flushes sewers ; flusherman. **b** A device used in flushing a sewer, consisting essentially of a cylinder with radiating perforations or nozzles. **2.** The European red-backed shrike (*Lanius collurio*).

flush-om'e-ter (flŭsh-ŏm'ē-tĕr), *n.* [*flush* + *-meter.*] *Plumbing.* A gravity valve for flushing all sinks, closets, etc., in a building, from a single tank.

flush rim. The rim of a water-closet bowl having a channel or perforated tube by which the bowl is flushed simultaneously from all sides.

flush tank. A water tank for flushing drainpipes, etc.

flus'ter (flŭs'tĕr), *v. t. ;* FLUS'TERED (-tĕrd) ; FLUS'TER-ING. [Cf. Icel. *flaustr a* to be flustered, *flaustr* a fluster.] To make hot and rosy, as with drinking ; to fuddle ; to excite and throw into agitation and confusion ; to confuse ; muddle.

His habit of *flustering* himself daily with claret. *Macaulay.*

Syn. — FLUSTER, FLURRY. To FLUSTER, the stronger term, is to agitate or (esp.) bewilder ; to FLURRY is to throw into sudden trepidation or fluttered confusion ; as, "*flustered* with new wine" (*Tennyson*) ; "Scared with threats of jail and halter, [he] gave to him that *flustered* his poor parish wits the letter" (*id.*) ; "We were at first quite *flurried* and confounded with the hurry in the garrison" (*H. Swinburne*) ; she looked hot and *flurried.*

flus'ter, *v. i.* To be in a heat or bustle ; as : **a** To be agitated and confused. **b** To bluster.

The *flustering,* vainglorious Greeks *South.*

flus'ter, *n.* Heat or glow, as from drinking ; agitation mingled with confusion.

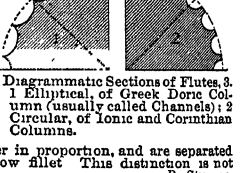
flus'ter-a'tion (-ă'shŭn), **flus-tra'tion** (-trā'shŭn), *n.* Act of flustering, or state of being flustered. *Colloq. Richardson.*

Flus'tra (flŭs'trà), *n.* [NL.] *Zoöl.* A genus of marine cheilostomatous Polyzoa which form branching colonies with broad flattened ramifications. — **flus'trine** (-trĭn ; -trīn), *a.* — **flus'troid** (-troid), *a.*

flute (flōōt ; 243), *n.* [ME. *floute, floite,* fr. OF. *flehute, flaiute, fleuiste,* F. *flûte ;* cf. LL. *flauta,* D. *fluit ;* of uncertain origin. See FLUTE, *v. i.*] **1.** *Music.* A wind instrument consisting of a hollow cylinder or pipe, with holes along its length, stopped by the fingers or by keys which are opened by the fingers. Ancient and medieval flutes

Boehm Flute.

had conical tubes blown directly through a mouthpiece at the upper end. The modern flute is closed at the upper end, and blown with the mouth at a lateral hole. The improved model invented by Boehm in 1832 is cylindrical, and its fingering is simplified by a system of rings and levers combined with the keys. Its tones are smooth, sweet, and full in the lower register, brilliant or shrill in the higher. Its compass is about three octaves above middle C. **2.** *Music.* A stop in an organ, having stopped wooden pipes, usually of 4-foot pitch, of a flutelike tone. **3.** *Arch.* A groove of curved section : usually any one of a series of vertical grooves used to decorate columns and pilasters in Classical architecture. See BASE, *n., Illust.*



Diagrammatic Sections of Flutes. 3. 1 Elliptical, of Greek Doric Column (usually called Channels) ; 2 Circular, of Ionic and Corinthian Columns.

It is customary to distinguish . . . the channels which adorn the shaft of the Greek Doric order and which are elliptical in section, and separated one from another by a common arris, from the *flutes* of the Ionic and Corinthian orders, which are circular in section, deeper in proportion, and are separated one from another by a narrow fillet This distinction is not always maintained. *R. Sturgis.*

4. A similar channel or groove made in wood or other material, esp. in plaited cloth, as in a ruffle, or in a hat brim. **5.** Any of various flute-shaped objects ; specif. : **a** A long French breakfast roll. **b** A kind of tall slender wine glass ; — called also *flute glass.* "*Flutes* of canary." *Lovelace.* **c** A long shuttle used in weaving tapestry. **d** *Founding.* A molder's tool for forming flutes (grooves).

Molder's Flute.

flute, *v. i. ;* FLUT'ED (flōōt'ĕd ; -Id) ; FLUT'ING (flōōt'Ĭng). [ME. *flouten, floiten,* OF. *flaiuter, fleuter,* F. *flûter :* cf. D. *fluiten.* See FLUTE, *n. ;* cf. FLOUT.] To play on or as on a flute ; to make a flutelike sound.

flute, *v. t.* **1.** To play, whistle, or sing, with a clear, soft note, like that of a flute.

The redwing *flutes* his o-ka-lee. *Emerson.*

2. To form flutes or channels in, as in a column.

flute (flōōt), *n.* [Cf. F. *flûte* a transport, D. *fluit.*] **a** A kind of flyboat. **b** A storeship. **c** A naval transport, partially armed. *Obs. or R.* — **armed en flute,** *or* **en f.,** *Nav.,* partially armed ; — said of a vessel. *Obs. or R.*

‖ **flûte' à bec'** (flu'-tà'bĕk'). [F.] *Music.* A beak flute, an older form of the flute, played with a mouthpiece resembling a beak, and held like a flageolet.

flute bird. The piping crow (*Gymnorhina tibicen*).

flute bit. A bit having a square pyramidal point and two cutting lips, for piercing ebony, rosewood, and other hard woods, as in cutting finger and key holes in flutes.

flut'ed (flōōt'ĕd ; -Id ; 151 ; 243), *p. a.* **1.** Thin ; fine ; clear and mellow ; flutelike ; as, *fluted* notes.

flu'or-ar'se-nate, *n. Min.* A compound made up of an arsenate and a fluoride (as, for example, $AlAsO_4.NaF$), but to be regarded, in most cases, as belonging to a radical, as $Na(AlF)AsO_4$.

flu'o-bo'ride (flōō'ŏ-bō'rĭd ; -rĭd; 184), *n.* Also **-rid.** *Chem.* See FLUOBORATE.

flu'o-car'bon-ate, *n.* [*fluo-* + *carbonate.*] *Min. Chem.* A carbonate containing fluorine.

flu'o-ce'rine (flōō'ŏ-sē'rĭn), *n. Min.* Fluocerite.

flu'o-ce'rite (-sē'rīt), *n.* [*fluo-* + *cerium.*] *Min.* A reddish yellow fluoride of cerium and other allied metals. H., 4. Sp. gr., 5.8.

flu'o-hy'dric (-hī'drĭk), *a.* [*fluo-* + *hydr*ogen.] *Chem.* Hydrofluoric.

‖ **flu'or al'bus.** [L., white flow.] *Med.* The whites ; leucorrhea.

flu'or-ate, *n. Chem.* A fluoride.

flu'or-ben'zene, *n.* Fluobenzene.

flu'o-res'cin (flōō'ŏ-rĕs'Ĭn), *n. Chem.* A colorless, amorphous substance, $C_{20}H_{14}O_5$, produced by reducing fluorescein.

flu'or-hy'dric (flōō'ŏr-hī'drĭk), *a. Chem.* Hydrofluoric

flu'or-o-bo'rate, *n. Chem.* A fluoborate.

flu-or'o-type (flōō-ŏr'ŏ-tīp), *n.* [*fluor-* + *-type.*] *Photog.* An old positive process using paper sensitized with silver fluoride and silver bromide.

flu'o-sul-phon'ic, *a.* [*fluo-* + *sulphonic.*] *Chem.* Designating an acid, $HFSO_3$, obtained as a colorless, slightly pungent liquid by the action of hydrogen fluoride or sulphur trioxide.

flu'o-ti-tan'ic, *n.* [*fluo-* + *titanic.*] *Chem.* Designating an acid of titanium, H_2TiF_6, analogous to fluosilicic acid and best known in its salts, the **flu'o-ti'tan-ates** (flōō'ŏ-tĭ'tăn-āts). **flure.** + FLOUR, FLOWER.

flure. Obs. or Scot. and dial. Eng. var. of FLOOR.

flur'ish. Flourish. *Ref. Sp.*

flur'ished. Flourished. *Ref. Sp.*

flurishen. † FLOURISH.

flurn (flûrn), *v. i.* To sneer. *Obs. or Dial. Eng.* [ingly. *R.*

flurr, *v. t.* To throw scatter-

flurr, *v. i.* To flutter; flit. *Rare.*

flurt. Obs. or dial. Eng. var. of FLIRT.

flush, *n.* A pool ; morass. *Obs.*

flush, *n.* [See FLUSH to start up.] A flight of flushed birds.

flush, *a.* Fledged. *Obs. or Dial. Eng.*

flush, *a.* [From FLUSH, *n.* (of cards).] *Card Playing.* Having cards of one suit only ; — said of a player or of his hand.

flush'board', *n.* = FLASHBOARD.

flush'er-man, *n. ; pl.* -MEN. A flusher of sewers.

flush'ing, *p. pr. & vb. n. of* FLUSH.

flush'ing, *n.* [From *Flushing* in the Netherlands. *Oxf. E. D.*] **1.** A heavy, coarse cloth manufactured from shoddy. *Eng.* **2.** [Cf. FLUSH level.] *Weaving.* A surface of floating threads.

flush'ing, *n.* Flashing.

Flush'ing-er, *n.* A vessel or man from Flushing (Netherlands).

flush'ing-ly, *adv.* of FLUSHING.

flushing rim. = FLUSH RIM.

flush'ness, *n.* See -NESS.

flusht. Flushed. *Ref. Sp.*

flush'y, *a.* Flushed ; reddish.

flusk (flŭsk), *v. i.* [Cf. FLUSH to start up suddenly.] **1.** To flush, as a bird. *Dial. Eng.* **2.** To quarrel. *Dial. Eng*

flusk'er, *n. & v. i. & t.* [Freq. of FLUSK.] Flutter; fluster ; flurry. *Obs. or Dial. Eng*

flus'ter-ate (flŭs'tĕr-āt), **-trate** (-trāt), *v. t* To fluster. *Colloq.*

flus'ter-ed. Flustered. *Ref. Sp.*

flus'ter-er, *n.* The coot (*Fulica americana*). *Local, U. S.*

flus'ter-ment, *n.* See -MENT.

flus'ter-y (-Ĭ), *a.* Flustered.

flus'trum, *n* A fluster. *Rare.*

flute'-douce' (flōōt'/dōōs'), *n.* [F. *flûte douce,* lit., sweet flute.]

2. Decorated with or as with flutes; channeled; grooved; as, a *fluted* column; a *fluted* ruffle; a *fluted* spectrum. **fluted scale,** the cottony-cushion scale. — *f.* **spectrum.** See SPECTRUM.

flute'mouth' (flo͞ot'mouth'; 243), *n.* Any of certain elongated hemibranchiate marine fishes with a long tubular snout, which constitute the families Aulostomatidæ and Fistularidæ. See FISTULARIA, AULOSTOMA.

flut'er (flo͞ot'ẽr; 243), *n.* **1.** A flutist, or flautist. **2.** One who makes grooves or flutings; also, a tool or implement for making flutings.

flute'work' (flo͞ot'wûrk'), *n.* *Music.* Those flue stops of an organ, collectively, not classed as *principal work* or as *gedackt work.* Certain modifications of these two classes, however, are included under *flutework.*

flut'ing (flo͞ot'ĭng), *n.* **1.** Action of one who flutes. **2.** Decoration by means of flutes or channels; a flute, or flutes collectively; as, the *fluting* of a column; the *fluting* of a lady's ruffle. Hence, a shading which gives a fluted appearance; as, the lines and *flutings* of a spectrum.

fluting iron A laundry iron for fluting ruffles.

flut'ist (flo͞ot'ĭst; 243), *n.* [Cf. F. *flûtiste.*] A performer on the flute; a flautist.

flut'ter (flŭt'ẽr), *v. i.*; FLUT'TERED (-ẽrd); FLUT'TER-ING. [ME. *floteren*, AS. *flotorian* to float about. Akin to E. *fleet*, v. i., *float.*] **1.** To move or flap the wings rapidly, without flying, or with short flights.

As an eagle stirreth up her nest, *fluttereth* over her young, spreadeth abroad her wings. *Deut.* xxxii. 11.

2. To move with quick vibrations or undulations; as, a sail *flutters* in the wind; a *fluttering* fan; his pulse *flutters.*

3. To move about agitatedly, irregularly, or with great bustle and show, without much result.

No rag, no scrap, of all the beau, or wit,
That once so *flutter'd*, and that once so writ. *Pope.*

4. To be in agitation or uncertainty; to quiver with excitement or indecision.

His thoughts are very *fluttering* and wandering. *I. Watts.*

Syn. — See FLIT.

flut'ter, *v. t.* **1.** To vibrate or move quickly; as, a bird *flutters* its wings.

2. To throw into confusion or flutter.

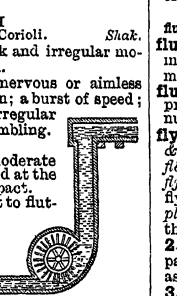
Like an eagle in a dovecote, I
Fluttered your Volscians in Corioli. *Shak.*

flut'ter, *n.* **1.** Act of fluttering; quick and irregular motion; vibration; as, the *flutter* of a fan.

2. Agitation, confusion; disorder; nervous or aimless activity; hence, *Colloq.*: **a** A short run; a burst of speed; as, a half-mile *flutter.* **b** A spasm of irregular activity in stocks. **c** A venture at gambling.

3. Stir; ostentation; display. *Obs.*

flutter wheel. A water wheel of moderate diameter having radial floats and placed at the bottom of a chute so as to work by impact.



Flutter Wheel.

flut'ter-y (flŭt'ẽr-ĭ), *a.* Fluttering; apt to flutter.

flut'y (flo͞ot'ĭ), *a.*; FLUT'I-ER (-ĭ-ẽr); FLUT'I-EST. Having a tone like that of a flute; flutelike.

flu'vi-al (flo͞o'vĭ-ăl; 243), *a.* [L. *fluvialis*, from *fluvius* river, fr. *fluere* to flow: cf. F. *fluvial.* See FLUENT.] Of or pert. to rivers; growing or living in streams or ponds; produced by river action; as, a *fluvial* plain.

flu'vi-a-tile (*-a-tĭl*), *a.* [L. *fluviatilis*, fr. *fluvius* river: cf. F. *fluviatile.*] Belonging to, existing in or about, or produced by the action of, streams or rivers; fluvial.

flu'vi-o- (flo͞o'vĭ-ō-; 243). A combining form from Latin *fluvius*, meaning *river.*

flu'vi-o-gla'cial (-glā'shăl; -shĭ-ăl), *a.* *Geol.* Produced by streams which have their source in glacier ice.

flu'vi-o-graph' (flo͞o'vĭ-ō-grăf'), *n.* [*fluvio-* + *-graph.*] An instrument for measuring and recording automatically the rise and fall of a river.

flu'vi-o-ma-rine' (-mȧ-rēn'), *a.* [*fluvio-* + *marine.*] *Geol.* Formed by the joint action of a river and the sea, as deposits at the mouths of rivers.

flu'vi-o-ter-res'tri-al (-tẽ-rĕs'trĭ-ăl), *a.* Pertaining to the land and its streams; as, *fluvioterrestrial* shells.

flux (flŭks), *n.* [L. *fluxus*, fr. *fluere, fluxum*, to flow: cf. F. *flux.* See FLUENT; cf. FLUSH, *n.* (of cards).] **1.** *Med.* **a** A flowing or fluid discharge from the bowels or other part; esp., an excessive and morbid discharge; as, the bloody *flux*, or dysentery. **b** The matter thus discharged.

2. Act of flowing; a continuous moving on or passing by, as of a flowing stream; constant succession; change. Hence, *Physics*, flow or rate of flow of a fluid, or, by analogy, the transfer or rate of transfer of energy either by conduction in the form of heat, or by radiation. Flux of fluid is measured by the amount which in a unit of time passes through a surface everywhere perpetual and cut by all of them (**total flux**) or through a unit area of such a surface (**flux per unit of area**). Flux of energy is also expressed in terms of the energy traversing in unit time a surface as above or in watts or units of power. Electric and mechanic induction are also conveniently treated as species of flux, in which case the flux is measured by the number of lines of force.

By the perpetual *flux* of the liquids, a great part of them is thrown out of the body *Arbuthnot.*

Languages, like our bodies, are in a continual *flux.* *Felton.*

3. A stream; copious flow, flood; outflow.

4. The setting in of the tide toward the shore, — the ebb being called the *reflux.*

5. State of being liquid through heat; fusion.

6. *Chem. & Metal.* Any substance or mixture used to promote the fusion of metals or minerals, as alkalies, borax, lime, fluorite, etc.

7. *Math.* The surface integral of any distributed vector over a given surface.

8. A fusible glass used as a base for enamels; also, an easily fusible enamel used as a ground for enamel painting.

flux (flŭks), *a.* [L. *fluxus*, fr. *fluere.* See FLUX, *n.*] Flowing; unstable; inconstant; variable.

The *flux* nature of all things here. *Barrow*

flux, *v. t.*; FLUXED (flŭkst); FLUX'ING. **1.** To cause to become fluid; to fuse; to treat with a flux.

2. *Med.* To cause a discharge from (a person, the body, etc.), as in salivating or purging.

3. To affect, or bring to a certain state, by subjecting to, or treating with, a flux.

He might fashionably and genteelly . . . have been dueled or *fluxed* into another world. *South*

flux, *v. i.* **1.** To undergo a flux; specif., to bleed copiously. *Obs.*

2. To flow freely. *Archaic.*

3. To become fluid. *Obs. or R.*

flux-a'tion (flŭk-sā'shŭn), *n.* Act of fluxing.

flux density. *Elec.* The number of lines of force per unit area of cross section normal to the lines.

flux function. *Math.* The function that (equated to a constant) forms the equation of the stream lines in a fluid.

flux'i-ble (flŭk'sĭ-b'l), *a.* [Cf. L. *fluxibilis* fluid, OF. *fluxible.*] **1.** Fluid; pliable; changing, inconstant. *Obs. or R.*

2. Capable of being melted or fused, as a mineral.

— **flux'i-bil'i-ty** (-bĭl'ĭ-tĭ), **flux'i-ble-ness,** *n.* — **flux'i-bly,** *adv.*

flux'ion (flŭk'shŭn), *n.* [Cf. F. *fluxion.* See FLUX, *n.*] **1.** Act of flowing; also, that which flows. *Colgrave.*

2. Fusion. *Obs.*

3. *Med.* An unnatural or excessive flow of blood or fluid toward any organ; a determination.

4. = FLUX, 1. *Obs. or R.*

5. A constantly varying indication.

Less to be counted than the *fluxions* of sundials. *De Quincey.*

6. *Math.* **a** The time rate of change in a fluent; the derivative of a fluent as to the time; — invented by Newton and denoted by a dot (·) placed above the fluent; thus $\frac{ds}{dt}$ is written $\dot{s}$ in this notation. **b** In later use, a differential.

flux'ion-al (-ăl), *a.* Pert. to, or of the nature of, fluxion or fluxions; variable; inconstant. — **flux'ion-al-ly,** *adv.*

fly'flap', *v. t. & i.* To strike as with a flyflap; to drive away flies with a flyflap. — **fly'flap'per** (-ĕr), *n.*

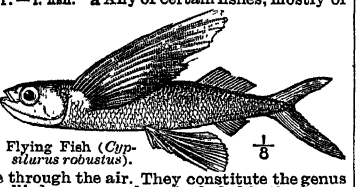
fly frame. **1.** *Cotton Manuf.* Any of various slubbing, roving, intermediate, and other frames. **2.** A grinding and polishing machine for plate glass.

fly gallery. *Theat.* One of the galleries on either side of the flies, from which the drop scenes, borders, etc., are manipulated.

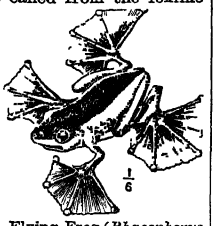
fly honeysuckle. **a** A European shrubby yellow-flowered honeysuckle (*Lonicera xylosteum*); also, the related American *L. ciliata.* **b** A scrophulariaceous plant (*Halleria lucida*) of tropical and southern Africa.

fly'ing, *n.* Act of one that flies; also, that which flies; specif., *pl.,* in carding, droppings.

fly'ing, *p. a.* [From FLY, *v. i.*] Moving in the air with or as with wings; floating; waving; moving lightly or rapidly; intended for rapid movement; fleeting; temporary; hasty.
flying adder, a dragon fly. — **f. army,** *Mil.,* a body of troops kept maneuvering so as to threaten the enemy constantly and cover its own garrisons. *Obs.* — **f. artillery,** *Mil.,* artillery trained to rapid evolutions, — the men being either mounted or riding upon the gun carriages and caissons when they change position. — **f. blister,** an application used to irritate the skin, and moved from one place to another before blistering. — **f. bond,** *Masonry,* a bond formed by inserting headers at considerable intervals only. — **f. bridge.** **a** A drawbridge. *Obs. Caxton.* **b** = FLOATING BRIDGE **b.** *Obs.* **c** A suspended or floating bridge, usually temporary, as a pontoon bridge. **d** A floating structure connected by a cable with an anchor or pier up stream, and made to pass from bank to bank by the action of the current or other means. **e** The highest bridge on a steamer, where there are more than one. — **f. buttress,** *Arch.,* a masonry structure, typically consisting of a straight inclined bar carried on an arch, and a solid pier or buttress against which it abuts, for taking up the thrust of a roof or vault which cannot be supported by ordinary buttresses. See ARCHITECTURE, *Illust.* — **f. camp,** *Mil.,* a temporary camp; a body of troops formed for rapid movement from place to place. *Obs. or R.* — **f. cat,** a flying marmot or flying lemur. — **f. colors** *or* **colours,** flags unfurled and waving in the air; hence: **to come off with f. colors** *or* **colours,** to be victorious; to succeed thoroughly in an undertaking. — **flying column,** *Mil.,* a strong detachment, usually of all arms, equipped lightly to insure rapid movement but sufficiently to be independent of a base and communications, which operates at a distance from the main force. — **f. country,** *Hunting,* a country open enough for long runs. — **f. deck,** *Naut.,* a deck supported at the side by railings, stanchions, or the like. — **f. dragon.** **a** = DRAGON, *n.*, 7. **b** A dragon fly. — **F. Dutchman.** **a** A fabled Dutch mariner condemned for his crimes to sail the seas till the day of judgment. **b** His spectral ship, the seeing of which is considered a bad omen by sailors. It is generally thought to sail about in the neighborhood of the Cape of Good Hope in bad weather. — **f. fish.** **a** Any of certain fishes, mostly of tropical and the warmer parts of temperate seas, which have long wing-like pectoral fins, and are capable of leaving the water and moving some distance through the air. They constitute the genus *Exocœtus* and allied genera, and are included in the Scombresocidæ or made (either alone or with related forms) a family, Exocœtidæ. A number of species occur off North America. It is chiefly by the motion of the tail before they entirely leave the water that the momentum for these flights is acquired. Whether it is increased by the vibrations of the pectoral fins is a matter of dispute. **b** [*caps.*] *Astron.* = PISCIS VOLANS. — **f. fox,** any of various very large fruit-eating bats, so called from the foxlike face, esp. those of the genera *Pteropus* and *Epomophorus,* which are very destructive to fruit in many warm countries of the Old World. They are eaten by many native races. *Pteropus edulis* sometimes measures five feet between the tips of the expanded wings. — **f. frog,** any of several East Indian tree frogs of the genus *Rhacophorus,* having very large and broadly webbed feet, which, it is said, serve as parachutes, and enable them to make very long leaps. — **f. gecko,** *Zoöl.,* a gecko (*Ptychozoon homalocephalum*) having membranous expansions along the sides of the body, head, limbs, and tail. — **f. gurnard,** any of several gurnardlike acanthopterygian fishes constituting the genus *Cephalacanthus* and family Cephalacanthidæ, having very large pectoral fins, said to be able to fly like the flying fish, but not for so great a distance. — **f. jib,** *Naut.,* a sail set outside of the standing jib, on the flying jib boom. See SAIL, *Illust.* — **f. jib boom,** *Naut.,* an extension of the jib boom. — **f. kites.** *Naut.* = KITE, 6 **b.** — **f. lemur,** an East Indian mammal of the genus *Cynocephalus,* syn. *Galeopithecus,* about the size of a cat, having a broad fold of skin which extends from the neck to the tail on each side, embracing the limbs and forming a parachute used in making long sailing leaps, though it is not adapted for true flight. There are at least two species, *C. volans* and *C. philippinensis,* the latter found in the Philippines. They are arboreal, nocturnal, and largely frugivorous in habits, and have very fine soft fur. The genus is not closely related to the lemurs or to any existing mammal. It is usually considered as constituting a suborder of Insectivora called *Dermoptera.* — **f. level,** *Civil Engin.,* a reconnoissance level over the course of a projected road, canal, etc. — **f. lizard.** = DRAGON, *n.*, 7. — **f. machine,** *Aëronautics,* an apparatus designed for navigating the air; — sometimes restricted to a machine that is heavier than air and dependent upon its own motors for its ability to soar or to move in any way. Cf. AËRODROME, AËROPLANE, AIRSHIP. — **f. mare,** *Wrestling,* a form of attack in which the aggressor seizes his opponent's wrist, and, turning about, jerks his opponent over his back. — **f. marmot,** the taguan or other large flying squirrel of the genus *Petaurista.* — **f. mouse,** a very small Australian flying phalanger (*Acrobates pulchellus*) not over six inches long including the tail. — **f. phalanger,** any of certain small marsupials of the Australian region, belonging to the phalanger family and the genera *Petaurus, Petauroides,* and *Acrobates,* having a parachute-like membrane connecting the fore and hind legs like that of the flying squirrels, which they superficially resemble so much that they are popularly called *squirrels* or *flying squirrels.* The smallest form (*Acrobates*) is called *flying mouse.* Cf. SUGAR SQUIRREL. — **f. rings,** rings suspended in pairs or rows at the end of swinging ropes and used in gymnastic and acrobatic exercises. — **f. robin.** = FLYING GURNARD. — **f. sap,** *Mil.,* the rapid construction of an advanced trench (when the enemy's fire precludes the method of simple trenching), by means of pushing forward side by side gabions filled with earth as a movable parapet, and excavating the trench behind their cover. — **flying seal,** a seal on a letter not fastened down, so that the bearer may read the contents; — used in *under flying seal.* — **f. shore,** *Building,* a horizontal shore. — **f. shot,** a shot fired at a moving object, as a bird on the wing. — **f. spider.** = BALLOONING SPIDER. — **f. squadron,** *Navy.,* a squadron of fast ships moving rapidly from place to place at a distance from the main command. — **f. squid,** any of various squids, as *Ommastrephes bartrami,* common in the Gulf Stream, which are able to leap out of the water. — **f. squirrel.** **a** Any of certain squirrels which have parachute-like folds of skin connecting the fore and hind legs, enabling them to make very long leaps. They belong chiefly to the genera *Petaurista,* syn. *Pteromys,* which includes very large Asiatic species with a long bushy tail (see TAGUAN), and *Scuropterus,* consisting of smaller forms of Europe, Asia, and North America. *S. volans,* the common species in the United States, is gray or brownish above, and pure white below, with large dark eyes and very soft fur. It is nocturnal in habits. A larger species (*S. sabrinus*) inhabits northern North America. The African flying squirrels are members of *Anomalurus* (which see) and allied genera. **b** In Australia, a flying phalanger. — **f. staccato,** *Music,* a rippling effect in violin playing. See ARCO SALTANDO. — **f. start,** a start in a race in which the signal is given while the competitors are in motion. — **f. switch,** *Railroads,* a switch effected by disconnecting some of the cars from a moving train and utilizing their momentum to carry them to the desired position. — **f. torch,** *Mil.,* a torch attached to a long staff and used for signaling at night.



Flying Fish (*Cypselurus robustus*). 1/8



Flying Frog (*Rhacophorus pardalis*). (1/6)

Flying Gurnard (*Cephalacanthus volitans*). 1/8

Flying Lemur (*Cynocephalus volans*). (1/2)

fly orchid. A European orchid (*Ophrys muscifera*), whose flowers resemble flies.

fly paper. Poisoned paper or paper coated with a sticky substance for killing flies.

fly poison. *Bot.* **a** A melanthaceous plant (*Chrosperma muscetoxicum*) of the eastern United States, having a tall stem bearing a dense raceme of small greenish white flowers. The pounded bulb has been used as a poison for flies. **b** Any of several species of the related genus *Zygadenus.*

fly press. A hand screw press for punching, embossing, etc., operated by a fly. See 3d FLY, *n.*, 4 **c.**

fly rail. A bracket which turns out to support the hinged leaf of a table.

fly rod. A light fishing rod used in angling with a fly.

fly rope. A rope used in telodynamic power transmission.

Flysch (flīsh), *n.* [Dial. G. (Swiss).] *Geol.* A thick conglomeratic series of rocks in southern Europe, partly of Cretaceous and partly of Eocene age.

fly shuttle. *Weaving.* A shuttle driven by a picker in a power loom.

fly'speck' (flī'spĕk'), *n.* A speck or stain made by the excrement of a fly; hence, any insignificant dot.

fly'speck', *v. t.* To soil with flyspecks.

fly spring. A spring used to cause the outer cover of a watch case to fly open.

fly stone. Native arsenide of cobalt, used as a fly poison by grinding it and adding it to sweetened water.

fly tent. A tent protected with a fly. See 3d FLY, *n.*, 9.

fly tick. The small bright red immature form of a mite (*Trombidium parasiticum*), infesting the house fly.

fly'trap' (flī'trăp'), *n.* **1.** A trap for catching flies. **2.** **a** The pitcher plant. **b** The dogbane, **a.** **c** Venus's-flytrap.

fly'wheel' (-hwēl'), *n.* *Mach.* A heavy wheel for opposing and moderating by its inertia any fluctuation of speed in the machinery with which it revolves; esp., such a wheel on an engine crankshaft to counteract variable pressure during the stroke and to carry the engine over the dead centers.

flywheel alternator. *Elec.* An engine-driven alternator with its field-magnet poles mounted on the rim of the engine flywheel.

foal (fōl), *n.* [ME. *fole,* AS. *fola;* akin to OHG. *folo,* G. *fohlen,* Goth. *fula,* Icel. *foli,* Sw. *föle,* Gr. πῶλος, L. *pullus* a young animal. Cf. FILLY, POULTRY, PULLET.] **1.** The young of an animal of the horse family (Equidæ); a colt; a filly; — formerly occasionally applied to the young of other animals. **2.** A horse. *Obs.* **3.** *Coal Mining.* A young boy helper at a tram. **4.** [*cap.*] *Astron.* = EQUULEUS.
in foal, with foal, being with young; pregnant; — said of animals of the horse family.

foal, *v. t.;* FOALED (fōld); FOAL'ING. **1** To bring forth (a colt or foal). **2.** To get with foal. *Rare.*

foal, *v. i.* To bring forth young; — said of animals of the horse family; also sometimes of a ewe.

foal teeth. The first set of teeth, or milk teeth, of a horse.

foam (fōm), *n.* [ME. *fam, fome,* AS. *fām,* akin to OHG. & G. *feim,* Skr. *phēna,* and perh. to L. *pumex* pumice (cf. PUMICE).] **1.** The white substance, consisting of an aggregation of bubbles, which is formed on the surface of liquids, or in the mouth or on the skin of an animal, by violent agitation, fermentation, or perspiration; froth; spume; scum; as, the *foam* of the sea.

2. The sea. *Obs.*

Syn. — FOAM, FROTH are often interchangeable. But FOAM commonly has pleasanter and more elevated associations than FROTH; as, "Idalian Aphrodite beautiful, fresh as the *foam*" (*Tennyson*); "At the ear of Eve, familiar toad, half *froth*, half venom, spits himself abroad" (*Pope*); "the idle *foam* of Time" (*Shelley*); "*Froth* and scum, thou liest!" (*Shak.*).

foam (fōm), *v. i.*; FOAMED (fōmd); FOAM'ING. [Cf. AS. *fāeman*. See FOAM, *n.*] **1.** To gather, or form, foam; to froth; as, the billows *foam*.

He *foameth*, and gnasheth with his teeth. *Mark* IX. 18.

2. To form foam, or become filled with foam; as, a *foaming* cup; of a steam boiler, to prime.

3. To rush foaming; as, blood *foams* from his mouth.

foam, *v. t.* To cause to foam; to cover with foam; as, to *foam* the goblet; also, to throw out with rage or violence, as foam. "*Foaming* out their own shame." *Jude* 13.

foam'bow' (-bō'), *n.* A bow like a rainbow formed by the sun shining upon foam.

foam cock. In steam boilers, a cock at the water level, to blow off impurities.

foam'flow'er (fōm'flou'ĕr), *n.* The false miterwort.

foam'y (-ĭ), *a.*; FOAM'I-ER (-ĭ-ĕr); FOAM'I-EST. [AS. *fāmig*.] **1.** Covered with foam; frothy; spumy.

2. Full of, consisting of, or like, foam.

fob (fŏb), *n.* [Cf. dial. G. *fuppe* pocket.] **1.** A little pocket in men's breeches or trousers near the waistband for a watch or valuables.

2. A fob chain. *U. S.*

fob, *v. t.*; FOBBED (fŏbd); FOB'BING. [Cf. FOP.] To cheat; trick; impose on; also, to procure, or introduce, by a trick; to palm off. *Obs. or Archaic.*

to fob off, to shift off by an artifice; to put aside; to put off; to delude with a trick. "A conspiracy of bishops could prostrate and *fob off* the right of the people." *Milton.*

fob, *n.* [Cf. FOP.] **1.** A swindler; impostor; also, a trick; a cheat. *Obs.*

2. A seizure in arrest, as in a fob action.

The man, sir, that, when gentlemen are tired, gives them a *fob*, and rests them. *Shak.* (*Com. of Err* IV. iii).

☞ This reading of the passage seems to be justified by the frequent plays, in the text, on legal terms.

fob action. [See 3d FOB, 2.] A sham action at law, contrived to bring about an arrest. *Obs. Colloq.*

fob chain. A short watch chain or ribbon, often bearing seals, etc., and worn with a watch carried in the fob.

fo'cal (fō'kăl), *a.* [See FOCUS.] Of or pertaining to a focus. **focal conic**, *Math.*, a locus of the modular foci of a conicoid. — **f. curve**, *Math.*, the locus of the foci of a surface. — **f. distance**, *or* **length**, **of a lens** *or* **mirror**, *Optics*, the distance of the focus from the surface of the lens or mirror, or more exactly, in the case of a lens, from its optical center. — **f. distance of a telescope**, the distance of the image of an object from the second principal point. — **f. line**, *Math.*, the locus of foci of a quadric cone. — **f. plane**, a plane parallel to the plane of a lens or mirror, and passing through its focus. — **f.-plane shutter**, *Photog.*, a form of camera shutter, used chiefly for instantaneous work, in which a slit (as wide as the plate) in a curtain is passed directly in front of the plate. It gives an equal length of exposure to each part of the plate. The time of exposure may be varied by changing the length of the slit or the speed of its motion. — **f. property**, *Math.*, a property connected with lines or planes common to the locus and the absolute, esp. with the intersections of such lines and planes.

fo'cal-i-za'tion (fō'kăl-ĭ-zā'shŭn; -ĭ-zā'shŭn), *n.* Act of focalizing, or state of being focalized.

fo'cal-ize (fō'kăl-īz), *v. t.*; FO'CAL-IZED (-īzd); FO'CAL-IZ'ING (-īz'ĭng). **1.** To bring to a focus; to focus; concentrate.

Light is *focalized* in the eye, sound in the ear. *De Quincey.*

2. To adjust the focus of (the eye, etc.).

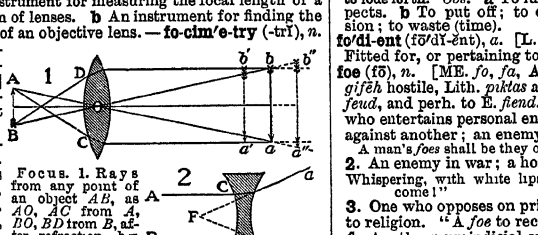
3. *Med.* To confine to a limited area; as, *focalized* epilepsy, in which the convulsive movements are confined to a limited portion of the muscular system, as of the face.

fo'cal-oid (-oid), *n.* [*focal* + *-oid.*] *Math.* An indefinitely thin shell bounded by two confocal ellipsoids.

fo-cim'e-ter (fō-sĭm'ē-tĕr), *n.* [*focus* + *-meter.*] *Optics.* **a** An instrument for measuring the focal length of a lens or system of lenses. **b** An instrument for finding the actinic focus of an objective lens. — **fo-cim'e-try** (-trĭ), *n.*

fo'coid (fō'koid), *n.* [*focus* + *-oid.*] *Math.* A circular point at infinity.

fo'cus (fō'kŭs), *n.*; *pl.* E. FOCUSES (-ŭz; -Yz), L. FOCI (-sī). [L. *focus* hearth, fireplace. Cf. CURFEW, FUEL, FUSIL the fire-arm.] **1.** See ALTAR.



Focus. 1. Rays from any point of an object *AB*, as *AO*, *AC* from *A*, *BO*, *BD* from *B*, after refraction by Lens *DC* meet at some point, as *a*, *b*, the *Real Foci* for *A*, *B*. A screen at *ba* would receive the rays of all points in *AB*, and show a clear inverted image of *AB*. At *b'a'* or at *b''a''*, the screen would receive the rays from each point of *AB* at more than one point, and the image would be blurred (out of focus). 2. Parallel rays *AC*, *BD* refracted by Lens *CD* to *a b* appear to issue from *F*, the *Virtual Focus*.

2. *Physics.* **a** A point in which rays, as of light, heat, sound, etc., meet, after being reflected or refracted; the point at which an image is formed; as, the *focus* of a lens or mirror. **b** A point from which diverging rays appear to issue, or a point at which converging rays would meet if not reflected or refracted before they reach it; — called *virtual focus*, as distinguished from the true, or *real*, *focus*. Cf. IMAGE.

3. **a** Focal length; as, a telescope of twenty feet *focus*. **b** Adjustment, as of the eye or an eyepiece, requisite for distinctness of vision; as, a telescope or microscope comes sharply to *focus*.

4. *Math.* **a** One of the points whose distances from any point of a plane curve are linearly connected; the intersection of tangents to the curve from the focoids, or of common tangents to the curve and the absolute. **b** Of a surface, a point through which two tangents, common to the surface and the imaginary circle at infinity, determine each a tangent plane common to the surface and the circle at infinity. **c** A pole so related to its polar (called *directrix*) with respect to a conic that the ratio of the distances from any point of the conic to the focus and the directrix is a constant (called the *eccentricity*). In an ellipse, rays of light emerging from one focus are reflected from the curve, directly *toward* the other; in a hyperbola, directly *from* the other; in a parabola, exactly parallel to the axis, directly *toward* or *from* the other focus at infinity. Thus, in the ellipse *F* and *F'* are *foci* and *CI D* are *directrices*, and $PF \cdot PC = QF : QD = P'F' : P'C' = e$. Similarly in the hyperbola, and in the parabola, whose other focus and directrix are at infinity. See CONIC, ECCENTRICITY, ELLIPSE, HYPERBOLA.

5. A central point; a point of concentration; a center of activity, interest, attraction, or attention.

For in such restrictions and emphasis we have what the psychologist calls a *focus* of consciousness; and it is by their successive occupation of this *focus* that perceptions obtain definite time marks. *James Ward.*

6. *Theat.* The most brilliantly lighted part of the stage. *Obs.*

in focus, having or giving the proper sharpness of outline due to good focalization; — said of optical instruments or their parts, or images. — **out of f.**, not in focus.

fo'cus (fō'kŭs), *v. t.*; FO'CUSED (fō'kŭst) or FO'CUSSED; FO'CUS-ING or FO'CUS-SING. **1.** To bring to a focus; to focalize.

2. To adjust the focus of (the eye, a lens, etc.).

3. To bring into a focus, as an image.

focusing, *or* **focussing**, **cloth.** *Photog.* An opaque dark cloth used to cover the rear of the camera and the head and shoulders of the photographer, to exclude all light except that coming through the lens.

focusing, *or* **focussing**, **glass.** *Photog.* A small magnifying glass used to enlarge the image thrown on the ground glass of a camera as an aid in exact focusing.

focus lamp. *Optics.* **a** An electric incandescent lamp having a filament coiled or crumpled into a spiral or zigzag form so that the light, being concentrated in a small space, can be brought into the focus of a lens or mirror. **b** An arc lamp with feeding mechanism so constructed as to keep the arc in a constant position with reference to the optical system by means of which its rays are focused.

focus tube. *Physics.* A vacuum tube for Rontgen rays in which the cathode rays are focused upon the anticathode, for intensifying the effect.

fod'der (fŏd'ĕr), *n.* [AS. *fōdder*, *fōddor*, fodder, from the root of *fōda* food; akin to D. *voeder*, OHG. *fuotar*, G. *futter*, Icel. *fōðr*, Sw. & Dan. *foder*. See FOOD, cf. FORAGE.]

1. Food. *Obs. or Slang.*

2. That which is fed out to domestic animals; esp., coarse food for cattle, horses, and sheep, as hay, vegetables, etc.

3. *Iron Manuf.* Eight pigs of cast iron. *Thurston.*

Syn. — See FOOD.

fod'der, *v. t.*; FOD'DERED (-ĕrd); FOD'DER-ING. **1.** To feed with or as with fodder.

2. To graze, as cattle (*on*). *Obs.*

fod'der-ing, *n.* A portion of fodder.

fode (fōd), *v. t.* To beguile; to befool with flattery or kindness; to lull to a delusion of security. *Obs.*

to fode forth. *Obs.* **a** To lure; to lead on by delusive prospects. **b** To put off; to evade. **c** To postpone by evasion; to waste (time).

fo'di-ent (fō'dĭ-ĕnt), *a.* [L. *fodiens*, p. pr. of *fodere* to dig.] Fitted for, or pertaining to, digging.

foe (fō), *n.* [ME. *fo*, *fa*, AS. *fāh* hostile; akin to OHG. *gifēh* hostile, Lith. *piktas* angry, OIr. *oech* enemy, and E. *feud*, and perh. to E. *fiend*. Cf. FEUD a quarrel.] **1.** One who entertains personal enmity, hatred, grudge, or malice, against another; an enemy.

A man's *foes* shall be they of his own household. *Matt.* X. 36.

2. An enemy in war; a hostile army; an adversary.

Whispering, with white lips, "The *foe!* They come! they come!" *Byron*

3. One who opposes on principle; an ill-wisher; as, a *foe* to religion. "A *foe* to received doctrines." *I Watts.*

4. Anything prejudicial or injurious; as, bad drainage is a dangerous *foe* to health.

Syn. — See ENEMY.

foehn (fŭn), *n.* [G. dial. (Swiss), fr. L. *Favonius* west wind. Cf. FAVONIAN.] *Meteor.* **a** A warm dry wind that often blows in the northern valleys of the Alps, due to the indraft of a storm center passing over central Europe. The wind, heated by compression in its descent, reaches the low levels dry and warm, unless the rate of descent is slow enough to give the air time to cool off. **b** Any similar wind, as the chinook, in other parts of the world.

foe'man (fō'măn), *n.*; *pl.* -MEN (-mĕn). [AS. *fāhman.*] An enemy in war; foe. — **foe'man-ship**, *n.*

And the stern joy which warriors feel
In *foemen* worthy of their steel. *Scott.*

Fœ-nic'u-lum (fē-nĭk'ū-lŭm), *n.* [NL., fr. L. (also *fœniculum*), fennel. See FENNEL.] *Bot.* A genus of apiaceous plants, natives of Europe and the Orient. There are 4 species, of which the fennel (*F. fœniculum*) is the most important. See FENNEL.

fog (fŏg), *n.* [ME. *fogge*; cf. dial. *fog*, also meaning moss, and dial. *feg*; of unknown origin.] **1.** *Agric.* **a** A second growth of grass, aftergrass. **b** Dead or decaying grass on land in the winter; — called also *foggage*. *Dial. Eng.*

2. **a** Velvet grass. **b** Any moss. *Dial. Scot.*

fog, *v. t.*; FOGGED (fŏgd); FOG'GING (fŏg'ĭng). *Agric.* **a** To place to pasture on the fog, or aftergrass. **b** To eat off the fog from, as cattle. **c** To leave (land) under fog, or without cutting or grazing.

fog, *v. i.* To become overgrown with fog (grass). *Scot.*

fog, *n.* [Cf. Dan. snee*fog* snow falling thick, drift of snow, driving snow, Icel. *fok* spray, snowdrift, *fjūk* snowstorm, *fjūka* to drift.] **1.** Vapor condensed to fine particles of water in the lower part of the atmosphere and disturbing its transparency. It differs from cloud only in being near the ground. See CLOUD. The formation of fog is promoted by dust particles in the air, which act as nuclei.

2. Loosely, any murky or thick condition of the atmosphere, or any substance so diffused as to lessen the transparency of the atmosphere.

3. *Photog.* Cloudiness or partial opacity of those parts of a developed film or a photograph which should be clear.

4. A state of mental confusion.

Syn. — See HAZE.

fog, *v. t.* **1.** To envelop as with fog; to befog; obscure; hence, to perplex; confuse; mystify.

2. *Photog.* To render semiopaque or cloudy, as a plate, by exposure to stray light, overexposure to developer, etc.

fog, *v. i.* **1.** To become covered, or thick, with fog.

2. *Photog.* To show indistinctly or become indistinct, as the image on a negative.

3. To put fog signals in place. *Railway Slang, Eng.*

fog alarm. A fog signal.

fog belt. A region of the ocean where fogs are of marked frequency, as near the coast of Newfoundland.

fog'bow' (fŏg'bō'), *n.* A nebulous arch, or bow, of white or yellowish light sometimes seen in fog, etc.

fog'dog' (-dŏg'; 205), *n.* A luminous spot sometimes seen in fog near the horizon; — called also *sea dog* and, if bright, *fogeater*, as the fog is then thin.

fog'eat'er (-ēt'ĕr), *n.* **a** = FOGDOG. **b** = FOGBOW. **c** The moon, esp. a full moon, when rising in a fog.

fog'ger (-ĕr), *n.* [Of uncertain origin, cf. LG. *fokker* a tradesman, usurer. Cf. PETTIFOGGER.] **1.** One who pursues gain by mean practices; a pettifogger. *Obs.*

2. A peddler; huckster. *Dial. Eng.*

3. A middleman in the nail- and chain-making trades. *Eng.*

fog'ger, *n.* [See FOG vapor.] *Railroads.* A man employed to put fog signals on the track in time of fog. *Eng.*

fog'gy (fŏg'ĭ), *a.*; FOG'GI-ER (-ĭ-ĕr); FOG'GI-EST. [From FOG vapor.] **1.** Thick; filled or abounding with fog, or watery exhalations; misty; as, a *foggy* atmosphere; a *foggy* morning. *Shak.*

2. Beclouded; dull; obscure; muddled; as, *foggy* ideas.

Your coarse, *foggy*, drowsy conceit. *Hayward.*

3. *Photog.* Fogged. See 5th FOG, 2.

fog'gy, *a.* **1.** [See FOG grass.] Of, pertaining to, covered with, or resembling, fog, or short grass, or (*Scot.*) moss.

2. [Of uncertain origin.] Marshy; flabby; hence, bloated; unwholesomely fat; of food, making flabby fat. *Obs.*

fog'horn' (-hôrn'), *n.* A horn sounded as a fog signal.

fo'gram (fō'grăm), **fo'grum** (-grŭm), *a.* [Of uncertain origin. Cf. FOGY.] Old-fashioned; behind the times.

His taste is terribly *fogrum* and old-fashioned. *Mad. D'Arblay.*

— **fo'gram-ite**, *n.* — **fo-gram'i-ty** (fō-grăm'ĭ-tĭ), *n.*

fo'gram, fo'grum, *n.* **1.** Antiquated person, fogy. *Colloq.*

2. *Naut.* Liquor, esp. bad liquor. *Slang.*

fog signal. Any signal sounded, or otherwise made, in a fog, to give warning of proximity, as a blast from a horn or whistle on a ship or on shore, a detonating cap placed on a railroad track, etc

fo'gy (fō'gĭ), *n.*; *pl.* FOGIES (-gĭz). Also **fo'gey.** [Of uncertain origin; perh. connected with FOG aftergrass or FOG vapor; cf. FOGGY.] **1.** A dull fellow; a person who is behind the times, overconservative, or slow; — usually with *old. Colloq.*

Notorious old bore; regular old *fogy*. *Thackeray.*

2. An invalid soldier, esp. one in garrison.

3. Increase of pay after long service; longevity pay (which see). *Mil. & Nav. Slang, U. S.*

— **fo'gy-dom** (-dŭm), *n.* — **fo'gy-ish**, *a.* — **fo'gy-ism** (-ĭz'm), *n.*

foh (fō), *interj.* [A variant of FAUGH.] An exclamation of disgust or contempt; poh; fie *Shak.*

foi'ble (foi'b'l), *n.* [OF. *foible* feeble. See FEEBLE.] **1.** A moral weakness; a failing; a weak point; a frailty.

A disposition radically noble and generous, clouded and overshadowed by superficial *foibles*. *De Quincey.*

4. The persons of one's own family; relatives.

5. Friends; as, they are not *folks*. *Dial. Eng.*

☞ When used as a collective singular, as in def. 1, the plural of *folk* is always *folks*. In all other uses both *folk* and *folks* are used, the former being now somewhat archaic, and the latter being commonly considered colloquial; both are construed as plural. Cf. note under **PEOPLE**.

Folke'stone pil'lar (fōk'stŭn). [From *Folkestone*, Kent County, England.] A cumulus cloud rising from a cloud bank like a gigantic pillar. It usually occurs in thundery weather and is formed by currents of vapor ascending in still, warm air. *Eng.*

folk etymology. The popular transformation of words so as to give them an apparent relationship to other better known or better understood words, as the dialectal change of *asparagus* to *sparrowgrass*.—**folk'-et'y-mo-log'i-cal**, *a.*

folk'land' (fōk'lănd'), *n.* [AS. *folcland.*] *O. Eng. Law.* Land held by folkright, that is, by customary law, without written title, as opposed to *bookland*. The term *folkland* occurs in but few documents, in the most authoritative one of which (a law of Edward the Elder) it is contrasted with *bookland*. Spelman defined it as above, and this view obtained until 1830, when John Allen put forth the view that it was the land of the folk or people, corresponding to the Roman *ager publicus*. This was the general view until Vinogradoff in 1893 reëstablished the older view.

folk laws. The customary laws of the Germanic peoples of western Europe, such as the Lex Salica;—called by the Romans *Leges Barbarorum*.

folk'lore' (fōk'lōr'; 201), *n.*, *or* **folk lore.** Traditional customs, beliefs, tales, or sayings, esp. those of a superstitious or legendary nature, preserved unreflectively among a people; hence, the comparative science which investigates the life and spirit of a people, or of peoples, as revealed in such customs and tales. Cf. **MYTHOLOGY**.

The task of mythology in the study of *folklore* is to point out the heathen elements in various Marchen, customs, popular usages, and legal institutions. *B. J. Vos* (*Chanteme de la Saussaye*).

—folk'lor'ic (-lōr'ĭk), *a.*—**folk'lor'ism** (-lōr'ĭz'm), *n.*—**folk'lor'ist**, *n.*—**folk'lor-is'tic** (-lōr-ĭs'tĭk), *a.*

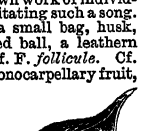
folk'moot' (fōk'mōōt'), **folk'mote'** (-mōt'), *n.* Also **folkmot**, and, earlier, **folcmot, folcgemot.** [AS. *folcmōt* folk meeting.] An assembly of the people; esp., *AS. Law*, a general assembly of the people, as of a town, city, or shire. See **GEMOTE**. *Hist.* **—folk'moot'er, folk'mot'er**, *n.*

Folcgemot appears to mean any public court whatever, greater or less. *Pollock & Mait.*

folk'right' (-rīt'), *n.* *O. Eng. Hist.* The public right, that is, the right of the people under the folk laws.

folk song. **a** A song originating and traditional among the common people of a country, and hence embodying characteristic qualities of form and feeling. From their more or less impersonal origin, folk songs are in general contrast to **art songs**, which are the known work of individual composers. See **LIED**. **b** A song imitating such a song.

fol'li-cle (fŏl'ĭ-k'l), *n.* [L. *folliculus* a small bag, husk, pod, dim. of *follis* bellows, an inflated ball, a leathern money bag, perh. akin to E. *bellows*: cf. F. *follicule*. Cf. **FOOL** idiot.] **1.** *Bot.* A dry one-celled monocarpellary fruit, differing from a pod or legume in being dehiscent only by one suture, usually the inner or ventral. The fruits of the peony, larkspur, and milkweed are examples.



Follicle, *Bot.*

2. *Anat.* A small nearly or entirely closed cavity, or deep narrow-mouthed depression; as, a hair *follicle*, the depression from which a hair grows; esp., a small simple or but slightly branched gland; a crypt. Hence the term is extended to small lymph nodes, though they are not true glands, and contain no cavity. See **GRAAFIAN FOLLICLE**.

3. *Zoöl.* A cocoon.

4. A bag filled with air.

fol-lic'u-lar (fō-lĭk'ū-lär), *a* **1.** Like, pertaining to, or consisting of, a follicle or follicles.

2. *Med.* Affecting the follicles; as, *follicular* pharyngitis.

3. Of or pertaining to bellows. *Rare.*

fol-lic'u-late (-lāt) } *a.* Having, consisting of, or in-
fol-lic'u-lat'ed (-lā't'ĕd) } closed in, a follicle or follicles.

fol-lic'u-li'tis (-lĭ'tĭs), *n.* [NL. See **FOLLICLE**; **-ITIS**.] *Med.* Inflammation of one or more follicles.

fol-lic'u-lose (-lōs), *a.* [L. *folliculosus* full of husks, fr. *folliculus* a small bag.] *Bot.* a Containing follicles. **b** Resembling a follicle.

fol-lic'u-lo'sis (-lō'sĭs), *n.* [NL.] *Med.* A disease marked by abnormal development of the lymph follicles.

fol'low (fŏl'ō), *v. t.*; **FOL'LOWED** (-ōd); **FOL'LOW-ING**. [ME. *folowen, folwen, folgen*, AS. *folgian, fylgean, fylgan*; akin to D. *volgen*, OHG. *folgēn*, G. *folgen*, Icel. *fylgja*, Sw. *följa*, Dan. *følge*. The first part of the word is perh. the same as E. *full*; cf. AS. *fulgangan* to follow.] **1.** To go or come after; to move behind in the same path or direction; hence, to go with (a leader, guide, etc.) as a follower or companion; to accompany; attend.

It waves me forth again; I 'll *follow* it *Shak.*

Surely goodness and mercy shall *follow* me all the days of my life. *Ps.* xxiii 6.

2. To succeed in order of time, rank, natural sequence, etc.

The next day, that *followed* the day of the preparation. *Matt.* xxvii. 62.

The fame that *follows* death is nothing to us. *Tennyson.*

3. To result from, as an effect from a cause, or an inference from a premise.

Peace *follows* virtue as its sure reward. *Cowper.*

4. To walk in, or proceed along, as a road or course; to attend upon closely, as a profession or calling; as, all his ancestors had *followed* the sea.

Follow the herbless banks of that strange brook. *Shelley.*

5. To go in pursuit of; to endeavor to overtake; to pursue; to strive after; to seek to gain or attain.

Follow peace with all men. *Heb.* xii. 14.

6. To pursue with hostility; to punish; to enforce (a law); to carry on; to press to a conclusion;—often with *against*, *on*, etc. *Obs. or R.*

O Antony! I have *followed* thee to this. *Shak.*

Such a day,
So fought, so *follow'd*, and so fairly won. *Shak.*

7. To accept as authority; to take as a leader or master; to yield allegiance to; to adopt the opinions of; to obey; to take as a rule of action; as, to *follow* good advice.

He wholly *followed* the Lord God of Israel. *Josh.* xiv. 14.

It is most agreeable to some men to *follow* their reason; and to others to *follow* their appetites. *J. Edwards.*

8. To copy after; to take as an example; to take after.

We had rather *follow* the perfections of them whom we like not, than in defects resemble them whom we love. *Hooker.*

9. To watch, as a receding object; to keep the eyes fixed upon while in motion; to keep the mind upon while in progress, as a speech, performance, etc.; also, to keep up with, or understand, the meaning, connection, or force of, as of a person or a course of thought or argument; as, I do not quite *follow* you; he *followed* the argument easily.

He *followed* with his eyes the flitting shade. *Dryden.*

Syn.—**FOLLOW, PURSUE, CHASE** are frequently interchangeable. **FOLLOW** is the general term; to **PURSUE** is to attempt to overtake, esp. with eagerness, persistence, or enmity; to **CHASE** is to pursue in order to, or as if to, catch or drive away a fleeing object; as, "We fairies that do run . . . from the presence of the sun, *following* darkness like a dream" (*Shak.*); "Love like a shadow flies when substance love *pursues*" (*id.*); "Do I *chase* the substance or the shadow?" (*Tennyson*); "If to dance all night and dress all day charmed the smallpox, or *chased* old age away, . . . who would learn one earthly thing of use?" (*Pope*). See **FOLLOW**, *v. i.*

to follow home, to follow up to a conclusion.—**to f. out**, to follow to a conclusion; as, he is determined *to follow out* his own ideas.—**to f. suit**, *Card Playing*, to play a card of the same suit as the card led; hence, colloquially, to follow an example set.—**to f. the hounds**, to hunt on horseback with hounds.—**to f. up**, to pursue closely or indefatigably; to prosecute to a conclusion; to strengthen the effect of by further action; as, *to follow up* a victory; *to follow up* a wounded deer.

fol'low, *v. i.* **1.** To go or come after a person or thing in place, time, or sequence; hence, to attend.

Thou lead, my sweet, and I will *follow*. *Shelley.*

Temptation *follows* where thou art. *Shak.*

2. To result or occur as a consequence, as an effect from a cause or an inference from a premise; as, that conclusion by no means *follows*.

To thine own self be true,
And it must *follow*, as the night the day,
Thou canst not then be false to any man. *Shak.*

3. To pursue; to strive for attainment.

But each man murmur'd, "O my Queen,
I *follow* till I make thee mine." *Tennyson.*

Syn.—**FOLLOW, SUCCEED, ENSUE, SUPERVENE.** **FOLLOW** is the general term for the idea of coming after; **SUCCEED** commonly implies a regular order or succession; **ENSUE**, some logical connection or principle of sequence; **SUPERVENE** suggests something added or conjoined; as, "Still temptation *follows* where thou art" (*Shak.*); "The link dissolves, each seeks a fresh embrace, another love *succeeds*, another race" (*Pope*); "Why not set forth . . . that which might *ensue* with this old soul in organs new?" (*Tennyson*); "Two worlds, two antagonistic ideals, here in evidence before him. Could a third condition *supervene*, to mend their discord?" (*W. Pater*). See **FOLLOW**, *v. t.*, **SUCCESSION**.

to follow in one's tracks, to follow exactly behind; hence, to follow one's example.—**to f. on.** **a** To continue; to press on. **b** To move on in the direction of a body going before, as a billiard ball in a follow. See **FOLLOW**, *n.* **c** *Cricket.* To go in for a second innings straightway after the first at the option of the captain of the opposing side, by reason of being in a deficit of a certain number (now 150) of runs on the first innings;—said of a side.

2. *Anat.* One of the intervals closed by membranous structures between the incompleted angles of the parietal bones and the neighboring bones of a fetal or young skull; — so called because it exhibits a rhythmical pulsation due to the flow of blood in the vessels of the brain. See also CORACOID FONTANEL. In the human fetus there are six fontanels, of which the anterior, or bregmatic, situated at the junction of the coronal and sagittal sutures, is much the largest, and remains for a considerable time after birth It is lozenge-shaped, while the posterior fontanel, at the junction of the sagittal and lambdoid sutures, is triangular. This aids in determining the presentation of the fetus.
3. An opening for the discharge of secretions; — often fig.

food (fōōd), *n.* [ME. *fode*, AS. *fōda;* akin to Icel. *fæða, fæði*, Sw. *föda*, Dan. & LG. *föde*, OHG. *fatunga*, Gr. πατεῖσθαι to eat, and perh. to Skr. *pā* to protect, L. *pascere* to feed, pasture, *pabulum* food, E. *pasture*. Cf. FEED, FODDER food, FOSTER to cherish.] **1.** Nutritive material absorbed or taken into the body of an organism for purposes of growth or repair and for the maintenance of the vital processes. Animals differ greatly from plants in their nutritive processes, and require, in addition to certain inorganic substances (water, salts, etc.) not ordinarily classed as foods (though absolutely indispensable to life, and contained in greater or less quantity in the substances eaten), complex organic substances, which fall into three principal groups. (1) *Proteids*, containing carbon, hydrogen, oxygen, nitrogen, sulphur, and often phosphorus and other elements. (2) *Carbohydrates* (as starch, sugar, etc.). (3) *Fats*. The last two groups contain carbon, hydrogen, and oxygen only. Since fats and carbohydrates do not contain nitrogen, they cannot entirely replace proteids, but are of great value as producers of heat and energy (being easily oxidizable in the tissues), the obtaining of which from a pure proteid diet would involve taking in an excessive supply of nitrogen. The nitrogen can be in part (but only in part) supplied by certain nitrogenous substances other than proteids. Substances of all three of the above groups may occur in either animal or vegetable foods. Meats contain chiefly proteids and fats, most vegetable foods chiefly carbohydrates and proteids. The texture, consistency, digestibility, palatability, etc. (factors which may often be greatly modified by cooking), also materially affect the value of food substances. (Cf. NUTRITION.) The food of plants consists of complex carbohydrates and proteids constructed within the bodies of green plants, by photosynthetic or other processes, from simple inorganic substances, more properly distinguished as **food materials**, which are absorbed in gaseous form (as carbon dioxide) or in solution by imbibition of soil moisture (as nitrates, phosphates, etc.). See METABOLISM, PLANT.
2. Nutriment in solid form, as opposed to *drink*, which may also contain more or less nourishing material.
☞ As used in laws prohibiting adulteration, etc., *food* is generally held to mean any article used as food or drink by man, whether simple, mixed, or compound, including food adjuncts such as condiments, spice, etc., and often excluding drugs and natural water.
3 Anything that nourishes, develops, or sustains; — chiefly fig. "*Food* to my displeasure." *Shak.*

---

tious; senseless, brainless, witless, shallow, shallow-brained, simple; laughable, ridiculous, nonsensical. — **Foolish, silly, fatuous, absurd, preposterous.** Foolish (see IMBECILE) implies lack of judgment or discretion; silly adds the implication of weakness of intellect, witlessness, or pointlessness; that is fatuous (cf. *vacuous*, under EMPTY) which is vacantly or stupidly silly; as, "foolish curs, that run winking into the mouth of a Russian bear" (*Shak.*), "a *silly* answer, and fitting well a sheep" (*id.*); "Do you doubt that the most *fuluous* of the Georges, whichever it was, thought himself Newton's superior?" (*Landor*). That is absurd which is inconsistent with received notions, common sense, or reason; that is preposterous which is glaringly absurd, or which puts, as it were, the cart before the horse; as, "It would be *absurd* to speak of circles or triangles as any older to-day than they were at the beginning of the world" (*Froude*), "The follies of the Cavalier party proved that things may be *absurd* without being ridiculous, those of their opponents demonstrated that ridicule may justly attach to things not intrinsically *absurd*" (*Rich. Garnett*); "No matter how *preposterous* or insane, a purpose is a godsend to them" (*Hawthorne*); "some *preposterous* sect unknown to good society" (*G. Eliot*). See LAUGHABLE, IRRATIONAL, FOLLY.

foot (fo͝ot), *n.*; *pl.* FEET (fēt). [ME. *fot*, *foot*, pl. *fet*, *feet*, AS. *fōt*, pl. *fēt*; akin to D. *voet*, OHG. *fuoz*, G. *fuss*, Icel. *fōtr*, Sw. *fot*, Dan. *fod*, Goth. *fōtus*, L. *pes*, Gr. πούς, Skr. *pād*, Icel. *fet* step, pace, measure of a foot, *feta* to step, find one's way. Cf. ANTIPODES, CAP-A-PIE, EXPEDIENT, FETLOCK, FETTER, PAWN a man in chess, PEDAL] **1.** The terminal part of the leg of a man or of an animal; that part of an animal upon which it rests when standing, or upon which it moves. In man the *foot* is the *pes*, or part of the leg below the ankle joint or tibiotarsal articulation; in four-footed vertebrates it is extended also to the corresponding division of the fore limb (or *manus*). In digitigrade animals the term is restricted in common usage to the part of the limb which rests on the ground in walking, the remainder of the manus or pes being considered part of the leg. In invertebrates the word designates any of various organs of locomotion or attachment, as the limb of an arthropod (in insects often restricted to the terminal part, or *tarsus*), and in mollusks, the ventral muscular surface or a more or less distinct ventral muscular process, usually disklike and serving for creeping in the gastropods, but narrow and adapted for burrowing in most bivalves. See also TUBE FOOT.
2. *Bot.* **a** In mosses, the basal portion of the sporogonium, embedded in the gametophore. **b** In ferns and fern allies, an organ of the young sporophyte by which the latter absorbs nourishment from the prothallium or gametophyte.
3. The foot as the organ of locomotion; hence, fig., motion or power of walking or running; tread; step; pace; speed; also, *Obs.*, a person walking or running.
What cursed *foot* wanders this way to-night? *Shak.*
4. *Mil.* Soldiers who march and fight on foot; the infantry, in distinction from the cavalry and artillery. *Archaic or Poetic.* "Both horse and *foot*." *Milton.*
5. That part of anything designed to accommodate the body that is in proximity to or covers the feet; as, the *foot* of a stocking; the *foot* of a bed.
6. Something resembling a foot in position or use, as the lower end of a leg of a chair; the lowest part or base; the ground part; the bottom, as of a mountain or column; also, the last of a row or series; the end or extremity, esp. if associated with inferiority; as, the *foot* of a hill; the *foot* of the procession; the *foot* of a class; the *foot* of the table.
7. Specif.: *Mech.* **a** In a sewing machine, the piece that holds the cloth steady; — called also *presser foot*. **b** In an organ, a tube that supports a pipe and through which the wind is introduced. See *Illusts.* of FLUE PIPE, REED PIPE. **c** (*pl.* FOOTS) *Basketry.* The bottom woven edge of a basket or the like. See BASKET, *Illust.* **d** *Naut.* The lower edge (of a sail). **e** *Mining.* Short for FOOTWALL.
8. That which is placed or appears at the bottom or foot or end, as the sum of an account or the refrain of a song.
9. (*pl.* FOOTS) In refining processes, the bottom portion; sediment; dregs; residue.
10. Fundamental principle; basis; plan; also, recognized condition; rank; standing ground; footing. *Obs. or R.*
Answer directly upon the *foot* of dry reason. *Berkeley.*
11. Normal or standard rate of reckoning; customary value or price. *Obs.*
12. **a** A measure of length derived from the length of the human foot; for English-speaking countries, one third of the yard, or twelve inches, 30.480 cm. (but cf. *Cape foot*, under MEASURE, *Table*). In other countries the foot, now largely replaced by metric units, varies locally, usually between 11 and 14 inches. See MEASURE. **b** = FRONT FOOT.

☞ *Foot* is used as a collective plural when preceded by a designation of the number taken; as, a ten-*foot* pole.
13. (*pl.* FOOTS) A measure for grindstones, the numerical value of which is found by adding the diameter and thickness of the stone in inches and dividing by 8. Thus, a grindstone 42 inches in diameter and 6 inches thick is called a 6-foot stone.
14. *Pros.* A group of syllables marked off as constituting a metrical unit of verse, corresponding to a *measure* in music. In Greek and Latin verse the quantity or length of syllables, that is, the time they occupy in pronouncing, was taken into account, and the elements of a foot were the short and the long syllable, marked ⏑ and – respectively, and having the relative time value of an eighth and a quarter note (𝅘𝅥𝅯 and ♩). See MORA. A foot in classical verse, therefore, is a time-and-accent pattern of longs and shorts, the verse ictus generally falling on a long, without regard to the accents of the syllables as ordinarily spoken — the latter, in Greek at least, being primarily a pitch accent. In English and other modern verse, where the ordinary accent of words is primarily an ictus, or stress, this stress regularly coincides with the verse ictus, and the relative length of the syllables is hardly regarded as an element in the foot, which is thus a pattern simply of accented and nonaccented syllables. Thus where the classic dactyl (as, *dūcĭmŭs*) is reckoned as a foot of four units with the movement of 4/8 time, the English dactyl (as, *mĕrrĭly*) is reckoned as a foot of three units, with the movement of 3/8 time. The Greeks divided the foot into two parts, the accented and the unaccented, which they called the *thesis* and the *arsis* respectively. See these terms, and VERSE.
Verse as commonly read frequently departs from this regularity of intervals; but without the regularity as a norm to which to refer it, we should not recognize it as verse. The normal accent interval we call a *foot*. *R. M. Alden*
☞ The word *foot* is sometimes combined with the names of other units to form names of derived units, as in *foot pound* or *pound foot*, etc.
at foot, said of an animal recently born and following the dam — **at one's feet** *or* (formerly) **foot,** on the ground near one's feet; hence, manifesting devoted allegiance or obedience, subjection, supplication, etc. — **f.-and-mouth disease,** a contagious disease (*eczema epizoötica*) of cattle, sheep, swine, etc., characterized by the formation of vesicles and ulcers in the mouth and about the hoofs. — **f. of the fine,** *Eng. Law*, that part of the tripartite indenture made in case of a fine of land which was preserved in the court's records. See FINE, *n.*, 3 **b**; CHIROGRAPH. *Hist.*
Henceforth [after 1195] there is to be a tripartite indenture and one "part" of it is to be preserved in the treasury. This "part" or copy (perhaps owing to some confusion between the French pes which means peace, concord, and the Latin pes which means foot) soon becomes known as the "*foot* of the fine." *Pollock & Maitland*
— **on f. a** Walking or running; afoot. **b** In motion; astir. **c** In progress or activity; "going on." — **to find, know,** *or* **take, the length of one's f.,** to discover, know, or try to learn the characteristics of a person, esp. in order to manage him. *Slang, Eng.* — **to put,** *or* **set, one's best f. foremost,** to do one's best to get on (lit. or fig.); to make as good an appearance as possible. See BEST. *Colloq.* — **to put,** *or* **set, one's f. down,** to take a resolute stand; to be determined. *Colloq.* — **to put,** *or* **set, one's f. down upon,** to repress decisively; to refuse to permit or consent to. — **on (one's) feet,** in a position to go on; fairly established. — **under foot a** Under the feet; fig., in subjection. **b** Below par. *Obs.* See FOOT, 11.
"They would be forced to sell . . . far *under foot*." *Bacon.*
c *Naut.* Beneath the bottom (of a ship or boat).

foot (fo͝ot), *v. t.*; FOOT'ED; FOOT'ING. **1.** To tread to measure or music; to dance; trip; skip.
2. To walk; — opposed to *ride* or *fly*.
3. To move, esp. as a ship; as, the yacht *foots* fast.
to foot it, to walk; dance; foot; as, finding no carriage, I had to *foot it*. "*Foot it* featly here and there." *Shak.* — **to f. up,** to amount to when added or reckoned; sometimes with *to*; as, his debts *foot up* (or *foot up to*) $1,000.

foot, *v. t.* **1.** To tread; to walk, run, or dance, on, over, or through; as, to *foot* the green; to *foot* a measure.

2. A field game played with a football, in which each of two contesting teams tries to kick or carry the ball to or through its opponent's goal or goal line. There are now three principal varieties, **Rugby, Association,** and **American, football.** In the first, as principally played in the British Empire, the ball may be carried, or kicked, or thrown backwards, and a player in possession of the ball may be tackled bodily. There are two distinct varieties, **Rugby Union** and a later development under professional auspices, **Northern Union** (played in Lancashire and Yorkshire). In *Association football* all use of the arms or hands is prohibited except to the goal keeper, and the ball is propelled by kicking, or striking it with the head, shoulder, or other parts of the body except the arms. *American football* is a development of the Rugby game, in which one side is allowed undisputed possession of the ball at the moment when it is put in play and players may run ahead of the man with the ball to prevent his being seized, these changes leading to others in the direction of more systematized and formal play. The ball used in the Rugby and American games is ellipsoidal in shape, while the Association football is spherical.

10. Consequence; importance; only in phrases *it is,* or *is not, force,* or *of force. Obs.*

Syn.—FORCE, VIOLENCE, COMPULSION, COERCION, CONSTRAINT, RESTRAINT agree in the idea of the exertion of power against will, wish, or consent. *Force* and *violence,* regularly in this connection physical, may be used upon either persons or things; *compulsion, coercion, constraint, restraint,* either physical or moral, upon personal agents only (except in certain figurative uses) — *compulsion* and *coercion* being usually exercised upon others than one's self, *constraint* or *restraint* upon either. FORCE (see POWER), the most general term, implies physical power exerted upon persons or things; as, "Rude fishermen . . . by *force* took Dromio" (*Shak.*). VIOLENCE denotes the unjust or unwarranted exercise of force, usually with the accompaniment of vehemence, outrage, or fury; as, "They will by *violence* tear him from your palace" (*Shak.*). COMPULSION and, still more, COERCION, imply the application, usually by some active agent, of physical or (in the case of *coercion* more frequently) moral force to control the action of a voluntary agent; as, "I will give no man a reason upon *compulsion*" (*Shak.*); *coercion* by threat or intimidation. CONSTRAINT and RESTRAINT may be exercised either by an active agent or by force of circumstances; *constraint* sometimes denotes an urging or driving to action, but more frequently implies its forcible restriction or confinement, whereas *restraint* suggests its actual hindrance or curbing; as, "The lion . . . roared with sharp *constraint* of hunger" (*Shak.*); "I will confess . . . without *constraint*" (*Shak.*); "Through all *restraint* broke loose he wings his way" (*Milton*). For the more specific legal senses, see the various words.

fore-clo'sure (fōr-klō'zhŭr), *n.* A proceeding which bars or extinguishes a mortgagor's right of redeeming a mortgaged estate. The term is specifically applied to the proceeding instituted in a court of chancery or equity by a bill of foreclosure, and called a **strict foreclosure**, resulting in the forfeiture of the right to redeem and the vesting of the estate in the mortgagee in perpetuity. This is distinct from the **statutory foreclosure**, also made by a suit in equity, which involves the satisfaction of the debt to the extent made possible by a sale of the mortgaged property. Under the strict foreclosure the proceeding is completed by the judgment of the court; in the statutory proceedings, by the sale under foreclosure. Other methods, called **legal foreclosure**, barring the equity of redemption, are in use in some of the United States by proceedings at law instead of equity, as by writ of entry or ejectment or scire facias.

a foreign or absent debtor is attached for the satisfaction of a debt due from him to the plaintiff. — **foreign bill, bill of exchange, draft,** etc., *Law & Com.*, any bill, etc., with respect to any particular jurisdiction, not both drawn and payable within that jurisdiction; — distinguished from *inland bill*, etc. In this respect the United Kingdom of Great Britain and Ireland is foreign to its colonies and they to it and to each other; and the States of the United States are foreign to each other. Therefore, for example, a bill drawn and payable in any particular State is a *foreign* bill as between the laws of that State and any other State, a *domestic* bill with reference to the laws of the United States, and a *foreign* bill as between the laws of the State and of the United States and those of any foreign country, all bills drawn in the United States being commonly designated in commercial reports as *domestic* bills, it not being commonly especially significant whether the bill was drawn in one State or another. With reference to a given jurisdiction foreign bills are those that are by their terms (1) drawn there and payable elsewhere, or (2) drawn elsewhere and payable there, or (3) both drawn and payable elsewhere. These are sometimes classified as **sight** bills, payable on sight, **short** bills, those having (generally) ten days or less to run, and **long** bills, or those having (generally) upwards of ten days to run. — **f. broker**, a broker in foreign bills. — **f. office**, a government department having to do with international relations and the interests of its own country in the other countries with which it has relations. In the United States it is called the Department of State. — **f. rails**, *Finance*, railway securities of foreign countries, except those of the United States. *Cant, Eng.* — **f. service.** *Feudal Law.* = FORINSEC SERVICE.

3. Specif., *Law*, to anticipate or prevent the normal trading in (a fair, market, etc.) by buying or contracting for merchandise or provision on its way to market, with the intention of selling it again at a higher price, or by dissuading persons from bringing their goods there, or persuading them to enhance the price when there. The laws making forestalling, regrating, and engrossing crimes were abolished in 1844 in Great Britain, by 7 & 8 Vict. c. 24.
4. To obstruct or beset, as a way; to prevent ingress to; also, to exclude, hinder, or prevent, by prior occupation, or by measures taken in advance.

An ugly serpent which *forestalled* their way. *Fairfax.*

5. To deprive by prior action; — with *of*, *from*, *out of*. *Obs.*

7. To get ahead of; to act, take, or think of beforehand, or in advance; to anticipate.

What need a man *forestall* his date of grief
And run to meet what he would most avoid? *Milton.*

Syn. — FORESTALL, ANTICIPATE (as here compared; see EXPECT) both have the idea of being (or getting) ahead, or of prior action. FORESTALL often emphasizes more strongly than ANTICIPATE the implication of precluding, preventing, or rendering nugatory or useless; as, "He . . . commenced a step or two, as if designing to enter the shop; but . . . his purpose was *anticipated* by Hepzibah's first customer" (*Hawthorne*); to be *anticipated* in a discovery (cf. an attempt to *forestall* the publication of a discovery); "On a winter's day . . . the birds, conceiving a design to *forestall* sweet St. Valentine" (*Cowper*); "I will *forestall* their repair hither, and say you are not fit" (*Shak.*). See PREVENT.

2. To tell, acquaint, or command, beforehand. *Obs.*

These our actors,
As I *foretold* you, were all spirits. *Shak.*

Syn. — FORETELL, PREDICT, PROPHESY, FORECAST, PRESAGE, FOREBODE, PORTEND, AUGUR, PROGNOSTICATE. FORETELL (Saxon) and PREDICT (Latin) are frequently interchangeable; but PREDICT is now commonly used when inference from facts (rather than occult processes) is involved; as, "Some sorcerer . . . had *foretold*, dying, that none of all our blood should know the shadow from the substance" (*Tennyson*); "Mr. Brooke's conclusions were as difficult to *predict* as the weather" (*G. Eliot*); an astronomer *predicts* the return of a comet. PROPHESY connotes inspired or mysterious knowledge, or great assurance of prediction; as, "ancestral voices *prophesying* war" (*Coleridge*); "Wrinkled benchers often talked of him approvingly, and *prophesied* his rise" (*Tennyson*). FORECAST connotes conjecture rather than inference; PRESAGE implies shrewd forecast, sometimes presentiment or warning; as, "Who shall so *forecast* the years?" (*Tennyson*); "I *presage*, unless the country make an alarm, the cause is lost" (*Scott*); "He said, and passed with sad *presaging* heart" (*Pope*). FOREBODE (see APPREHENSION) implies obscure prescience or premonition (esp. of evil); PORTEND (see OMINOUS), threatening or ominous foretokening; as, "His heart *forebodes* a mystery" (*Tennyson*); "My father put on the countenance which always *portends* a gathering storm" (*Richardson*). To AUGUR is to presage from or as if from omens, to PROGNOSTICATE, from or as if from symptoms; "Gentle reader, yet unborn, of whom I needs must *augur* better things" (*Cowper*); "A man brings to love a deal of ready-made sentiment, and even from childhood obscurely *prognosticates* the symptoms of this vital malady" (*Stevenson*).

3. Causing to forget, inducing oblivion; oblivious. *Poetic.*

"The *forgetful* wine." *J. Webster.*

— **for-get'ful-ly,** *adv.* — **for-get'ful-ness,** *n.*

Syn. — FORGETFULNESS, OBLIVION. In modern usage, FORGETFULNESS (the Saxon term) more frequently signifies aptness to forget or the state of forgetting; OBLIVION (the Latin term), the state of being forgotten, as, his *forgetfulness* increased with age; "All the lumber which the good sense of our ancestors . . . had consigned to *oblivion*" (*Goldsmith*). But the distinction is sometimes reversed; as, "Who to dumb *Forgetfulness* a prey" (*Gray*); "Ah! Not the nectarous poppy lovers use . . . *oblivion* in lost angels can infuse of the soiled glory and the trailing wing" (*M. Arnold*). FORGETFUL more frequently than *oblivious* suggests defective memory; OBLIVIOUS commonly implies profound or entire forgetfulness (its use, however, as an exact synonym for *unconscious* is erroneous); as, "Bear with me, good boy, I am much *forgetful*" (*Shak.*), "Though books were among the comforts and enjoyments of his life from boyhood to old age, they never made him *oblivious* of its business" (*Southey*).

for'ge-tive (fôr'jĕ-tĭv; fōr'-; 201), *a.* [From FORGE.] Inventive; productive; imaginative; — coined by Shakespeare (*2 Henry IV.*, IV. iii. 107) and used by later authors.

15. **a** Degree of quality, dignity, eminence, or excellence; rank; also, a class or rank in society, official life, etc. *Obs.* "Ladies of a high *form*." *Bp. Burnet.* **b** A rank of students in a school; a class; as, the sixth *form*.

16. That by which shape is given or determined; a mold, frame, or pattern.

17. *Print.* The type or other matter from which an impression is to be taken, arranged and secured in a chase.

18. The immature flower bud of the cotton plant. *U. S.*

19. *Civil Engin.* A mold for concrete.

20. *Mach.* The seat of a mine-shaft pump.

Syn. — FORM, FIGURE, SHAPE, CONFORMATION, CONFIGURATION, OUTLINE, CONTOUR, PROFILE. *Form*, *figure*, and *shape* (here compared in their nontechnical uses only) are constantly interchanged. In general, FORM is the aspect under which a thing appears, esp. as distinguished from substance or color; FIGURE is more frequently form as defined by outline; SHAPE is more familiar and colloquial than *form*; it frequently suggests form as given or acquired; as, "Eternal *form* shall still divide the eternal soul from all beside" (*Tennyson*); "Nature nor in *form* nor hue bestowed on me her choicest workmanship" (*Shelley*); "Wide as a windmill all his *figure* spread" (*Pope*); "sketching with her slender pointed foot some *figure* like a wizard's pentagram on garden gravel" (*Tennyson*); "the color of his beard, the *shape* of his leg" (*Shak.*); "I can . . . change *shapes* with Proteus" (*id.*); "Brooke is a very good fellow, but pulpy; he will run into any mold, but he won't keep *shape*" (*G. Eliot*). CONFORMATION and CONFIGURATION denote form as dependent upon the arrangement or disposition of parts; as, the *conformation* of the vocal organs, the *configuration* of a coast line, of a mountain range. OUTLINE suggests the bounding line of a figure; CONTOUR connotes rather body or mass as (esp. gracefully) outlined; as, "At night, the *outline* of the shore is traced in transparent silver by the moonlight and the flying foam" (*Stevenson*); "Its *outline*, when seen in silhouette against the sky, is pyramidal" (*J. C. Van Dyke*); "a child, of timid, soft *contours*" (*M. Hewlett*); "the full and flowing *contour* of the neck" (*Shelley*); cf. "The *outline* of the hills was sharp against the sky" (*Stevenson*); "to round and soften the *contours* of the mountains" (*Ruskin*). PROFILE is esp. outline in side view; as, "lips lovely in *profile*; — a little too wide and hard in the edge, seen in front" (*Ruskin*). See IMAGE, COPY.

forms of action, *Law*, the customary or legal methods of prosecuting actions; specif., the approved classes of actions under the common-law pleading and practice, having their origin in original writs (which see), some of them being developed from these writs, which were unalterable in their forms, by various legal fictions, others, called **actions on the case**, from later writs issued under the authority of a statute enacted in the reign of Edward I. The principal common-law forms of action are: assumpsit, covenant, debt, account, trespass, trover, case, detinue, replevin, ejectment, and writ of entry. They were abolished in England by the Judicature Acts, and have been abolished in many of the United States.

form (fôrm), *v. t.*; FORMED (fôrmd); FORM'ING. [F. *former*, L. *formare*, fr. *forma*. See FORM, *n.*] **1.** To give form or shape to; to frame; construct; make; fashion; produce.

God *formed* man of the dust of the ground. *Gen.* ii. 7.

2. To give a particular shape to; to shape, mold, or fashion into a certain state or condition; to arrange; adjust; organize, also, to model by instruction and discipline, to mold by influence, etc.; to train.

'T is education *forms* the common mind. *Pope.*

Thus *formed* for speed, he challenges the wind. *Dryden.*

3. To develop; to acquire or contract; as, he *formed* the habit of reading.

4. To go to make up; to act as constituent of; to be the essential or constitutive elements of; to answer for; to take the shape of; — said of that out of which anything is formed or constituted, in whole or in part.

Politicians . . . who *formed* by far the majority. *Burke.*

5. *Gram.* To derive by grammatical rules, as by adding the proper suffixes and prefixes.

6. *Mil. & Nav.* To arrange in order; to draw up; as, the lines advanced as soon as they were *formed*.

7. *Elec.* To treat (plates) so as to bring them to fit condition for introduction into a storage battery, causing one plate to be composed more or less of spongy lead, and the other of lead peroxide. This was formerly done by repeated slow alternations of the charging current, but now the plates or grids are coated or filled, one with a paste of red lead and the other with litharge, introduced into the cell, and *formed* by a direct charging current.

form, *v. i.* **1.** To become formed or shaped.
2. To take form; to come into existence; to arise.
3. To take a form, definite shape, or arrangement; as, the infantry *formed* in column.
4. To run to or crouch in a form, as a hare. *B. Jonson.*

to form on, *Mil.*, to form next to (an organization already formed), thus extending a line or the front of a column.

form-. *Chem.* Combining form for *formic* or *formyl*, as in *form*aldehyde.

-form (-fôrm). [See FORM, *n.*] A suffix denoting *in the form* or *shape of*, *resembling*, etc.; as, calci*form*; ovi*form*.

for'mal (fôr'măl), *a.* [L. *formalis*: cf. F. *formel*.] **1.** Of or pertaining to form, or a form; esp., of or pertaining to established form or custom; conventional.

Still in constraint your suffering sex remains,
Or bound in *formal* or in real chains. *Pope.*

2. Of the nature of form; of the nature of the inner form or reality; essential; of the nature of the external form or appearance; apparent.

3. *Metaph.* Belonging to the essential constitution of a thing, as distinguished from the matter composing it; having the power of making a thing what it is; constituent; essential; pertaining to, or depending on, the forms, so called, of the human intellect.

Of [the sounds represented by] letters, the material part is breath and voice; the *formal* is constituted by the motions and figure of the organs of speech. *Holder.*

4. Characterized by due form or order; regular.
5. Hence: **a** Comely; shapely; symmetrical. *Obs.* **b** Sound in mind; normal; sane. *Obs.*

To make of him a *formal* man again. *Shak.*

6. Done in due form, or with solemnity; according to regular method; ceremonial; express; specif., *Law*, requiring special solemnities for its making, as certain contracts, for example, the Roman stipulatio or the English marriage service; as, he gave his *formal* consent.

No noble rite nor *formal* ostentation. *Shak.*

7. Devoted to, or done in accordance with, forms or rules; punctilious; orderly; methodical; of a prescribed form; exact; prim; stiff; ceremonious; as, a man *formal* in his dress, his gait, his conversation.

She took off the *formal* cap that confined her hair. *Hawthorne*

8. That is such only as a matter of form; having the form or appearance without the substance or essence; external; as, *formal* duty; *formal* worship; *formal* courtesy, etc.; a *formal* party to a suit, i. e., a party having only a nominal interest in the matter in controversy.

Syn. — Precise, punctilious, stiff, starched, affected, ritual, ceremonious, external, outward. See CEREMONIAL.

formal analogy. *Philol.* See ANALOGY, *n.*, 4. — **f. cause**, *Metaph.*, one of the four causes distinguished by Aristotle. See CAUSE. — **f. garden**, *Landscape Gardening*, a garden laid out on strict or formal lines, the plantations being in rows or geometrical figures. — **f. logic**, any system of logic which abstracts the forms of thought from its content with the object of establishing abstract criteria of consistency; specif., the traditional or Aristotelian logic.

The end aimed at by *formal logic*, and attained by the observance of its precepts, is not truth, but consistency. *J. S. Mill.*

— **f. object.** See OBJECT, 4. — **f. predication**, *Logic*, predication in which the predicate is a part of the concept which forms the subject. — **f. unity.** See UNITY. — **f. whole.** See WHOLE.

form-al'de-hyde (fôr-măl'dĕ-hīd), *n.* [*form-* + *aldehyde*.] *Org. Chem.* A gaseous compound, H·CHO, with a sharp penetrating odor, formed by the partial combustion of methyl alcohol and in other ways. See ALDEHYDE. It is a very effective preservative and disinfectant, and preparations of it, most of which are aqueous solutions, are sold under various trade names, as *formalin*, *formalose*, *formol*, etc. It is readily changed to the white, crystalline polymeric forms *metaformaldehyde*, *oxymethylene*, or *trioxymethylene*, $(CH_2O)_3$, and *paraformaldehyde*, $(CH_2O)_4$. It also polymerizes in other ways. See PHOTOSYNTHESIS.

for'ma-lin (fôr'mȧ-lĭn), *n.* [*form-* + *aldehyde* + *-in*.] An aqueous solution of formaldehyde. See FORMALDEHYDE. The commercial article has a strength of about 40 per cent.

for'mal-ism (fôr'măl-ĭz'm), *n.* **1.** The practice or the doctrine of strict adherence to, or dependence on, prescribed or external forms, esp. in matters of religion; also, an instance of it; esp., the using or observance of external religious forms without the life and spirit of religion.

Official *formalism*. *Sir H. Rawlinson.*

2. Emphatic or predominant attention to arrangement, esp. to prescribed or traditional rules of composition, in painting and sculpture.

form-an'i-lide (fôr-măn'ĭ-līd; -līd; 184), *n.* Also **-lid.** [*form-* + *anilide.*] *Chem.* A colorless crystalline compound, $HCONHC_6H_5$, prepared by the action of oxalic acid or formic acid on aniline, and used in medicine as an antipyretic and anodyne.
form'ant (fôr'mănt), *n.* *Phon.* The characteristic resonance tone of a vocal sound; the tone of constant pitch, as of a vowel, independent of the cord, or glottal, tone.
for'mat' (fôr'mă', fôr-măt'), *n.* [F. or G. Cf. FORMATION.] Shape and size of a book; general style or get-up of a book; as, the *format* was too luxurious for a textbook.
for'mate (fôr'măt), *n.* [See FORMIC.] *Chem.* A salt or ester of formic acid.
for-ma'tion (fôr-mā'shŭn), *n.* [L. *formatio*: cf. F. *formation.*] **1.** Act of giving form or shape to anything, or of taking form or coming into existence; a forming; a shaping; production; development.
2. That which is formed.
3. The manner in which a thing is formed; structure; construction; conformation; form; as, the peculiar *formation* of the heart.
4. *Mil.* The arrangement of a body of troops, as in a line, square, column, etc.
5. *Geol.* **a** An aggregate of mineral deposits or rock masses designated with reference to their origin or composition; as, the siliceous *formation* about geysers; alluvial *formations;* a granite *formation.* **b** Beds of sedimentary rock formed by uninterrupted deposition, and having, in any given place, a similar composition and similar fossils. Also applied indefinitely to all the beds of sedimentary rock formed during a minor (rarely a major) subdivision of geologic time; as, the Trenton *formation.*
6. *Phytogeog.* A plant society. See PLANT SOCIETY.
for-ma'tion-al (-ăl), *a.* Pert. to formation or a formation.
form'a-tive (fôr'mă-tĭv), *a.* [Cf. F. *formatif.*] **1.** Giving form; having the power of giving form; plastic; of or pertaining to formation; as, the *formative* arts.
The meanest plant cannot be raised without seed, by any *formative* power residing in the soil. *Bentley.*
2. *Gram.* Serving to form; derivative; not radical; as, a termination merely *formative.*
3. *Biol.* Capable of growth and development; as, living or *formative* matter.
formative stimulus, *Plant Physiol.*, an external stimulus, such as the puncture of a gall insect, which exercises a modifying or formative influence on plant tissues, causing malformation or other unusual growths.
form'a-tive (fôr'mă-tĭv), *n.* *Gram.* **a** That which serves merely to give form, and is no part of the radical, as the prefix or the termination of a word. **b** A word formed in accordance with some rule or usage, as from a root.
form-az'yl (fôr-măz'ĭl), *n.* [*formo-* + *azo-* + *-yl.*] *Org. Chem.* The univalent radical $C(N{:}NC_6H_5)N{\cdot}NHC_6H_5$, related to formamidine.
formed (fôrmd), *pret. & p. p.* of FORM. Specif.: *p. a.* **a** Decided, settled. **b** Matured. **c** *Her.* Pattée. **d** *Astron.* Arranged, as stars in a constellation; as, *formed* stars. *Rare.* **e** *Biol.* Of the nature of an organism, organized; as, *formed* or organized ferments. See FERMENT, *n*, 1.
formed coil, *Elec.*, a coil wound by a machine upon a form and transferred afterwards to an armature, as distinguished from a coil wound directly on the armature.
for'me-don (fôr'mē-dŏn), *n.* [AF., fr. Latin. So called because the plaintiff claimed "by the form of the gift," L. *per formam doni.*] *Law.* A former writ of right for recovering per formam doni entailed property. It was called **formedon in the descender** when brought by the tenant in tail, **formedon in the reverter** when brought by a reversioner, and **formedon in the remainder** when brought by a remainderman. It was abolished by 3 & 4 Will. IV. c. 27.
form'er (fôr'mĕr), *n.* **1.** One who forms; a maker; a creator.
2. That which forms; as: **a** A shape around or by which an article is to be shaped, molded, woven, wrapped, pasted, or otherwise constructed. **b** A templet, pattern, gauge, guide, or block by which an article is shaped or bent. **c** A cutting die. **d** *Rope Making.* A machine for twisting yarn into strands.
for'mer (fôr'mĕr), *a. compar.* [A compar. due to ME. *formest.* See FOREMOST.] **1.** Preceding in order of time; antecedent; previous; prior; earlier; hence, ancient.
For inquire, I pray thee, of the *former* age. *Job* viii 8.
2. Near the beginning; preceding; as, the *former* part of a discourse or argument.
3. First mentioned or in order, of two things mentioned or understood; as, of these two evils the *former* is the less.
4. Anterior in place or situation; forward; front; foremost. *Obs.* "Our *former* ensign." *Shak.*
Syn. — Prior, previous, anterior, preceding, foregoing. See ANTECEDENT.
former adjudication. *Law.* See RES ADJUDICATA. — **F. Prophets.** See OLD TESTAMENT.
for'mer-et (fôr'mĕr-ĕt), *n.* [F.] *Arch.* A wall rib in a roof vaulted with ribs. See ARCHITECTURE, *Illust.*
for'mer-ly (fôr'mĕr-lĭ), *adv.* **1.** Beforehand; first. *Obs.*
2. In time past; in time at any indefinite distance; of old; heretofore; once.
3. In time immediately preceding; just before. *Obs.*
form'ful (fôrm'fo͝ol), *a.* **1.** Creative; imaginative; as, a *formful* mind. *Rare.*
2. Comely; shapely. *Rare.*
form genus. *Biol.* A genus made up of species whose complete development or life history is unknown; — applied esp. to bacteria and various Fungi Imperfecti.
for'mic (fôr'mĭk), *a.* [L. *formica* an ant: cf. F. *formique.*] **1.** *Chem.* Pertaining to or designating an acid, $H.CO_2H$, a colorless, mobile, vesicatory liquid, of pungent odor; — so named because found in ants. It occurs naturally in various insects and plants, and is produced artificially in many ways, as by the oxidation of methyl alcohol, by the reduction of carbonic acid, or the destructive distillation of oxalic acid. It is the first member of the fatty acids in the paraffin series, and is homologous with acetic acid.
2. Of or pertaining to ants.
for'mi-ca-ry (fôr'mĭ-kā-rĭ), *n.*; *pl.* -RIES (-rĭz). [LL. *formicarium*, fr. L. *formica* ant.] An ants' nest; the dwelling of a colony of ants; an ant hill.
for'mi-cate (-mĭ-kāt), *v. i.*; -CAT'ED (-kāt'ĕd); -CAT'ING (-kāt'ĭng). [See FORMICATION.] To creep or crawl like ants; to swarm with or as if with ants.
An open space which *formicated* with peasantry. *Lowell*
for'mi-ca'tion (-kā'shŭn), *n.* [L. *formicatio*, fr. *formicare* to creep like an ant, to feel as if ants were crawling on one's self, fr. *formica* ant: cf. F. *formication.*] *Med.* A form of paræsthesia marked by an irritating sensation resembling that made by the creeping of ants on the skin.
for'mi-ca-tive (-kā-tĭv), *a.* Of the nature of formication.
For-mic'i-dæ (fôr-mĭs'ĭ-dē), *n. pl.* [NL., fr. L. *formica* an ant.] *Zoöl.* A family including all the ants, or restricted to the more typical forms (as the genera *Formica* and *Camponotus*) having but one segment to the abdominal pedicel, and no sting. — **for'mi-cid** (fôr'mĭ-sĭd), *a. & n.*
for'mi-cine (fôr'mĭ-sĭn; -sīn), *a.* [L. *formicinus.*] Of, pertaining to, or resembling, an ant.
For'mi-civ'o-ra (-sĭv'ō-rā), *n.* [NL.; L. *formica* ant + *vorare* to devour.] *Zoöl.* A genus consisting of the typical ant wrens.
for'mi-da-ble (fôr'mĭ-dă-b'l), *a.* [L. *formidabilis*, fr. *formidare* to fear, dread: cf. F. *formidable.*] Exciting fear or apprehension; impressing dread; adapted to excite fear or deter from approach, encounter, or undertaking; alarming; as, a *formidable* foe.
They seemed to fear the *formidable* sight. *Dryden.*
Syn. — Dreadful, fearful, terrible, tremendous, menacing, threatening, redoubtable. — FORMIDABLE, FEARFUL. That is FEARFUL (as here compared; see FEARFUL, AFRAID) which inspires fear; that is FORMIDABLE which is redoubtable, menacing, or calculated to deter from action; as, "It is a *fearful* spectacle to see so many maniacs dancing in their chains" (*Cowper*), "The first attack was dangerous, but a second must be more *formidable* still" (*id.*), "A quietude which he had the power of making more *formidable* than any violence" (*Hawthorne*).
— **for'mi-da-ble-ness,** *n.* — **for'mi-da-bly,** *adv.*
for'min (fôr'mĭn), *n.* [*formi-* + *-in.*] *Chem.* Either of two liquid compounds, glyceryl esters of formic acid, distinguished as *monoformin*, $C_3H_5(OH)_2(HCO_2)$ and *diformin*, $C_3H_5(OH)(HCO_2)_2$. They are formed when glycerin is heated with oxalic acid.
form'less, *a.* Without determinate form; wanting regularity of shape. — **form'less-ly,** *adv.* — **form'less-ness,** *n.*
For-mo'sa mar'ble (fôr-mō'sa). [Prob. fr. L. *formosus* beautiful.] A dark gray and white mottled marble, often blotched with red, from Nassau, Germany.
For-mo'san (-săn), *a.* [From the island, so named fr. Pg. *formosa* beautiful, fem. of *formoso*, L. *formosus.*] Of or pert. to the island of Formosa or its inhabitants, or designating or belonging to their language. See MALAYO-POLYNESIAN. — *n.* A native of Formosa; esp., a member of one of the Malayan savage or semisavage tribes of the interior.
form-ox'ime (fôr-mŏk'sĭm; -sēm), *n.* [*form-* + *oxime.*] *Org. Chem.* The oxime of formaldehyde, a colorless liquid (CH_2:NOH) which readily becomes solid by polymerization.
form species. *Biol.* One of the species of a form genus.
for'mu-la (fôr'mū-la), *n.*; *pl.* E. -LAS (-laz), L. -LÆ (-lē). [L., dim. of *forma* form, model. See FORM, *n.*] **1.** A prescribed or set form; an established rule; a fixed or conventional method in which anything is to be done, arranged, or said; a set form of words for use in any ceremony; a form; — often somewhat derogatory.
2. *Eccl.* A written confession of faith; a formal statement of doctrines.
3. A recipe; esp., a prescription or recipe for the preparation of a medicinal compound.
4. *Math.* Any general fact, rule, or principle expressed in algebraic symbols; as, the binomial *formula.*
5 *Chem.* A symbolic expression of the composition or constitution of a substance; as, the *formula* for water is H_2O. The present system of symbols was introduced by Berzelius, and consists of abbreviations of the names of the elements (see ELEMENT), with small figures at the lower right hand to denote the number of atoms of each element present. A chemical formula may express merely the results of a quantitative analysis, as in the **empirical,** or **composition, formula** CH for acetylene, from which, knowing the atomic weight of carbon to be 12 and that of hydrogen to be 1, we know that, by weight, acetylene is $\frac{12}{13}$ carbon and $\frac{1}{13}$ hydrogen. The **molecular formula** C_2H_2 for acetylene expresses also that the molecular weight is 26 and that the molecule contains 2 atoms of carbon and 2 of hydrogen. A **constitutional, graphical, rational,** or **structural formula** adds to the foregoing information more or less about the internal structure of the molecule, or the relations of the atoms to one another. Thus the formula HCCH states the belief that the two carbon atoms of acetylene are each united to the other and also to an atom of hydrogen; the formula HC:CH or, otherwise written, H–C≡C–H, introduces further the conception that the two carbon atoms are in a peculiar kind of union (see TRIPLE BOND). This last formula, representing each separate atom and its mode of union, is sometimes called a **valence formula,** as distinguished from a **linkage formula,** as HCCH, which shows the order in which the atoms are linked, but is noncommittal as to valence. It is sometimes necessary to represent the configuration of the molecule, that is, the disposition of the atoms in three-dimensioned space; this is done with the ordinary formulas by special convention (see ALLOISOMERISM), by formulas drawn in perspective, or by the use of models. A **general formula** is one applicable to a series of compounds, as MNO_3, where M is any univalent metal; R·OH, where R is any of various hydrocarbon radicals; or C_nH_{2n+2}, where *n* may be 1, 2, 3, 4, etc.
6. *Roman Law.* Any of the various written forms by which the prætors referred causes to judges or arbitrators for hearing and adjudication upon a summons (*in jus vocatio*) of the defendant into court by the plaintiff. There were two chief classes of formulæ: one (called a **formula in jus concepta**) expressly stating the duty of the defendant; the other (called a **formula in factum concepta**) merely stating facts that justified an award, and specifying the amount of the award. The chief parts of a formula were: the **nomination** (L. *nominatio*), naming the judex or recuperators; the **demonstration** (L. *demonstratio*), reciting the facts on which the action was based; the **intention** (L. *intentio*), stating the question in issue; the **adjudication** (L. *adjudicatio*), directing the judge to apportion shares in property; and the **condemnation** (L. *condemnatio*), directing the judge to condemn or absolve the defendant according as he found for or against the plaintiff on the facts alleged. Besides these, a formula might contain a **prescription** (L. *præscriptio*), a preliminary clause limiting the scope of the inquiry on behalf of the plaintiff; or an **exception** (L. *exceptio*), containing a statement that judgment is to be rendered for the plaintiff only on condition that the judge finds against facts set up by the defendant by way of equitable defense (cf. PRÆTORIAN LAW). Further similar limiting conditions arising out of the plaintiff's reply to

In England fornication has (except for a short period) been cognizable as an offense only in the ecclesiastical courts under the canon law since about the 12th century, not being a common-law offense. It is punishable by statute in various States of the United States. In some States sexual intercourse between a married man and an unmarried woman is held to be only fornication on his part, in others adultery. See ADULTERY.

For-tu'na (fôr-tū'nȧ), *n.* [L.] **1.** *Rom. Relig.* Goddess of fortune, the traditional founder of whose cult was Servius Tullius. She was worshiped under innumerable forms, the oldest, in Rome, being apparently **Fors For-tu'na** (fôrz), goddess of chance, and **For-tu'na Vir'go** (vûr'gō), a goddess of womanhood or of chastity. **For-tu'na Pri/mi-ge'ni-a** (prī/mĭ-jē'nĭ-ȧ), so called as being the firstborn daughter of Jupiter, was originally a Præneștian goddess, having a famous oracle conducted by sortilege. Her cult was brought to Rome during the struggle with Hannibal. The **Fortuna of Antium** (*Horace*, Ode XXXV.) also possessed a famous oracle. Only in poetry under Greek influence did the Romans conceive Fortuna as a generalized goddess of chance similar to the Greek Tyche. The actual Fortunas of Rome were mostly concrete, altars being raised to such as Good Fortune, Bad Fortune, Public Fortune, Private Fortune, etc. The most noteworthy was **For-tu'na Re'dux** (the Fortune that leads back), to whom an altar was dedicated on the return of Augustus from the Orient, 19 B. C., and whose festival, **Augustalia**, on Oct. 12, was successively lengthened until under Claudius it lasted from Oct. 3 to 12.

Fou'ri-e'ri-an (fo͞o'rĭ-ē'rĭ-ăn), *a.* Of or pert. to J. B. J. Fourier (1768–1830), a French mathematician and physicist.

Fourierian integral, *Math.*, a double integral whose first integral becomes Dirichlet's integral.

Fou'ri-er-ism (fo͞o'rĭ-ẽr-Iz'm), *n.* The coöperative socialistic system of François Marie Charles Fourier (1772–1837), a Frenchman, who recommended the reorganization of society into small communities, living in common; phalansterianism. Fourier's system is based on the passions or desires of men, which he held would, if given free play, by passional attraction cause the spontaneous formation of groups in society. The unit of social organization, to allow this free play, should consist of about 2,000 persons. Each group or *phalanx* should occupy a single building and provide itself with all the commodities and amusements desired. Each individual is to be allowed to take up that occupation for which he or she has natural aptitude and to change as often as desired. There are no salaries, but each is to receive an ample minimum and a share of the surplus. Numerous attempts to form communities on Fourier's system have been made in France and the United States, but with little success. See BROOK FARM.

Fou'ri-er-ist (fo͞o'rĭ-ẽr-Ĭst) } *n.* One who adopts the views
Fou'ri-er-ite (fo͞o'rĭ-ẽr-īt) } or system of F. M. C. Fourier; a believer, advocate, or practicer of Fourierism.

Fou'rier's' for'mu-la (fo͞o'ryāz'). [After Baron J. B. J. *Fourier*, French savant.] *Math.*

$$\text{Limit}\int_0^{\pi/2} F(x)\,\frac{\sin nx}{\sin x}\,dx = \frac{\pi}{2}F(0)$$

for n increasing without limit. It is of fundamental importance in Fourier's series.

Fourier's series. *Math.* A series proceeding by sines or cosines of multiples of a variable, the multiples varying as the natural numbers; as $C_1 \sin\frac{\pi}{a}x + C_2 \sin\frac{2\pi}{a}x + \ldots$.

When the series is uniformly convergent for x in the interval 0 to a, the C's may be expressed as definite integrals.

Fourier's theorem. *Math.* The theorem that if a periodic interval can be divided into a finite number of partial intervals within each of which the function is ordinary, a Fourier's series represents the function within each of those partial intervals; mechanically, this means that any rectilinear periodic motion may be resolved into a set of simple harmonic motions whose periods are aliquot parts of the original period (**Fourier's law**).

four'-in-hand', *a.* **1.** Consisting of four horses controlled by one person; as, a *four-in-hand* team; drawn by four horses driven by one person; as, a *four-in-hand* coach.

2. Designating a kind of necktie, consisting of a long band to be tied with a kind of slip knot presenting a broad portion in front and leaving the ends hanging vertically.
